Critical History Bregham Dalglish, 2017-08-22 This book presents the first sustained articulation of a Foucauldian *oeuvre*. It situates Foucault's critique within the tradition of Kant's call for a philosophical archaeology of reason in parallel. It demonstrates the priority in Foucault's thought of Nietzsche over Heidegger and the framing of reason against an ontology of power. Bregham Dalglish hereby claims that at the heart of the Foucauldian *oeuvre* is the philosophical method of critical history. Its task is to make the will to know that drives thought conscious of itself as a problem especially the regimes of truth that define our governmentalities. By revealing the contingency of their constituent parts of knowledge, power, and ethics, Dalglish demonstrates that critical history offers an alternative mode of critique to the hitherto singular reading of the intellectual heritage of enlightenment while it fosters an agonistic concept of freedom in respect of our putatively necessary limits. *Oxford Studies in Normative Ethics, Volume 2*

Mark Timmons, 2012-12-06 *Oxford Studies in Normative Ethics* is an annual forum for new work in normative ethical theory. Leading philosophers present original contributions to our understanding of a wide range of moral issues and positions from analysis of competing approaches to normative ethics including moral realism, constructivism, and expressivism to questions of how we should act and live well. OSNE will be an essential resource for scholars and students working in moral philosophy. **Progress and Regress in Philosophy. Vol. 2**

L. Nelson, 1971 **History of Physiology** E. Schultheisz, 2013-10-22 *Advances in Physiological Sciences Volume 21 History of Physiology* covers the proceedings of the symposia of the 28th Congress of Physiology. Comprised of nine chapters, the book reviews the history of physiological studies. The first chapter discusses the beginnings of quantitative thinking in medicine while the second chapter tackles the relation of clinical to non-clinical medicine according to Thomas Sydenham. The next chapter reviews the history of comparative physiology and Chapter 4 discusses the historical development of cognitive psychophysiology. Chapter 5 deals with the study on the medical heritage of Avicenna and Chapter 6 talks about studies on the anatomy and physiology of the pig fetus and placenta. The seventh chapter tackles physiological concepts in ancient and medieval India while the eighth chapter discusses Jan Nepomuk Czermak in Hungary. The last chapter presents A Short Summation of Physiology, the first book of physiology in Hungarian. Readers who have an interest in the history of medical studies will find the book appealing since it focuses on the historical aspect rather than the technical aspect.

Contemporary Authors CONTEMPORARY., 1981 *Continental Philosophy* Andrew Cutrofello, 2005 *Continental Philosophy: A Contemporary Introduction* looks at the development of the tradition tracing it back from Kant to the present day. *Sciences and Cultures* E. Mendelsohn, Y. Elkana, 2012-12-06 Anthropological approaches to the sciences have developed as part of a broader tradition concerned about the place of the sciences in today's world and in some basic sense concerned with questions about the legitimacy of the sciences. In the years since the second World War we have seen the emergence of a number of different attempts both to analyze and to cope with the successes of the sciences, their broad penetration into social life, and the sense of problem and crisis that they have projected. Among the movements concerned

about the earlier responses were the development social responsibility of scientists and technological practitioners There is little doubt that this was a direct outgrowth of the role of science in the war epitomized by the successful construction and catastrophic use of the atomic bomb The recognition of the deep social utility of science and especially its role as an instrument of war fostered curiosity about the earlier development of scientific disciplines and institutional forms The history of science as an explicit discipline with full time practitioners can be seen as an attempt to locate science in temporal space first in its intellectual form and secondly in its institutional or social form The sociology of science while certainly having roots in the pre war work of Robert K

Contemporary Issues in Islam and Science Muzaffar Iqbal,2017-05-15 The articles selected for this volume explore emergent issues in the contemporary relationship between Islam and science and present studies of eight major voices in the discourse Also included is a section on the operationalization of Islamic science in the modern world and a section on studies in traditional Islamic cosmology

A System of Natural Philosophy Thomas Rutherford,1748

The Retreat of Representation Martha B. Helfer,1996-03-28 The Retreat of Representation is the first book length study to examine the radical new notion of Darstellung in its own discursive context Martha Helfer traces the term's genealogy from its inception in Kant's Critiques through Fichte's definition of the subject as Darstellung to the poetic theory and praxis of the Jena Romantics She argues that the conceptually powerful yet tremendously problematic figure of the negative Darstellung of the Kantian sublime opens up the possibility of a poetization of the philosophical discourse of transcendental idealism and ultimately demonstrates that Kleist's oeuvre constitutes a critique of transcendental theories of Darstellung Helfer provides remarkably clear concise readings of major texts of Idealism and Romanticism in light of the Darstellung problematic advancing compelling interpretations of Novalis's Hymns to the Night as a theory of the Romantic lyric Kleist's essay On the Marionette Theater as a redaction and revision of the Kantian sublime The Foundling as a critique of Fichtean ego philosophy and The Broken Jug as a prototype of Heideggerian and post Heideggerian critiques of representation

Routledge Library Editions: Historiography Various,2021-06-23 The greatest problem in historical scholarship theoretically and practically is the relation between historians and their subject matter The past is gone and historians can only study its remnants On what basis do scholars select certain facts from the mass of data left from the past How do they explain the interrelationship of the facts they select What criteria do they use to evaluate their subject The 35 volumes in this set originally published between 1926 and 1990 discuss and answer these essential questions faced by historians The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture Both historiography and historical thinking advanced as never before The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought One consequence was extensive organisation and professionalization of research which the volumes in this set reflect

Was Ludwig von Mises a Conventionalist? Alexander Linsbichler,2017-06-08 This book presents a concise

introduction to the epistemology and methodology of the Austrian School of economics as defended by Ludwig von Mises The author provides an innovative interpretation of Mises arguments in favour of the a priori truth of praxeology the received view of which contributed to the academic marginalisation of the Austrian School The study puts forward a unique argument that Mises perhaps unintentionally defends a form of conventionalism Chapters in the book include detailed discussions of individualism historicism epistemological positions and essentialism The author goes on to discuss Mises justification of the fundamental axiom and proposes a conventionalist interpretation By presenting praxeology as a conventionalist research programme the author aims to reinvigorate the interaction between the Austrian School mainstream economics and the philosophy of science This comprehensive reconstruction is suitable for economists interested in the history and philosophy of their discipline as well as for philosophers of science

The Philosophy of the Novel J. M. Bernstein, 1984
Luk cs s Theory of the novel has long been a key work in the philosophy but not the sociology of literature J M Bernstein shows that Theory of the Novel must be seen in conjunction with History and Class Consciousness as a major contribution to a Marxist hermeneutics He ties the philosophy of Luk cs to Kant Hegel and Marx and contends that the categories structuring the novel are the central concepts of Kant s philosophy and that therefore the novel is marked by the same antinomies that infect Kant s system Bernstein offers

a concise account of dialectical theory and a telling analysis of Western Hegelian Marxism He concludes with a critique of contemporary literary and critical practices practices which only reinforce the antimonies already present in the novel From cover
