Sensors Controls And Quality Issues In Manufacturing:

Jet Cutting Technology A. Lichtarowicz, 2012-12-06 This volume contains papers presented at the 11th International Conference on Jet Cutting Technology held at St Andrews Scotland on 8-10 September 1992. Jetting techniques have been successfully applied for many years in the field of cleaning and descaling. Today, however, jet cutting is used in operations as diverse as removing cancerous growths from the human body, decommissioning sunsea installations and disabling explosive munitions. The diversity is reflected in the papers presented at the conference. The papers were divided into several main sections: jetting basics, materials, jetting basics, fluid mechanics, mining and quarrying, civil engineering, new developments, petrochem, cleaning and surface treatment, and manufacturing. The high quality of papers presented at the conference has further reinforced its position as the premier event in the field. The volume will be of interest to researchers, developers, and manufacturers of systems, equipment, users, and contractors. Quality Control Pengzhong Li, Paulo António Rodrigues
