Probabilites XXXIV J. Azema, M. Emery, M. Ledoux, M. Yor, 2007-05-06 This volume contains 19 contributions to various subjects in the theory of commutative and non commutative stochastic processes It also provides a 145 page graduate course on branching and interacting particle systems with applications to non linear filtering by P del Moral and L Miclo

Seminaire de Probabilites XXXV J. Azema, M. Emery, M. Ledoux, M. Yor, 2004-10-21 Annotation Researchers and graduate students in the theory of stochastic processes will find in this 35th volume some thirty articles on martingale theory martingales and finance analytical inequalities and semigroups stochastic differential equations functionals of Brownian motion and of L^p processes Ledoux s article contains a self contained introduction to the use of semigroups in spectral gaps and logarithmic Sobolev inequalities the contribution by Emery and Schachermayer includes an exposition for probabilists of Vershik s theory of backward discrete filtrations Séminaire de Probabilités XXXVI Jacques Azéma, Michel Émery, Michel

Besides a series of six articles on L^p processes Volume 38 of the S minaire de Probabilit s contains contributions whose

topics range from analysis of semi groups to free probability via martingale theory Wiener space and Brownian motion Gaussian processes and matrices diffusions and their applications to PDEs As do all previous volumes of this series it provides an overview on the current state of the art in the research on stochastic processes **Séminaire de Probabilités XLII** Catherine Donati-Martin, Michel Émery, Alain Rouault, Christophe Stricker, 2009-06-29 The tradition of specialized courses in the Séminaires de Probabilités is continued with A Lejay's Another introduction to rough paths Other topics from this 42nd volume range from the interface between analysis and probability to special processes Lévy processes and Lévy systems branching penalization representation of Gaussian processes filtrations and quantum probability **Séminaire de Probabilités XXXII** Jacques Azema, Michel Emery, Michel Ledoux, Marc Yor, 1998-05-20 All the papers in the volume are original research papers discussing fundamental properties of stochastic processes The topics under study martingales filtrations path properties etc represent an important part of the current research performed in 1996-97 by various groups of probabilists in France and abroad **Séminaire de Probabilités XXXVII** Jacques Azéma, Michel Émery, Michel Ledoux, Marc Yor, 2003-11-26 The 37th Séminaire de Probabilités contains A Lejay's advanced course which is a pedagogical introduction to works by T Lyons and others on stochastic integrals and SDEs driven by deterministic rough paths The rest of the volume consists of various articles on topics familiar to regular readers of the Séminaires including Brownian motion random environment or scenery PDEs and SDEs random matrices and financial random processes Séminaire de Probabilités XLI Catherine Donati-Martin, Michel Émery, Alain Rouault, Christophe Stricker, 2008-08-30 Stochastic processes are as usual the main subject of the Séminaire with contributions on Brownian motion fractional or other Lévy processes martingales and probabilistic finance Other probabilistic themes are also present large random matrices statistical mechanics The contributions in this volume provide a sampling of recent results on these topics All contributions with the exception of two are written in English language Seminaire de Probabilites XXXIII J. Azema, M. Emery, M. Ledoux, M. Séminaire de Probabilités XL Catherine Donati-Martin, Michel Émery, Alain Rouault, Christophe Stricker, 2007-07-25 Who could have predicted that the Séminaire de Probabilités would reach the age of 40 This long life is first due to the vitality of the French probabilistic school for which the Séminaire remains one of the most specific media of exchange Another factor is the amount of enthusiasm energy and time invested year after year by the Rédacteurs Michel Ledoux dedicated himself to this task up to Volume XXXVIII and Marc Yor made his name inseparable from the Séminaire by devoting himself to it during a quarter of a century Browsing among the past volumes can only give a faint glimpse of how much is owed to them keeping up with the standard they have set is a challenge to the new Rédaction In a changing world where the status of paper and ink is questioned and where alas pressure for publishing is increasing in particular among young mathematicians we shall try and keep the same direction Although most contributions are anonymously refereed the Séminaire is not a mathematical journal our first criterion is not mathematical depth but usefulness to the French and international probabilistic community We do not insist that everything published in these volumes should have reached its final form or be original and acceptance rejection may not be decided on purely scientific grounds
