The Ape that Understood the Universe Steve

Stewart-Williams, 2019-11-21 The Ape that Understood the Universe is the story of the strangest animal in the world the human animal It opens with a question How would an alien scientist view our species What would it make of our sex differences our sexual behavior our altruistic tendencies and our culture The book tackles these issues by drawing on two major schools of thought evolutionary psychology and cultural evolutionary theory The guiding assumption is that humans are animals and that like all animals we evolved to pass on our genes At some point however we also evolved the capacity for culture and from that moment culture began evolving in its own right This transformed us from a mere ape into an ape capable of reshaping the planet travelling to other worlds and understanding the vast universe of which we're but a tiny fleeting fragment Featuring a new foreword by Michael Shermer

Disbelief Will M. Gervais, 2024-07-30 Does God exist This straightforward question has spawned endless debate ranging from apologists' supposed proofs of God's existence to New Atheist manifestos declaring belief in God a harmful delusion In *Disbelief* Will M Gervais PhD a global leader in the psychological study of atheism shows that the ubiquity of religious belief and the peculiarities of atheism are connected pieces in the puzzle of human nature It's undeniable that religion is a core tenet of human nature It is also true that our overwhelmingly religious species is also as atheistic as it's ever been Yet no scientific understanding of religion is complete without accounting for those who actively do not believe In this refreshing and revelatory book Gervais argues that religion is not an evolutionary puzzle so much as two evolutionary puzzles that can only be solved together First is the Puzzle of Faith the puzzle of how *Homo sapiens* alone came to be a religious species Second is the Puzzle of Atheism how disbelief in gods can exist within our uniquely religious species The result is a radically cohesive theory of both faith and

atheism showing how we became a uniquely religious species and why many are now abandoning their belief Through a firsthand account of breakthroughs in the scientific study of atheism including key findings from cognitive science cultural evolution and evolutionary psychology Disbelief forces a rethinking of the prevailing theories of religion and reminds both believers and atheists of the shared psychologies that set them on their distinct religious trajectories In casual prose and with compelling examples Gervais explains how we became religious why we re leaving faith behind and how we can get along with others across the religious divides we ve culturally evolved

Contemporary Evolutionary Theories of Culture and the Study of Religion

Radek Kundt,2015-11-19 Radek Kundt compares the notion of evolution in cultural evolutionary theories with neo Darwinian evolutionary theory to determine the value of the biological concept for studying culture Contemporary Evolutionary Theories of Culture and the Study of Religion surveys the historical background of cultural evolution as used in the study of religion pinpointing major objections to classical nineteenth century theories Radek Kundt argues that contemporary theories of cultural evolution do not repeat the same mistakes but that when

they are evaluated in terms of fitting the core requirements of neo Darwinian natural selection it is clear that they are not legitimate extensions of neo Darwinian theory Rather they are poor metaphors and misleading analogies which add little to conventional cause and effect historiographical work This book also introduces an alternative evolutionary approach to the study of culture which does not claim that the principles of neo Darwinian evolution should be applicable outside the biological domain Radek Kundt shows that this alternative evolutionary approach nevertheless provides a deeply enriching line of enquiry that incorporates both biological evolutionary history as shaping cultural change and culture as a force acting on the gene
