Saving The Planet The Politics Of Hope:

Saving the Planet Norman V. Walbek, 1988 **Saving Progressive Christianity to Save the Planet** Bruce G Epperly, 2024-10-22 Calling for a faith that lives by what it affirms not just by what it denies this book outlines a positive engaging message supported by active spiritual practices and carried out in action for a better community and planet In doing so Bruce Epperly calls for rethinking and reviving many Christian themes often neglected or discarded in progressive Christianity to help carry out this mission Among these themes are Mystical experience and vision Spiritual healing Genuine dialog Reclaiming a relationship with Jesus Reclaiming and affirming the work of the Holy Spirit Practicing God's kingdom and peace rather than an expectation of doom Being witnesses in the world Speaking and acting prophetically bringing hope In bringing life to these themes Epperly looks to Jesus and to scripture without demeaning other faiths He evokes a relational non coercive God as the foundation of a relational and non coercive presence in the world This book will provide both a challenge and a hope to progressive congregations especially those struggling with diminishing numbers but it will also provide an excellent antidote to the charge that progressive Christianity is not an affirmative active and hopeful faith

Authentic Hope: It's the End of the World as We know it but Soft Landings are Possible Jack Nelson-Pallmeyer, 2012 [The Political](#)

[Christopher Nolan](#) Jesse Russell, 2023-05-26 Many of Christopher Nolan's films ironically both embrace the tradition of surrealist and Avant Garde filmmaking while simultaneously providing at least tacit support for the Anglo American liberal world order For Nolan this world order which relies on global capitalism technocratic supremacy and ultimate control of

world cultural production is a much greater alternative to either left or right wing challenges to this liberalism In Nolan s films this liberalism must occasionally use violence and violate some of its core principals of privacy and freedom to maintain its dominance Nonetheless Anglo American liberalism in Nolan s vision provides a world that is freer more humane and more prosperous than other anarchic Marxist or fascist alternatives Finally and perhaps most importantly for Nolan the security wealth and freedom of this liberal world order enables the world of art and film to blossom and the opportunity for Christopher Nolan to create post ironic dream worlds or in the words of Jean Baudrillard a hyperreality

Islands of Hope Paul D'Arcy,Daya Dakasi Da-Wei Kuan,2023-05-25 In the Pacific as elsewhere indigenous communities live with the consequences of environmental mismanagement and over exploitation but rarely benefit from the short term economic profits such actions may generate within the global system National and international policy frameworks ultimately rely on local community assent Without effective local participation and partnership these extremely imposed frameworks miss out on millennia of local observation and understanding and seldom deliver viable and sustained environmental cultural and economic benefits at the local level This collection argues that environmental sustainability indigenous political empowerment and economic viability will succeed only by taking account of distinct local contexts and

cultures In this regard these Pacific indigenous case studies offer islands of hope for all communities marginalised by increasingly intrusive and increasingly rapid technological changes and by global dietary economic political and military forces with whom they have no direct contact or influence

Hope for the Earth Ernst M. Conradie, 2005-05-18 Hope for the Earth explores the viability of an eschatological approach to an ecological theology spirituality and praxis in the South African context The basic intuition of such an eschatological approach is that an environmental praxis can only be empowered on the basis of an adequate understanding of Christian hope Despair in the face of environmental destruction will inevitably lead to a spirit of resignation Where then can a vision of hope that includes hope for the earth be found The author proposes a road map for eschatology based on the observation that eschatology has traditionally responded to three aspects of the human predicament namely 1 the evil effects of sin 2 the problem of finitude and transience and 3 the limitations of human power and knowledge in space Part A This analysis is used to fathom the depths of despair as a result of environmental destruction Part B The Biblical roots and subsequent history of Christian eschatology are discussed briefly Part C Recent contributions in Christian eschatology ecological theology cosmology and South African expressions of hope are explored in depth in search of a vision of hope that includes hope for the earth itself Part D The eschatological road map is used to develop a vision of hope for the earth on the basis of a theology of life life amidst death and destruction life beyond death and eternal life in the presence of God Part E Finally the implications of this vision for an ecological ethos spirituality and praxis in the South African context are indicated Part F

political life fear and hope How are cultures of resistance nurtured within an environment of paranoia and social paralysis Stefan Skrimshire argues that grass roots responses to a politics of fear coincide with an explosion of interest in the quasi religious themes of apocalypse eschatology and utopia in cultural life Where visions of a better future are replaced by the acceptance of a fearful present a state of war with no end this is an important examination of the beliefs that underpin our capacity to hope

No Other Planet Mathias Thaler, 2022-09-22 Visions of utopia some hopeful others fearful have become increasingly prevalent in recent times This groundbreaking timely book examines expressions of the utopian imagination with a focus on the pressing challenge of how to inhabit a climate changed world Forms of social dreaming are tracked across two domains political theory and speculative fiction The analysis aims to both uncover the key utopian and dystopian tendencies in contemporary debates around the Anthropocene as well as to develop a political theory of radical transformation that avoids not only debilitating fatalism but also wishful thinking This book juxtaposes theoretical interventions from Bruno Latour to the members of the Dark Mountain collective with fantasy and science fiction texts by N K Jemisin Kim Stanley Robinson and Margaret Atwood debating viable futures for a world that will look and feel very different from the one we live in right now
