Patterns of Rationality Tommaso Bertolotti, 2015-04-29 This book proposes an applied epistemological framework for investigating science social cognition and religious thinking based on inferential patterns that recur in the different domains It presents human rationality as a tool that allows us to make sense of our physical or social surroundings It shows that the resulting

cognitive activity produces a broad spectrum of outputs such as scientific models and experimentation gossip and social networks but also ancient and contemporary deities The book consists of three parts the first of which addresses scientific modeling and experimentation and their application to the analysis of scientific rationality Thus this part continues the tradition of eco cognitive epistemology and abduction studies The second part deals with the relationship between social cognition and cognitive niche construction i e the evolutionarily relevant externalization of knowledge onto the environment while the third part focuses on what is commonly defined as irrational thus being in a way dialectically opposed to the first part Here the author demonstrates that the irrational can be analyzed by applying the same epistemological approach used to study scientific rationality and social cognition also in this case we see the emergence of patterns of rationality that regulate the relationships between agents and their environment All in all the book offers a coherent and unitary account of human rationality providing a basis for new conceptual connections and theoretical speculations

Aquinas and Radical Orthodoxy Paul J. DeHart, 2012 Aquinas and Radical Orthodoxy investigates the encounter of the most vibrant and controversial trend in recent theology with the greatest Christian thinker of the Middle Ages The book describes Radical Orthodoxy's orientation and highlights those anti secular strategies and intellectual influences that have shaped its appeal to Aquinas It surveys the emergence of the particular picture of Aquinas especially associated with the leaders of Radical Orthodoxy John Milbank and his student Catherine Pickstock along with the scholarly disputes which prompted and followed that development The book then undertakes a detailed investigation of the pivotal publications on Aquinas of those two authors laying out their difficult theories in clear language carefully examining the texts of Aquinas to which they appeal and challenging their interpretations on a number of fundamental points Topics covered include analogical language and knowledge of God the role of metaphysics within theology the relation of cognition to the divine archetypes of things the possibility of human apprehension of God's essence the nature of substance and speculation on the Trinity The conclusion reflects on those elements suppressed by the Radical Orthodox reading of Aquinas their constructive philosophical and theological possibilities and the challenges they present to the Radical Orthodox project

Poiesis and Enchantment in Topological Matter Xin Wei Sha, 2013-12-06 A groundbreaking conception of interactive media inspired by continuity field and process with fresh implications for art computer science and philosophy of technology In this challenging but exhilarating work Sha Xin Wei argues for an approach to materiality inspired by continuous mathematics and process philosophy Investigating the implications of such an approach to media and matter in the concrete setting of installation or event based art and technology Sha maps a genealogy of topological media that is of an articulation of continuous matter that relinquishes a priori objects subjects and egos and yet constitutes value and novelty Doing so he explores the ethico aesthetic consequences of topologically creating performative events and computational media Sha's interdisciplinary investigation is informed by thinkers ranging from Heraclitus to Alfred North Whitehead to Gilbert Simondon to Alain Badiou to Donna

Haraway to Gilles Deleuze and Félix Guattari Sha traces the critical turn from representation to performance citing a series of installation events envisioned and built over the past decade His analysis offers a fresh way to conceive and articulate interactive materials of new media one inspired by continuity field and philosophy of process Sha explores the implications of this for philosophy and social studies of technology and science relevant to the creation of research and art Weaving together philosophy aesthetics critical theory mathematics and media studies he shows how thinking about the world in terms of continuity and process can be informed by computational technologies and what such thinking implies for emerging art and technology

KONSULT Gregory L. Ulmer, 2019-02-02 A motto guiding Gregory L Ulmer's career is from the poet Basho not to follow in the footsteps of the masters but to seek what they sought The responsibility of humanities disciplines today is to do for the digital apparatus social machine what the classical Greeks did for alphabetic writing Ulmer frames online learning as a mode of invention heuristics beginning with the invention of konsult itself Konsult Theopraxis describes the invention of a genre of learning that is to digital media what Plato's dialogue was to alphabetic writing The Greeks invented the practices of writing rhetoric and logic native to the new institution of school the Academy fostering a new behavior of selfhood Socrates Ulmer adopts this historical precedent as a relay an inventory for what must be invented again today a genre of learning an educational institution identity behavior The insight of electracy is that each apparatus augments and institutionalizes one of the primary faculties of human intelligence *theoria* in literacy *praxis* in orality *poiesis* in electracy Needed today are not practices of writing but theopraxis of media The analytical information economy of literacy required separation and isolation siloing of institutionalized intelligence The multimodality of electracy enables syncretism of faculties into holistic performance thinking doing making knowledge purpose affect The interface metaphor of Plato's dialogue was an oral conversation during which the illiterate interlocutor is introduced to dialectical reason as *Idea* The interface metaphor of konsult is scientific consulting during which anelectrate students encounter plasmatic desire as simulacrum This new learning is organized around an updating of Justice native to electracy

Understanding Violence Lorenzo

Magnani, 2024-06-22 This book offers a philosophical account of violence engaged with both empirical and theoretical debates in disciplines such as cognitive science sociology psychiatry anthropology political theory evolutionary biology and theology The primary thesis is that violence is intertwined with morality and typically enacted for moral reasons To show this the book compellingly demonstrates how morality operates to trigger and justify violence and how people in their violent behaviors can engage and disengage with discrete moralities The author's fundamental account of language and in particular its normative aspects is particularly insightful as regards extending the range of what is to be understood as violence beyond the domain of physical harm By employing concepts such as coalition enforcement moral bubbles cognitive niches overmoralization and military intelligence the book aims to spell out how perpetrators and victims of violence systematically disagree about the very nature of violence The author's original claim is that disagreement can be understood naturalistically

described by an account of morality informed by evolutionary perspectives as well This book helps us come to terms with the fact that we are intrinsically violent beings To acknowledge this condition and our stupefying capacity to inflict harm is a responsibility we must face up to such understanding could ultimately be of help in order to achieve a safer ownership of our destinies by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing This second edition is thoroughly revised and integrated with two new chapters to cover new aspects of violence and its understanding such as the role of looting finance in facilitating violent outcomes and the attack to scientific cognition and human creativity

Semiotic Ideologies Massimo Leone,2024-10-02 This book offers a comprehensive exploration of language and semiotic ideologies focusing on how societies construct meaning through verbal and non verbal communication It distinguishes itself by adopting a novel approach that bridges linguistics semiotics and anthropology The research dives into uncharted territory shedding light on the intricate connections between language culture and cognition offering a perspective less common in traditional linguistics or semiotics Throughout the book the reader will encounter rare illustrative examples showcasing the rich tapestry of human communication Additionally previously undisclosed historical data adds depth to the analysis providing fresh insights This work is designed for scholars seeking a deeper understanding of meaning making processes and their cultural variations It also serves as a resource for those interested in the complex interplay of language and semiotics in everyday life

Narrative Complexity Marina Grishakova,Maria Poulaki,2019-08-01 The variety in contemporary philosophical and aesthetic thinking as well as in scientific and experimental research on complexity has not yet been fully adopted by narratology By integrating cutting edge approaches this volume takes a step toward filling this gap and establishing interdisciplinary narrative research on complexity Narrative Complexity provides a framework for a more complex and nuanced study of narrative and explores the experience of narrative complexity in terms of cognitive processing affect and mind and body engagement Bringing together leading international scholars from a range of disciplines this volume combines analytical effort and conceptual insight in order to relate more effectively our theories of narrative representation and complexities of intelligent behavior This collection engages important questions on how narrative complexity functions as an agent of cultural evolution how our understanding of narrative complexity can be extended in light of new research in the social sciences and humanities how interactive media produce new types of narrative complexity and how the role of embodiment as a factor of narrative complexity acquires prominence in cognitive science and media studies The contributors explore narrative complexity transmitted through various semiotic channels embedded in multiple contexts and experienced across different media including film comics music interactive apps audiowalks and ambient literature

The Logic of Social Practices Raffaella Giovagnoli,Robert Lowe,2020-02-04 This book reports on cutting edge research concerning social practices Merging perspectives from various disciplines including philosophy biology and cognitive science it discusses theoretical aspects of social behavior along with models to investigate them and also
