**Neuropeptides and Brain Function** ,2011-09-22 *Neuropeptides and Brain Function*     The Prefrontal Cortex: Its Structure, Function and Pathology J.P.C. de Bruin,M.A. Corner,M.G.P. Feenstra,C.G. Van Eden,H.B.M. Uylings,1991-03-05  
Thanks to a resurgence of interest and a recent proliferation of research techniques much new and illuminating data has emerged during the last decade relating to the prefrontal cortex particularly in primates and rodents In view of this progress the 16th International Summer School of Brain Research was held in Amsterdam The Netherlands from 28 August to 1 September 1989 devoted to the topic of The Prefrontal Cortex Its Structure Function and Pathology The edited proceedings embodied in this 85th volume of Progress in Brain Research fall into three sections the first of which following two introductory chapters discusses the present knowledge of the organization of prefrontal cortical systems In the second section developmental and plasticity aspects in rodent and human cortex are considered whilst the third section deals extensively with the functional aspects characteristic for the prefrontal cortex in primates rats and rabbits The last section reviews several topics on dysfunction of prefrontal cortex in rat and man including a historical review on psychosurgery

*Transduction and Cellular Mechanism in Sensory Receptors* ,2011-09-22 *Transduction and Cellular Mechanism in Sensory Receptors*     **Molecular Mechanisms of Neuronal Responsiveness** Yigal H. Ehrlich,Robert H. Lenox,Elizabeth Kornecki,William O. Berry,2013-03-13 The interaction of neurotransmitters neuromodulators and neuroactive drugs with receptors localized at the cell surface initiates a chain of molecular events leading to integrated neuronal responses to the triggering stimuli Major advancements in the characterization and isolation of receptor molecules have answered many questions regarding the nature of the elements that determine the specificity in these interactions At the same time recent studies have provided evidence that delicate regulation by intracellular enzymatic systems determines the efficiency of the stimulus response coupling process mediates the interaction between receptors operates in feedback control mechanisms and transduces signals from the receptors to various effector sites in a highly coordinated fashion These studies are at the focus of the present volume which is an outcome of a symposium held at the University of Vermont College of Medicine on March 21 23 1986 in conjunction with the seventeenth annual meeting of the American Society for Neurochemistry The symposium has demonstrated clearly that the concerted efforts of investigators in neurophysiology biochemistry pharmacology cell biology molecular genetics neurology and psychiatry are required to achieve better understanding of the processes underlying neuronal responsiveness This volume includes contributions provided by prominent investigators in all these research areas We hope that the readers will find here a useful source of information and ideas for stimulating further studies which may serve to narrow the gap between basic neuroscience research and its clinical implications

*Vestibulospinal Control of Posture and Locomotion* ,1988-10-01 This volume publishes the review articles presented by

the invited speakers at the Satellite Meeting to the Barany Society Meeting held in Bologna Italy during June 1987 The subject matter in this book is divided into seven main sections The first three present basic neuroanatomical and neurophysiological aspects of vestibulospinal reflexes and document the neck afferent and visual influences on these reflexes The following sections deal with the control of locomotion posture and eye head trunk coordination by vestibulospinal signals The final section provides current knowledge on the processes underlying compensation of vestibulospinal deficits An overall review precedes each main section so that the reader is informed as to which questions are still controversial and require further investigation In this way a basis is provided for those needing a current account of the field of vestibulospinal reflexes Due to the extensive length of the contents only the number of articles presented per session is listed below

**Transplantation Into the Mammalian CNS** Don M. Gash, John R. Sladek, 1988 Transplantation into the Mammalian CNS presents a comprehensive critical overview of recent advances of basic and clinical research in neural transplantation Special emphasis is devoted to the emerging studies on the use of clinical grafts for the treatment of parkinsonism the extension of this technology to additional models of neurological deficits the immunobiology of neural implants the exploration of trophic factors and other new directions in the field of transplantation Due to the extensive list of contents only content headings are given Full details can be obtained from the Publisher upon request *Afferent Control of Posture and Locomotion*, 1990-02-28 *Afferent Control of Posture and Locomotion* **Aging of the Brain and Alzheimer's Disease**, 2011-09-22 *Aging of the Brain and Alzheimer's Disease* *Abstracts of the Fifth Meeting of the Brain Research Association* Brain Research Association (Great Britain).
