The Unreal Universe Manoj Thulasidas, 2007 In this immensely thought provoking book Thulasidas explores our notions of space and time and shows how our sense of reality rests on uncertain supports Space is unreal the same way sound and smell are unreal and time is no more real than mathematics In a space created by the brain out of the light falling on our retinas for the Hubble telescope is it a surprise that nothing can travel faster than light Generated by our sensory perception and fabricated by our cognitive process the space time continuum is the arena of physics Looking at reality as a cognitive model of perception Thulasidas sheds new light on spiritual philosophies both Western and Eastern Exploring the overlaps among the sciences and philosophies with impressive surety and clarity The Unreal Universe looks set to revolutionize the way we think of reality and understand both modern physics and ancient spiritual writings Back cover
