Enforcing Pollution Control Regulation Carolyn Abbot,2009-05-18 Monitoring and enforcement issues must be analysed when determining the effectiveness of pollution control regulation and clearly influence choices about how to regulate This

book demonstrates how an economic analysis of law enforcement can generate important insights into how best to enforce pollution control regulation. It seeks to provide a clear and accessible way into the law and economics literature on enforcement. More specifically, it uses Gary Becker's deterrence model, which by differentiating between two enforcement variables, namely the probability of apprehension and conviction and the severity of sanction, facilitates a comparison of the effectiveness of different enforcement tools in inducing desirable behaviour. As such, it provides a valuable analytical tool in considering how best to pursue cost-effective enforcement. Major themes to be addressed include Becker's deterrence model and expansions thereof, reasons for compliance, environmental enforcement strategies, and the importance of a deterrence threat and formal pollution control law enforcement mechanisms such as prosecution and criminal sanctions, administrative mechanisms, and civil liability. The book argues that in pursuing cost-effective enforcement, much can be learned from examining enforcement practices in different jurisdictions, and to this end, the author examines pollution control laws, enforcement strategies, and sanctions in Australia, Canada, and England and Wales. The book makes an important contribution to existing literature on environmental law enforcement, but its value extends beyond this. The theoretical framework adopted and the range of issues discussed make it of interest to regulatory and public law scholars more generally.

Probation Rob Canton, 2013-03-01 This book provides a comprehensive and accessible introduction to the work of the probation service. It brings together themes of policy, theory, and practice to help students and practitioners to better understand the work of probation, its limitations, as well as its potential. But above all, its value lies in setting probation in the context of the criminal justice system. The book explores its history, purposes, and contemporary significance. It explains what probation is, discusses emerging ideas around offender management, and the value of an approach that centres on the idea of desistance. It considers the practice realities of working with offenders in the community. The book also covers the governance of probation and how policy and practice are responding to contemporary concerns about crime and community safety, for example through the management of risk. Although the main focus is on England and Wales, there is some discussion of other UK jurisdictions and of contemporary trends in European probation practices. This book will encourage readers to appreciate the practical and theoretical strengths and shortcomings of contemporary probation practice. Information and discussion are presented clearly, with guidance about further study and pointers towards more specialized readings. *Probation: Working with Offenders* will be essential reading for trainee probation officers and students of probation and offender management.

Crime and Justice in Contemporary Japan Jianhong Liu, Setsuo Miyazawa, 2017-12-15 This book provides an important overview of key criminology and criminal justice concerns in Japan. It highlights similarities between the practice of criminology research in Japan, as well as important differences with other areas of Asia and with the West. In previous decades, Japan attracted international attention as the only industrialized country where the crime rate declined along with a rise in urbanization and economic development. Currently, Japan still enjoys a declining crime rate, the lowest among major industrialized countries, and a study

of criminal justice practices in Japan may provide important insights for other regions Japan also experiences important contemporary challenges which are shared by other regions 1 Japan has the highest proportion of people over the age of 60 in the world For criminology this means key challenges in the victimization of older people as well as the challenges of an ageing prison population 2 Besides the United States Japan is the only developed country that still practices capital punishment and its rate has been on the rise in the past 20 years 3 Japan has also introduced new reforms in its law practice including the introduction of new trial formats The research in this book provides a helpful overview for scholars interested in criminology and criminal justice in Japan to understand the key issues of concern and present a framework for future research needs It will be of interest to researchers in criminology and criminal justice international studies Asian Studies sociology and political science
