15 Minutes to Fitness Vincent Ben Bocchicchio,2017-01-17 Do you ever feel like a hamster spinning on a wheel in an endless loop and getting nowhere when it comes to your health and fitness Are you working out regularly and cutting calories but seeing no real improvements Does it feel like you will never lose those last 10 or 20 pounds Or do you feel as if you simply don t have the time required to lose the fat and get into shape Imagine if you could have the blueprint for the most efficient form of exercise to keep your body healthy and fit and an eating plan to satisfy hunger taste and health Well now you can The best part It will only require 15 minutes of exercise twice a week paired with a controlled carb diet and on the average you will lose 10 pounds of fat within five weeks It s hard to believe but it works and 15 Minutes to Fitness Dr Ben s SMaRT plan for total Fitness will not only show you how to do it but also explain why it works If this sounds like just another new exercise secret please be assured that it is most certainly not The foundation of this program is based on years of study observation and practice and it has delivered real measurable results in the overwhelming majority of those who have tried it Dr Vincent Ben Bocchicchio has spent the last 40 years in the fitness and health field and as he approaches 70 people are still shocked to hear that he only spends 14 minutes twice a week on working out But it s true With only 7 percent body fat he is often asked what the secret is and if there s a magic bullet The answer would be that the magic bullet is knowledge And now with this book you will understand why genetically our bodies require simple and limited exercise exposure and how you can follow this optimal pattern yourself The fact is that as humans we are hard wired to exercise our bodies in very specific ways to reap the highest level of health benefits I will provide the simple scientific argument for why my combination of high intensity exercise and controlled carbohydrate eating is the most effective means for burning fat so that you can better understand exactly why this works Exercise and diet are the two most powerful tools available for attaining high levels of health and function and 15 Minutes to Fitness will show you just how little it actually takes to achieve a maximum response

**The Fitness Response** Richard Kelley,2019-09-10 A physician and expert in fitness based weight management shares professional secrets for a lifestyle transformation The Fitness Response addresses why a minority of individuals among us seems to consistently get it right while so many among us struggle with the problem of excess weight In fact a subset of our population thrives in pursuit of the ultimate body while most of us dabble often unsuccessfully in diet after diet to lose the same weight over and over again The Fitness Response teaches both men and women how to move beyond dieting as a temporary approach to weight loss and segue into a known lifestyle that promotes

and delivers optimal results for the long run The Fitness Response is written for anyone who wishes to make the leap to the next level of what is truly possible and begin the process of physical transformation      **Physical Fitness** Robert

Duffy,2020-08-03 We just don't walk enough anymore Wheels take us everywhere we want to go whether on a long trip or just half a mile or even less Yet we still want to eat plenty often consuming far more calories than we burn in exercise There are gyms of course but they can be expensive and you have to sign up often months ahead The gym may not be nearby so there is the time spent just getting there and back to take into consideration as well as the extra fuel costs But you want to be fit and know that taking regular exercise will improve your health you haven't time for long country walks So how do you go about getting as fit as possible The exercises contained in this book are your answer They don't require expensive equipment just your body and enough room to stretch and turn They were designed originally by the Royal Canadian Air Force and are meant to ensure that even after a relatively prolonged period of inactivity you can spring quickly into action when required They are designed for those with sedentary jobs perhaps who are city dwellers who aren't particularly interested in joining a sports club or taking part in organised sport We all have to run for a bus from time to time or chase a toddler heading for the gate so we need to be fit and able If we are older we can end up fighting middle aged spread but be proactive and step in before it becomes a problem Whatever your situation these exercises will help to ensure you increase your levels of health and fitness The exercises are graded and progress from the easiest moving on to those of average difficulty through to some which require more effort How quickly you progress is entirely up to you your degree of motivation and the time you have available Following this regime will not turn you into an Olympic athlete but if you want to get fit look fit and stay fit then these exercises are for you      **Women's Fitness in 15 minutes** Robert Duffy,2020-07-27 The
