on children's brain development. The simple fact of learning to articulate the sounds of letters stimulates the connection between neurons in different areas of the brain such as Wernicke's area and Broca's area both involved in the development of language. Likewise, it favors the mental representation of abstract concepts while consolidating logical thinking. Therefore, the alphabet is one of the first lessons that children learn in school although it is not necessary to wait until that moment to teach the first notions. Since the child begins to speak with some fluency between two years and three years, you are ready to teach some letters of the alphabet. Libro práctico con el ABECEDARIO PARA COLOREAR para niños que les ayudar a conocer el alfabeto que es el primer gran paso para luego aprender a leer y escribir. De esta manera los niños también pueden comunicarse mejor con quienes los rodean ya sea para transmitir sus ideas o para comprender lo que piensan los demás. Además en la misma medida en que comienzan a relacionar los sonidos con la ortografía de cada vocal o consonante conocen su lengua materna y amplían su vocabulario. Sin embargo, muchos padres no saben que aprender el alfabeto también tiene un impacto positivo en los niños desarrollo cerebral. El simple hecho de aprender a articular los sonidos de las letras estimula la conexión entre las neuronas en diferentes zonas del cerebro como el área de Wernicke y el área de Broca ambas involucradas en el desarrollo del lenguaje. Asimismo favorece la representación mental de conceptos abstractos al tiempo que consolida el pensamiento lógico. Por lo tanto el alfabeto es una de las primeras lecciones que los niños aprenden en la escuela aunque no es necesario esperar hasta ese momento para enseñar las primeras nociones. Dado que el niño comienza a hablar con cierta fluidez entre dos y tres años, está listo para enseñar algunas letras del alfabeto.
