Sentence Combining and Paragraph Building William Strong, 1981 **Sentence Combining** Donald A. Daiker, Andrew Kerek, Max Morenberg, 1985 Twenty three stimulating papers including essays by Peter Elbow Donald Murray and William Strong selected from the more than sixty presented at the Second Miami University Conference on Sentence Combining and the Teaching of Writing Sentence combining has not only survived the paradigm shift in the teaching of writing but continues to stimulate provocative creative thinking about the writing process itself No longer an end in itself but a tool sentence combining has become a method of teaching about ways of thinking of perceiving and of organizing reality

Combining Sentences and Creating Paragraphs Avaly McGinley, 2001-09-01 This packet is designed to be used with most fourth grade English language texts and provides practice in topic sentences recognizing paragraphs combining sentences and ideas and paragraph structure Each page in the packet introduces a new concept or skill with a definition or rule clearly stated at the top of the page Learning different kinds of words nouns verbs etc and their relationship to each other grammar helps children develop confidence and skill in using language Answer key included Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works Basic Quantitative Research Methods for Urban Planners Reid Ewing, Keunhyun Park, 2020-02-24 In most planning practice and research planners work with quantitative data By summarizing analyzing and presenting data planners create stories and narratives that explain various planning issues Particularly in the era of big data and data mining there is a stronger demand in planning practice and research to increase capacity for data driven storytelling Basic Quantitative Research Methods for

The Writing Revolution Judith C. Hochman, Natalie Wexler, 2017-08-07 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution TWR provides a clear method of instruction that you can use no matter what subject or grade level you teach The model also known as The Hochman Method has demonstrated over and over that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback Insurmountable as the challenges faced by many students may seem The Writing Revolution can make a dramatic difference And the method does more than improve writing skills It also helps Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing There s no separate writing block and no separate writing curriculum Instead teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction But perhaps what s most revolutionary about the TWR method is that it takes the mystery out of learning to write well It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content
