Hamada,2017-05-26 This book covers the entire Nile Basin and reflects the latest findings It provides unique and cutting edge insights into the region s agriculture water resources governance poverty productivity upstream downstream linkages innovations future plans and their implications Many international summits and conferences have declared that there is an urgent need to save agriculture from its demise Most international agencies now recognize that something must be done but what Beyond policy changes the restructuring of global governance and institutional reforms are called for Commitments must be translated into concrete actions leading to a renewed interest in agriculture and a return to the basic objective of achieving food security      Mapping Wildfire Hazards and Risks R Neil Sampson,R. Dwight Atkinson,Joe W. Lewis,2000-10-10 Develop accurate computer models to determine wildfire risks and controlled burn benefits Although scientists now recognize that fire is essential to many ecosystems the ecological and political issues of managing wildfire continue to be vexing Mapping Wildfire Hazards and Risks offers multiple perspectives on using a Geographic Information System GIS for more effective wildfire management This innovative technology is the ideal tool to organize and display all the information available so authorities can make informed judgments based on all the facts Because the authors are not merely

theorizing but discussing the GIS they are actually building and using Mapping Wildfire Hazards and Risks offers practical ideas and perspectives including specific information on the modeling approach and kinds of data utilized valuable discussions of the social and environmental factors included in the model techniques for predicting the effects of wildfire on neighborhoods soil erosion sedimentation and air quality predictions of long term ecosystem recovery given wildfires of different sizes and intensities maps charts tables and formulas to make the process of building a GIS understandable and accessible Mapping Wildfire Hazards and Risks is a compilation of the ideas of federal and state agencies universities and non governmental organizations on how to rank and prioritize forested watershed areas that are in need of prescribed fire This book provides the essential information for deciding how to set priorities for wildfire management that might reduce risks or lower future damages
