Serpentine Futures:

Placing the Future Johannes Glückler, Matthias Garschagen, Robert Panitz, 2025-06-07 This open access book offers a fresh perspective on the uncertainties of the future that humanity faces. Leading scholars from the fields of future studies, planning, geography, history, sociology, design, and the humanities sensitize for the intricate role of geography in building knowledge to anticipate, probable to imagine alternative and to enact desirable futures. Part I, knowing the future, explores strategies for anticipating possible futures such as foresight methods, scenarios, and guiding images. This section underscores the importance of cultivating future consciousness to confront societal denial of looming threats like environmental crises. Part II, envisioning the future, delves into various ways societies imagine their futures, exploring topics like the future of food, post-growth economies, extra-terrestrial futures, and even human self-extinction to reveal how futurist scenarios can inform decision making and proactive planning. Part III, enacting the future, focuses on the performative aspects of futuring. The authors in this section examine practices such as designing, performing, advising, and governing that are aimed at transforming desired futures into present realities. As part of a series on the interdisciplinary nexus between knowledge and space, this book is an essential resource for researchers, policy makers, planners, students, and practitioners in the fields of sustainability, future studies, regional development, and governance.
