*Code* Bernard Dionysius Geoghegan,2022-12-09 In *Code* Bernard Dionysius Geoghegan reconstructs how Progressive Era technocracy as well as crises of industrial democracy and colonialism shaped early accounts of cybernetics and digital media by theorists including Norbert Wiener Warren Weaver Margaret Mead Gregory Bateson Claude Lévi Strauss Roman Jakobson

Jacques Lacan Roland Barthes and Luce Irigaray His analysis casts light on how media practical research forged common epistemic cause in programs that stretched from 1930s interwar computing at MIT and eugenics to the proliferation of seminars and laboratories in 1960s Paris This mobilization ushered forth new fields of study such as structural anthropology family therapy and literary semiology while forming enduring intellectual affinities between the humanities and informatics With Code Geoghegan offers a new history of French theory and the digital humanities as transcontinental and political endeavors linking interwar colonial ethnography in Dutch Bali to French sciences in the throes of Cold War era decolonization and modernization

**Semiotics in the United States** Thomas Albert Sebeok,1991 As a glimpse onto U S American semiotics through the mind s eye of a witness participant observer architect and midwife this slim but rich book fulfills its title Journal of Linguistic Anthropology This book is an invaluable historical conceptual and anecdotal account of the rise of semiotics in the United States Review of Metaphysics Sebeok who has done more to establish the field of semiotics in the United States than any other single scholar here draws upon his personal experiences of half a century to present the achievement and current status of semiotics in this country He focuses on salient individuals and intellectual issues including theatre television folklore sociology tourism and graphic design He also examines semiotic applications to architecture marketing and advertising jurisprudence and medicine

**The Neuro-Consumer** Anne-Sophie Bayle-Tourtoulou,Michel Badoc,2020-04-24 Neuroscientific research shows that the great majority of purchase decisions are irrational and driven by subconscious mechanisms in our brains This is hugely disruptive to the rational logical arguments of traditional communication and marketing practices and we are just starting to understand how organizations must adapt their strategies This book explains the subconscious behavior of the neuro consumer and shows how major international companies are using these findings to cast light on their own consumers behavior Written in plain English for business and management readers with no scientific background it focuses on how to adapt marketing and communication to the subconscious and irrational behaviors of consumers the direct influence of the primary senses sight hearing smell taste touch on purchasing decisions and the perception of communications by customers brains implications for innovation packaging price retail environments and advertising the use of nudges and artifices to increase marketing and communication efficiency by making them neuro compatible with the brain s subconscious expectations the influence of social media and communities on consumers decisions when collective conscience is gradually replacing individual conscience and recommendation becomes more important than communication and the ethical limits and considerations that organizations must heed when following these principles Authored by two globally recognized leaders in business and neuroscience this book is an essential companion to marketers and brand strategists interested in neuroscience and vital reading for any advanced student or researcher in this area

The Hermeneutical Turn in Semiotics Rodica Amel,2022-03-11 This book emphasizes the ontological foundation of signs a semiotic perspective that opens the way to culture It extends the reader s understanding of the semiotic process by

problematizing the concept of sign beyond its classical definitions Its didactic explanations allow a progressive design of the spiritual function of signs and as such it will appeal to students concerned with understanding human nature The book will also be of interest to professors and researchers as well as anyone interested in the field of the Humanities *The Semiotic Sphere* Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventure of the search itself *Classics of Semiotics* Martin Krampen, Klaus Oehler, Roland Posner, Thomas A. Sebeok, Thure von Uexküll, 2013-06-29 This book is designed to usher the reader into the realm of semiotic studies It analyzes the most important approaches to semiotics as they have developed over the last hundred years out of philosophy linguistics psychology and biology As a science of sign processes semiotics investigates all types of communication and information exchange among human beings animals plants internal systems of organisms and machines Thus it encompasses most of the subject areas of the arts and the social sciences as well as those of biology and medicine Semiotic inquiry into the conditions functions and structures of sign processes is older than any scientific discipline As a result it is able to make the underlying unity of these disciplines apparent once again without impairing their function as specializations Semiotics is above all research into the theoretical foundations of sign oriented disciplines that is it is General Semiotics Under the name of Zeichenlehre it has been pursued in the German speaking countries since the age of the Enlightenment During the nineteenth century the systematic inquiry into the functioning of signs was superseded by historical investigations into the origins of signs This opposition was overcome in the first half of the twentieth century by American Semiotics as well as by various directions of European structuralism working in the tradition of Semiology Present day General Semiotics builds on all these developments *The Cambridge History of Linguistics* Linda R. Waugh, Monique Monville-Burstion, John E. Joseph, 2023-08-10 The establishment of language as a focus of study took place over many centuries and reflection on its

nature emerged in relation to very different social and cultural practices Written by a team of leading scholars this volume provides an authoritative chronological account of the history of the study of language from ancient times to the end of the 20th century i e recent history when modern linguistics greatly expanded Comprised of 29 chapters it is split into 3 parts each with an introduction covering the larger context of interest in language especially the different philosophical religious and or political concerns and socio cultural practices of the times At the end of the volume there is a combined list of all references cited and a comprehensive index of topics languages major figures etc Comprehensive in its scope it is an essential reference for researchers teachers and students alike in linguistics and related disciplines **Museum, Media,**

**Message** Eilean Hooper-Greenhill, 2013-03-07 Collecting together a group of talented writers Museum Media Message considers in depth the most up to date approaches to museum communication including museums as media museums and audience and the evaluation of museums Addressing the need for museums to develop better knowledge of visitor experience this volume introduces a broad range of issues and presents the ultimate how why and who of museum communication Museum Media Message combines philosophical discussion practical examples and case studies and examines museum communication in three sections analyzing how museums and galleries construct and transmit complex systems of value through processes of collection and exhibition raising philosophical and management issues and exploration of work with specific audiences introducing methods for studying the audiences experiences of communication events in museums Perfect for people who want to develop a more critical and informed professional museum practice and for students looking to enhance their skills of analysis and reflection this book is of value to anyone interested in the current debates and issues of this new and growing field **The Messages of Tourist Art** Bennetta Jules-Rosette, 2013-04-17 Tourist art may be a billion

dollar business Nevertheless such art is despised What is worse the bad culture is seen as driving out the good Commercialization is assumed to destroy traditional arts and crafts replacing them with junk The process is seen as demeaning to artists in the traditional societies who are seduced into a type of whoredom unfeeling production of false beauty for money The arts remain problematic for the social sciences Sociology textbooks treat the arts as subordinate reflections of social forces norms or groups Anthropology textbooks conventionally isolate the arts in a separate chapter failing to integrate them with analyses of kinship economics politics language or biology Textbooks reflect the guiding theories which emphasize such factors as modes of production patterns of thought or biological and normative constraints but their authors have not adequately formulated the aesthetic dimension One may compare the theoretical status of the arts to that of religion After the contributions by Emile Durkheim and Max Weber the sociology of religion is well established but where is a Durkheim or Weber for the sociology of art What is true of the social sciences in general holds for understanding of modernization in the Third World These processes and those places are analyzed economically politically and socially but the aesthetic dimension is treated in isolation if at all and is poorly grasped in relation to the other forces I Think I Am a Verb Thomas A.

Sebeok, 2013-11-11 My writing career has been at least in this one respect idiosyncratic it had to mark and chart step by step its own peculiar campaign My earliest papers beginning in 1942 were technical articles in this or that domain of Uralic linguistics ethnography and folklore with a sprinkling of contributions to North and South American linguistics In 1954 my name became fecklessly associated with psycholinguistics then successively with explorations in my theology religious studies and stylistic problems It now takes special effort for me to even revive the circumstances under which I came to publish in 1955 a hefty tome on the supernatural another in 1958 on games and yet another in 1961 utilizing a computer for extensive sorting of literary information By 1962 I had edged my way into animal communication studies Two years after that I first whiffled through what Gavin Ewart evocatively called the tulgey wood of semiotics In 1966 I published three books which temporarily bluffed some of my friends into conjecturing that I was about to metamorphose into a historiographer of linguistics The topmost layer in my scholarly stratification dates from 1976 when I started to compile what eventually became my semiotic tetralogy of which this volume may supposably be the last In the language of Jabberwocky the word tulgey is said to connote variability and evasiveness This notwithstanding the allusion seems to me apt *Children's Drawings* Martin Krampen, 2013-06-29 This book is dedicated to all those who love children and their wonderful often surprising drawings This means it addresses all those interested in their developing capacity to produce iconic signs parents teachers child psychologists artists architects since building drawings are treated here and semioticians at large to name but a few potential readers Because of the broad audience I tried to keep scientific jargon to a minimum Whenever this was unavoidable I tried to explain the terms in such a way that even beginners in psychology could understand my arguments I received the first impulse to think about a book like this from the International Year of the Child declared by the UN in 1979 In a first phase of the project I obtained drawings of the six different building types treated in this book from more than 100 children aged 3-12 years in Turkey during a stay there as part of the faculty of Architecture of the Karadeniz Technical University in Trabzon under the auspices of the UN ESCO UNDP program TUR 75 012 My special thanks go to Dr Erdem Aksoy then president of the university and Dr Ozgontil Aksoy then dean of the faculty of Architecture and Civil Engineering for their encouragement to carry out the project I would also like to thank Dr Kutzal Oztirk Sevinc Ertirk Ali Ozbilen Hasan Saltik together with all the teachers in nursery and elementary schools in and around Trabzon who helped to collect the drawings The Law as a System of Signs Roberta Kevelson, 2012-12-06 Even if Peirce were well understood and there existed general agreement among Peirce scholars on what he meant by his semiotics or philosophy of signs the undertaking of this book which intends to establish a theoretical foundation for a new approach to understanding the interrelations of law economics and politics against referent systems of value would be a risky venture But since such general agreement on Peirce's work is lacking one's sense of adventure in ideas requires further qualification Indeed the proverbial nerve for failure must in any case be attendant If one succeeds one has introduced for further inquiry the strong possibility that should

our social systems of law economics and politics our means of interpersonal transaction as a whole be understood against the theoretical back ground of a dynamic motion picture universe that is continually becoming that is infinitely developing and changing in response to genuinely novel elements that emerge as existents then the basic concepts of rights resources and reality take on new dimensions of meaning in correspondence with n dimensional infinite value judgments or truth like beliefs which one holds If such a view as Peirce maintained were possible and tenable not only for philosophy but as the basis for action and interaction in the world of human experience and practical affairs one would readily say that risk taking is a small price for the realization of such possibility

**Museums and Their Visitors** Eilean Hooper-Greenhill, 2013-04-15  
Museums are at a critical moment in their history In order to ensure survival into the next century museums and galleries must demonstrate their social relevance and use This means developing their public service functions through becoming more knowledgeable about the needs of their visitors and more adept at providing enjoyable and worthwhile experiences Museums and Their Visitors aims to help museums and galleries in this crucial task It examines the ways in which museums need to develop their communicative functions and with examples of case studies explains how to achieve best practice The special needs of a number of target audiences including schools families and people with disabilities are outlined and illustrated by examples of exhibition education and marketing policies The book looks in detail at the power of objects to inspire and stimulate and analyses the use of language in museums and galleries This is the first book to be written to guide museum and gallery staff in the development of provision for their visitors It will be of interest to students of museum heritage and leisure and tourism studies as well as to international museum professionals

Art and Language: Explorations in (Post) Modern Thought and Visual Culture Christiane Treichl, 2017-12-19 Art and Language Explorations in Post Modern Thought and Visual Culture sheds new light on the symbiotic relationship between art and language by exploring how these cultured sets consociate on philosophical and art historical levels Against the backdrop of visual semiotics the first section of the book considers the differences between art and language from various vantage points meaning making asking if art is a language Ernst Cassirer s symbolic forms Jan Muka ovsk s signs and Gilles Deleuze s philosophy The second section of the book deals with the works of post modern artists from diverse cultural backgrounds who unfasten traditional linguistic and artistic systems by destabilising the viewer and blurring the boundaries between art and language The author argues that this is the most productive cutting edge aspect of the word image relationship of that period Language provides post modern art with its thrust and focus and offers a site for critical intervention The artistic forays the author embarks on cover a wide range touching on Surrealism Dada Arabic Calligraphy and Chinese Conceptualist Art
