Dahlman, 2011-02-16 *Bosnia Remade* is an authoritative account of ethnic cleansing and its partial undoing from the onset of the 1990s Bosnian wars up through the present Gerard Toal and Carl Dahlman combine a bird's eye view of the entire war from onset to aftermath with a micro level account of three towns that underwent ethnic cleansing and later the return of refugees There have been two major attempts to remake the ethnic geography of Bosnia since 1991 In the first instance ascendant ethno nationalist forces tried to eradicate the mixed ethnic geographies of Bosnia's towns villages and communities These forces devastated tens of thousands of homes and lives but they failed to destroy Bosnia Herzegovina as a polity In the second attempt which followed the war the international community in league with Bosnian officials endeavored to reverse the demographic and other consequences of this ethnic cleansing While progress has been uneven this latter effort has transformed the ethnic demography of Bosnia and moved the nation beyond its recent segregationist past By showing how ethnic cleansing was challenged *Bosnia Remade* offers more than just a comprehensive narrative of Europe's worst political crisis of the past two decades It also offers lessons for addressing an enduring global problem **The Collected Works of Eric Voegelin,**

The Milošević Trial Timothy William Waters, 2015 The international trial of Slobodan Milosevic who presided over the violent collapse of Yugoslavia was already among the longest war crimes trials when Milosevic died in 2006 Yet precisely because it ended without judgment its significance and legacy are specially contested The contributors to this volume including trial participants area specialists and international law scholars bring a variety of perspectives as they examine the meaning of the trial's termination and its implications for post conflict justice The book's approach is intensively cross disciplinary weighing the implications for law politics and society that modern war crimes trials create **Ideas for the Philosophy of the History of Mankind** Johann Gottfried Herder, 2024-02-27 One of the most important works of the Enlightenment in the first new unabridged English translation in more than two centuries Published in four volumes between 1784 and 1791 Herder's *Ideas for the Philosophy of the History of Mankind* is one of the most important works of the

Enlightenment a bold original and encyclopedic synthesis of and contribution to the era's philosophical debates over nature history culture and the very meaning of human experience This is the first new unabridged English translation of the Ideas in more than two centuries Gregory Martin Moore's lively modern English text extensive introduction and commentary bring this neglected masterpiece back to life The Ideas which engages with many of the leading thinkers of the eighteenth century such as Montesquieu Kant Gibbon Ferguson Buffon and Rousseau is many things at once an inquiry into the unity and purpose of history a reflection on human nature and the place of humans in the cosmic order an examination of what was beginning to be called culture and a narrative of cultural progress across time among different peoples Along the way Herder considers a dizzying variety of topics including the formation of the earth and solar system species change race the immortality of the soul the establishment of society and the pursuit of happiness Above all the Ideas is an anthropology what Alexander Pope had termed an essay on man pervaded by an appropriately humane spirit A fresh and much needed modern translation of the complete Ideas this volume reintroduces English readers to a classic of Enlightenment thought

History of Political Ideas Eric Voegelin, 1998 Annotation Examining the emergence of modernity within the philosophical and political debates of the sixteenth century Religion and the Rise of Modernity resumes the analysis of the great confusion introduced in Volume IV of History of Political Ideas Encompassing a vast range of events ignited by Luther's Ninety Five Theses this period is one of controversy revolution and partiality Despite the era's fragmentation and complexity Voegelin's insightful analysis clarifies its significance and suggests the lines of change converging at a point in the future the medieval Christian understanding of a divinely created closed cosmos was being replaced by a distinctly modern form of human consciousness that posits man as the proper origin of meaning in the universe Analyzing the most significant features of the great confusion Voegelin examines a vast range of thought and issues of the age From the more obvious thinkers to those less frequently studied this volume features such figures as Calvin Althusius Hooker Bracciolini Savonarola Copernicus Tycho de Brahe and Giordano Bruno Devoting a considerable amount of attention to Jean Bodin Voegelin presents him as a prophet of a new true religion amid the civilizational disorder of the post Christian era Focusing on such traditional themes as monarchy just war theory and the philosophy of law this volume also investigates issues within astrology cosmology and mathematics Religion and the Rise of Modernity is a valuable work of scholarship not only because of its treatment of individual thinkers and doctrines influential in the sixteenth century and beyond but also because of its close examination of those experiences that formed the modern outlook

New Political Ideas in the Aftermath of the Great War Alessandro Salvador, Anders G. Kjølseth, 2016-11-10 This edited collection presents new research on how the Great War and its aftermath shaped political thought in the interwar period across Europe Assessing the major players of the war as well as

more peripheral cases the contributors challenge previous interpretations of the relationship between veterans and fascism and provide new perspectives on how veterans tried to promote a new political and social order Those who had frontline experience of the First World War committed themselves to constructing a new political and social order in war torn Europe shaped by their experience of the war and its aftermath A number of them gave voice to the need for a world order free from political and social conflict and all over Europe veterans imagined a third way between capitalist liberalism and state controlled socialism By doing so many of them moved towards emerging fascist movements and became in some case unwillingly the heralds of totalitarian dictatorships

Hannah Arendt and the Uses of History Richard H. King, Dan Stone, 2008-09 Hannah Arendt first argued the continuities between the age of European imperialism and the age of fascism in Europe in *The Origins of Totalitarianism* This text uses Arendt's insights as a starting point for further investigations into the ways in which race imperialism slavery and genocide are linked
