*Separating Parents and Adolescents* Helm Stierlin, 1981      *Child Survival* Nancy Scheper-Hughes, 2012-12-06 of older children adults and the family unit as a whole These moral evaluations are in turn influenced by such external contingencies as population demography social and economic factors subsistence strategies household composition and by cultural ideas concerning the nature of infancy and childhood definitions of personhood and beliefs about the soul and its immortality

**MOTHER LOVE AND CHILD DEATH** Of all the many factors that endanger the lives of young children by far the most difficult to examine with any degree of dispassionate objectivity is the quality of parenting Historians and social scientists no less than the public at large are influenced by old cultural myths about childhood innocence and mother love as well as their opposites The terrible power and significance attributed to maternal behavior in particular is a commonsense perception based on the observation that the human infant specialized as it is for prematurity and prolonged dependency simply cannot survive for very long without considerable maternal love and care The infant's life depends to a very great extent on the good will of others but most especially of course that of the mother Consequently it has been the fate of mothers throughout history to appear in strange and distorted forms They may appear as larger than life or as invisible as all powerful and destructive or as helpless and angelic Myths of the maternal instinct compete historically with myths of a universal infanticidal impulse

**Dealing with Resistance in Psychotherapy** Althea J. Horner,2005-07-14 Resistance is an unfortunate term for the manifestation of defense mechanisms in the treatment situation Use of the word to a psychoanalytically unsophisticated patient may evoke undesired consequences because to a patient it implies deliberate intent and thus blame From the patient s unconscious or at time conscious point of view these defenses protect the individual from a variety of intrapsychic or interpersonal dangers As long as these defenses are in play the process of exploration and discovery comes to a halt They must be understood and carefully analyzed for they are at the heart of the treatment impasse This book is written for the professional psychotherapist who may be puzzled why work with a particular patient or client is going nowhere It brings to the therapist s attention a wide variety of these defenses these resistances so that they can be addressed and resolved

**Insight and Imagination** Howard F. Stein,2007-06-15 Insight and Imagination explores the primacy of the self in organizational research consulting and management leadership Contesting the radical dichotomy between objective and subjective understanding and the devaluation of the latter Professor Howard F Stein argues that the imagination of the observer informed by his or her unconscious can lead to a greater

understanding of the psychological reality of the workplace and in turn to better informed problem solving Insight emerges from the disciplined use of the imagination rather than its repudiation The book brings countertransference to center stage as a tool for understanding the emotional experience of organizational life and for formulating interventions One often neglected use of the imagination is the capacity to not have to know beforehand what one needs to learn what poet John Keats called negative capability Insight and Imagination proposes the use of the humanities as a means of expanding and deepening one's access to the inner life of organizations The author draws from the art created by others and from his own poetry written and often used during an organizational consultation Among the specific contexts discussed in this book are the experience of organizational downsizing helping organizations to grieve after change and loss recognizing red herrings in organizational decision making the language of organizational change recognizing hidden agendas in meetings and reflective practice in organizational life

**Lost Childhoods** Gregory J. Jurkovic, 2014-06-17 Parentification the assumption of responsibility for the welfare of family members by children and adolescents is increasing as a result of various forces both inside and outside of the family Evidence suggests that pathological parentification of children has serious consequences for them and for succeeding generations as do other forms of maltreatment This work is an exploration of the forces at work in families with parentified children and the treatment strategies that hold the promise of interrupting a cycle of destructive behaviour The author begins by guiding the reader from conceptualization to possible causes and manifestations of parentification facilitating a clear understanding of how and why this scenario is common The second part of the book builds on this foundation to introduce methods of assessment treatment and prevention This part of the text includes insights into the professional ethical and personal challenges faced by therapists who themselves have a history of pathological parentification
