Seeing Red Mark Cronlund Anderson, Carmen L. Robertson, 2011-09-02 The first book to examine the role of Canada's newspapers in perpetuating the myth of Native inferiority Seeing Red is a groundbreaking study of how Canadian English language newspapers have portrayed Aboriginal peoples from 1869 to the present day It assesses a wide range of publications on topics that include the sale of Rupert's Land the signing of Treaty 3 the North West Rebellion and Louis Riel the death of Pauline Johnson the outing of Grey Owl the discussions surrounding Bill C 31 the Bended Elbow

standoff at Kenora Ontario and the Oka Crisis The authors uncover overwhelming evidence that the colonial imaginary not only thrives but dominates depictions of Aboriginal peoples in mainstream newspapers The colonial constructs ingrained in the news media perpetuate an imagined Native inferiority that contributes significantly to the marginalization of Indigenous people in Canada That such imagery persists to this day suggests strongly that our country lives in denial failing to live up to its cultural mosaic boosterism

Shadmehr,Sandro Mussa-Ivaldi,2023-10-31 A novel theoretical framework that describes a possible rationale for the regularity in how we move how we learn and how our brain predicts events In Biological Learning and Control Reza Shadmehr and Sandro Mussa Ivaldi present a theoretical framework for understanding the regularity of the brain s perceptions its reactions to sensory stimuli and its control of movements They offer an account of perception as the combination of prediction and observation the brain builds internal models that describe what should happen and then combines this prediction with reports from the sensory system to form a belief Considering the brain s control of movements and variations despite biomechanical similarities among old and young healthy and unhealthy and humans and other animals Shadmehr and Mussa Ivaldi review evidence suggesting that motor commands reflect an economic decision made by our brain weighing reward and effort This evidence also suggests that the brain prefers to receive a reward sooner than later devaluing or discounting reward with the passage of time then as the value of the expected reward changes in the brain with the passing of time because of development disease or evolution the shape of our movements will also change The internal models formed by the brain provide the brain with an essential survival skill the ability to predict based on past observations The formal concepts presented by Shadmehr and Mussa Ivaldi offer a way to describe how representations are formed what structure they have and how the theoretical concepts can be tested **Red** R.C. A Red in the House Stephen Fleischman, 2004 What did CBS and ABC not know about Steve Fleischman during his thirty years in network news and why did they not know it In *A Red in the House* Stephen Fleischman tells of the political landmines in the mainstream media that marked the Cold War era Although the Communist Party disintegrated out from under me in the mid 1950s I found Marxism a valuable tool for analyzing the political and economic world around me During those thirty years I worked with the best in mainstream broadcast journalism Walter Cronkite Ed Murrow Fred Friendly Dan Rather Howard K Smith Eric Sevareid Peter Jennings Charles Kuralt Harry Reasoner Roone Arledge Bill Redeker Brit Hume and more Stephen Fleischman *A Red in the House* is replete with anecdotes and sidebar stories relating to the inner conflicts in the making of the TV news documentary *A Red in the House* portrays a graphic picture of how the mainstream media arrived at the sorry state it's in today With five corporate media giants controlling most of what we see hear and read this story is even more relevant today

Seeing Red Nicholas Humphrey, 2006-03-31 Consciousness matters Arguably it matters more than anything The purpose of this book is to build towards an explanation of just what the matter is Nicholas Humphrey begins this compelling exploration of the biggest of big questions with a challenge to the reader and himself What's involved in seeing red What is it like for us to see someone else seeing something red Seeing a red screen tells us a fact about something in the world But it also creates a new fact a sensation in each of our minds the feeling of redness And that's the mystery Conventional science so far hasn't told us what conscious sensations are made of or how we get access to them or why we have them at all From an evolutionary perspective what's the point of consciousness Humphrey offers a daring and novel solution arguing that sensations are not things that

happen to us they are things we do originating in our primordial ancestors expressions of liking or disgust Tracing the evolutionary trajectory through to human beings he shows how this has led to sensations playing the key role in the human sense of Self The Self as we now know it from within seems to have fascinating other worldly properties It leads us to believe in mind body duality and the existence of a soul And such beliefs even if mistaken can be highly adaptive because they increase the value we place on our own and others lives Consciousness matters Humphrey concludes with striking paradox because it is its function to matter It has been designed to create in human beings a Self whose life is worth pursuing
