Serology Of Conglutination Its Relatio:

The Serology of Conglutination and its Relation to Disease R.R.A. Coombs, Anne M. Coombs, D.G. Ingram, 1961

Pathology of Simian Primates, Part 2 R. N. Fiennes, 1972-04-24 **Basic Immunology** E. R. Gold, D. B.

Peacock, 2014-05-12 Basic Immunology focuses on substances that take part in serological reactions including antigens antibodies and the physicochemical nature of immunological reactions The selection first elaborates on the basic notions of immunity antigens immunoglobulins and the production of antibody Discussions focus on factors which increase the immune response production of antibody biological properties of immunoglobulins evolution and control of immunoglobulin structure antigenicity specific immunity and resistance The text then takes a look at the complement system antigen antibody reactions and immediate hypersensitivity The book ponders on cell mediated immunity and delayed hypersensitivity transplantation immunology and tumor immunology Topics include production of immunity to neoplasms immunological aspects of carcinogenesis and growth of established tumors immunotherapy for experimental neoplasms donor selection in human organ transplantation elicitation of delayed hypersensitivity and the role of humoral factors in the transfer of delayed hypersensitivity The selection is a valuable reference for medicine students and researchers interested in basic immunology

Illustrated Dictionary of Immunology Julius M. Cruse, Robert E. Lewis, 2009-04-20 From the beginning immunologists have maintained a unique nomenclature that has often mystified and even baffled their colleagues in other fields causing them to liken immunology to a black box With more than 1200 illustrations the Illustrated Dictionary of Immunology Third Edition provides immunologists and nonimmunologists a single volume resource for the many terms encountered in contemporary immunological literature Encyclopedic in scope and including more than 1200 illustrations the content ranges from photographs of historical figures to molecular structures of recently characterized cytokines the major histocompatibility complex molecules immunoglobulins and molecules of related interest to immunologists These descriptive illustrations provide a concise and thorough understanding of the subject To reflect modern advances the third edition includes entries on immunopharmacology newly described interleukins comparative immunology immunity to infectious diseases and expanded definitions in all of the immunological subspecialties Providing unprecedented breadth and detail this readily accessible book is not only a pictorial reference but also a primary resource Volume 4 Immunopathology Noel Rose, 2013-06-29 This comprehensive treatise on the reticuloendothelial system is a project jointly shared by individual members of the Reticuloendothelial RE Society and bio medical scientists in general who are interested in the intricate system of cells and molecular moieties derived from these cells which constitute the RES It may now be more fashionable in some quarters to consider these cells as part of what is called the mononuclear phagocytic system or the lymphoreticular system Nevertheless because of historical developments and current interest in the subject by investigators from many diverse areas it seems advantageous to present in one comprehensive treatise current information and knowledge con

cerning basic aspects of the RES such as morphology biochemistry phylogeny and ontogeny physiology and pharmacology as well as clinical areas including immunopathology cancer infectious diseases allergy and hypersensitivity It is anticipated that by presenting information concerning these apparently heterogeneous topics under the unifying umbrella of the RES attention will be focused on the similarities as well as interactions among the cell types constituting the RES from the viewpoint of various disciplines The treatise editors and their editorial board consisting predominantly of the editors of individual volumes are extremely grateful for the enthusiastic cooperation and enormous task undertaken by members of the biomedical community in general and especially by members of the American as well as European and Japanese Reticuloendothelial Societies

Atlas of Immunology Julius M. Cruse, Robert E. Lewis, 2013-03-14 The Atlas of Immunology is a unique pictorial reference containing more than 1000 illustrations depicting essentially every concept of importance in understanding immunology Diagrams are included for all levels of understanding there are some showing basic ideas and others providing a more detailed treatment for specialists Illustrations in the Atlas range from photographs of historical figures to molecular structures of recently characterised cytokines major histocompatibility complex molecules immunoglobulins and molecules of related interest to immunologists No other book offers the breadth or detail of illustrated immunological concepts

National Library of Medicine Catalog National Library of Medicine (U.S.), 1966

Clinical Aspects of Immunology P. G. H. Gell, Robin Royston Amos Coombs, 1963

Current List of Medical Literature, 1958 Includes section Recent book acquisitions varies Recent United States publications formerly published separately by the U S Army Medical Library
