death from disease Decisions regarding elective and therapeutic management of cervical lymph node metastases are made mainly on clinical grounds as we cannot always predict cervical lymph node metastasis from the size and extent of invasion of the primary tumors Therefore the treatment of the neck disease in the management of SCCOC remains controversial The promise of using biomarker based treatment decisions has yet to be fully realized due to our poor understanding of the mechanisms of regional and distant metastases of SCCOC We will summarize the current status of investigations into SCCOC metastases and potential of these studies to impact basic research investigators and clinicians confronting SCCOC in the future *Clinical Lymphatic Mapping of Gynecologic Cancer* Charles Levenback,Ate G.J. van der Zee,Robert L.
