Sensitive Souls Senses And Communication In Plants Animals And Microbes

Susana Eugenia Matallana Peláez

Sensitive Souls Senses And Communication In Plants Animals And Microbes:

Sensitive Souls Brian J. Ford, 2002-03-01 Ford's new thesis rejects the scientific orthodoxy that animals cannot feel pain or experience emotion as a symptom of the selfishness of our technological era. He reveals life in the plant and animal kingdoms to exist in glorious variety rich with sensation and creating a marvelously complex web of interaction with its surroundings. Mammals, birds, even fish can mourn for a lost love. Pain is felt at all levels of organization even in microscopic organisms. Plants are presented as intricate and complex as they respond to their surroundings and modify their behavior in the light of what they sense. Plants, animals, and humans are united in a tapestry of communion with nature and with each other. Illustrated.

Sensitive Souls Brian J. Ford, 1999 Starting from the assumption that humans have always believed themselves innately superior to other species, this work sets about demolishing such views. Can animals feel love? Might they be sensitive and sentient rather than passive and reactive?

Leonardo's Choice Carol Gigliotti, 2009-09-18 Leonardo's Choice Genetic Technologies and Animals is an edited collection of twelve essays and one dialogue focusing on the profound affect the use of animals in biotechnology is having on both humans and other species. Communicating crucial understandings of the integrated nature of the human and non-human world, these essays, unlike the majority of discussions of biotechnology, take seriously the impact of these technologies on animals themselves. This collection's central questions revolve around the disassociation Western ideas of creative freedom have from the impacts those ideas and practices have on the non-human world. This transdisciplinary collection includes perspectives from the disciplines of philosophy, cultural theory, art, and literary theory, history, and theory of science, environmental studies, law, landscape architecture, history, and geography. Included authors span three continents and four countries. Included essays contribute significantly to a growing scholarship surrounding the question of the animal emanating from philosophical, cultural, and activist discourses. Its authors are at the forefront of the growing number of theorists and practitioners across the disciplines concerned with the impact of new technologies on the more-than-human world.

Nature Across Cultures Helaine Selin, 2003-09-30 Nature Across Cultures: Views of Nature and the Environment in Non-Western Cultures consists of about 25 essays dealing with the environmental knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal, Australian, Indian, Thai, and Andean views of nature and the environment, among others, the book includes essays on Environmentalism and Images of the Other, Traditional Ecological Knowledge, Worldviews and Ecology, Rethinking the Western/non-Western Divide, and Landscape, Nature, and Culture. The essays address the connections between nature and culture and relate the environmental practices to the cultures which produced them. Each essay contains an extensive bibliography. Because the geographic range is global, the book fills a gap in both environmental history and in cultural studies. It should find a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

The Chitta Niyama Opportunity Tony Haslam, 2008-09-28 A story to

read before you close your eyes just in case it turns out to be for the last time A rare piece of original fiction that will call to you from your bookshelf again and again Drawing on factual ideas from modern science psychology philosophy and the Tibetan Buddhist tradition it challenges conventional ideas in every chapter about life death and the nature of mind It is also a story about modern people that will keep you in suspense until the very last page as you immerse yourself in the emotive experiences of not just one but seven main characters their stories gradually revealing connections between them all This book will not appeal to all It will take a special type of willingness to fully appreciate its riches Are you prepared to open yourself to new possibilities with a promise that by the end of your journey as you become closer to each character you will become immersed in a reality that could change the direction of your life for all time **Veterinary Medical Education**

Straw Dogs John Gray, 2016-03-29 The British bestseller *Straw Dogs* is an exciting radical work of philosophy which sets out to challenge our most cherished assumptions about what it means to be human From Plato to Christianity from the Enlightenment to Nietzsche and Marx the Western tradition has been based on arrogant and erroneous beliefs about human beings and their place in the world Philosophies such as liberalism and Marxism think of humankind as a species whose destiny is to transcend natural limits and conquer the Earth John Gray argues that this belief in human difference is a dangerous illusion and explores how the world and human life look once humanism has been finally abandoned The result is an exhilarating sometimes disturbing book that leads the reader to question our deepest held beliefs Will Self in the New Statesman called *Straw Dogs* his book of the year I read it once I read it twice and took notes I thought it that good Nothing will get you thinking as much as this brilliant book Sunday Telegraph

Fencing Paradise Richard Mabey, 2011-12-31 In this remarkable journal of visits to Eden Mabey transports his reader from Cornwall to the Mediterranean to the Tropics from Old World to New from present to personal memory to new perspectives on our collective artistic and emotional past Sensuous and evocative exquisitely written his new book challenges the reader to look differently at the world and our place in the landscape At the same time Mabey is controversial in his views about what we mean by buzz words like renewable or sustainable and he is highly provocative in his final response to the Eden Project itself

The Role of Theory in Advancing 21st-Century Biology National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Defining and Advancing the Conceptual Basis of Biological Sciences in the 21st Century, 2008-01-22 Although its importance is not always recognized theory is an integral part of all biological research Biologists theoretical and conceptual frameworks inform every step of their research affecting what experiments they do what techniques and technologies they develop and use and how they interpret their data By examining how theory can help biologists answer questions like What are the engineering principles of life or How do cells really work the report shows how theory synthesizes biological knowledge from the molecular level to the level of whole ecosystems The book concludes that theory is already an inextricable thread running throughout the practice of biology but that explicitly giving theory equal status with other components of biological research could help catalyze transformative research that will lead to creative dynamic and innovative advances in our understanding of life

Islam and Sustainable Development Odeh Rashed Al-Jayyousi, 2016-05-06 In Islam and Sustainable Development Odeh Al Jayyousi addresses the social human and economic dimensions of sustainability from an Islamic perspective Islam is sometimes viewed as a challenge threat and risk to the West but here we are reminded that the celebration of cultural diversity is a key component in Islamic values Promoting common understanding between East and West this American educated Middle Eastern based author offers something broader and deeper than conventional Western ways of thinking about sustainability and presents new insights inspired by Islamic worldviews Drawing on his roles as both academic researcher and senior development practitioner Professor Al Jayyousi applies his deep understanding of Islamic values to contemporary environmental financial and social conflicts and crises and defines a framework for sustainability embracing local regional and global perspectives He also addresses how education might produce innovation knowledge creation and development to support a new paradigm for sustainability that re defines what constitutes good life beyond consumerism and the production of waste This book will interest policy makers development and donor communities funding agencies and banks in the Islamic World and beyond as well as those with a professional interest in planning and in environmental and conservation issues Scholars of Islamic and Middle Eastern studies and more broadly those with an academic interest in cultural and religious studies will find that this book in Gower s Transformation and Innovation Series is perhaps the most substantial work yet on sustainable development from an Islamic perspective
