The Ecology and Semiotics of Language Learning Leo van Lier, 2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time

Language as Social Semiotic Michael Alexander Kirkwood Halliday, 1978 This volume assembles Professor Halliday's most important recent essays on the functions of language in social communication The investigation of language as social semiotic means interpreting language within a sociocultural context in which the culture itself is interpreted in semiotic terms as an information system to put it another way The notion of language as one resource albeit a principal one in the exchange of meanings which constitute a culture requires a focus on language from the outside inwards interpreting language by reference to its place in the social process Professor Halliday's interest in linguistic questions is ultimately an applied one a concern with language in relation to the process and experience of socialization and education The sociolinguistic patterns of the community the language of family neighbourhood and school and the personal experience of language from earliest infancy are among the most fundamental elements in a child's environment for learning This emphasis is directly reflected in the last part of this volume on sociolinguistics and education but it is indirectly present throughout in discussion of areas ranging from the theoretical perspective and the sociosemantic nature of discourse to language in urban society and antilanguages
