Seminaire Henri Cartan 1951 1952 1953 1954:

Seminaire Henri Cartan 1951-1952 Pam's Ecole normale superieure, **Differential and Complex Geometry: Origins, Abstractions and Embeddings** Raymond O. Wells, Jr., 2017-08-01 Differential and complex geometry are two central areas of mathematics with a long and intertwined history This book the first to provide a unified historical perspective of both subjects explores their origins and developments from the sixteenth to the twentieth century Providing a detailed examination of the seminal contributions to differential and complex geometry up to the twentieth century embedding theorems this monograph includes valuable excerpts from the original documents including works of Descartes Fermat Newton Euler Huygens Gauss Riemann Abel and Nash Suitable for beginning graduate students interested in differential algebraic or complex geometry this book will also appeal to more experienced readers **Stein Manifolds and Holomorphic Mappings** Franc Forstnerič, 2011-08-27 The main theme of this book is the homotopy principle for holomorphic mappings from Stein manifolds to the newly introduced class of Oka manifolds The book contains the first complete account of Oka Grauert theory and its modern extensions initiated by Mikhail Gromov and developed in the last decade by the author and his collaborators Included is the first systematic presentation of the theory of holomorphic automorphisms of complex Euclidean spaces a survey on Stein neighborhoods connections between the geometry of Stein surfaces and Seiberg Witten theory and a wide variety of applications ranging from classical to contemporary **Séminaire Henri Cartan** École normale supérieure (France), 1951 **Séminaire Henri Cartan**, 1967 *Analytic Functions* Lars Valerian Ahlfors, 2015-12-08 A survey of recent developments both in the classical and modern fields of the theory Contents include The complex analytic structure of the space of closed Riemann surfaces Complex analysis on noncompact Riemann domains Proof of the Teichmüller Ahlfors theorem The conformal mapping of Riemann surfaces On certain coefficients of univalent functions Compact analytic surfaces On differentiable mappings Deformations of complex analytic manifolds Originally published in 1960 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **French Mathematical Seminars** Nancy D. Anderson, 1989 Intended for mathematics librarians the list allows librarians to ascertain if a seminaire has been published which library has it and the forms of entry under which it has been cataloged **The National Union Catalog, 1952-1955 Imprints**, 1961 **Handbook of Geometry and Topology of Singularities IV** José Luis Cisneros-Molina, Lê Dũng Tráng, José Seade, 2023-10-07 This is the fourth volume of the Handbook of Geometry and Topology of Singularities a series that aims to provide an accessible account of the state of the art of the subject its frontiers and its interactions with other areas of research This

volume consists of twelve chapters which provide an in depth and reader friendly survey of various important aspects of singularity theory Some of these complement topics previously explored in volumes I to III Amongst the topics studied in this volume are the Nash blow up the space of arcs in algebraic varieties determinantal singularities Lipschitz geometry indices of vector fields and 1 forms motivic characteristic classes the Hilbert Samuel multiplicity and comparison theorems that spring from the classical De Rham complex Singularities are ubiquitous in mathematics and science in general Singularity theory is a crucible where different types of mathematical problems interact surprising connections are born and simple questions lead to ideas which resonate in other subjects Authored by world experts the various contributions deal with both classical material and modern developments covering a wide range of topics which are linked to each other in fundamental ways The book is addressed to graduate students and newcomers to the theory as well as to specialists who can use it as a guidebook □□□□□□□□,1971 *Princeton Mathematical Series*,1960 *The National Union Catalog, Pre-1956 Imprints*,1970 Algebraic Geometry and Topology Ralph Hartzler Fox,2015-12-08 Many of the developments of modern algebraic geometry and topology stem from the ideas of S Lefschetz These are featured in this volume of contemporary research papers contributed by mathematical colleagues to celebrate his seventieth birthday Originally published in 1957 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Notices of the American Mathematical Society** American Mathematical Society,1967 Contains articles of significant interest to mathematicians including reports on current mathematical research

Répertoire des congrès et ouvrages collectifs figurant à la Bibliothèque de l'Institut Henri Poincaré Madeleine Estève,Institut Henri Poincaré (Paris). Bibliothèque,1956 Fibre Bundles D. Husemöller,2013-06-29 The notion of a fibre bundle first arose out of questions posed in the 1930s on the topology and geometry of manifolds By the year 1950 the definition of fibre bundle had been clearly formulated the homotopy classification of fibre bundles achieved and the theory of characteristic classes of fibre bundles developed by several mathematicians Chern Pontrjagin Stiefel and Whitney Steenrod's book which appeared in 1950 gave a coherent treatment of the subject up to that time About 1955 Milnor gave a construction of a universal fibre bundle for any topological group This construction is also included in Part I along with an elementary proof that the bundle is universal During the five years from 1950 to 1955 Hirzebruch clarified the notion of characteristic class and used it to prove a general Riemann Roch theorem for algebraic varieties This was published in his *Ergebnisse Monograph* A systematic development of characteristic classes and their applications to manifolds is given in Part III and is based on the approach of Hirzebruch as modified by Grothendieck **Periodicals and Other Serials Held by the**
