Progress in Drug Research is a prestigious book series which provides extensive expert written reviews on a wide spectrum of highly topical areas in current pharmaceutical and pharmacological research It serves as an important source of information for researchers concerned with drug research and all those who need to keep abreast of the many recent developments in the quest for new and better medicines *Progress in Drug Research* JUCKER,2013-03-07 **Progress in drug research. 49.1997** Ernst Jucker,1997 From the contents A C Brater and M D Murray The effects of NSAIDs on the kidney A G Edwards and A H Weston Latest developments in potassium channel modulator drugs A M R Juchau and Y Huang Chemical teratogenesis in humans Biochemical and molecular mechanisms A S P Gupta Studies on cardiovascular drugs A G Polak Antifungal chemotherapy An everlasting battle A O Valdenaire New insights into the bioamine receptor family

Progress in drug research. 47.1996 Ernst Jucker,1996-10 Volume 47 of Progress in Drug Research contains eight reviews and the various indexes which facilitate its use and establish the connection with the previous volumes The articles in this volume deal with inotropic steroids with chemokines and their involvement in a wide range of inflammatory diseases with the subclassification and nomenclature of α_1 and α_2 adrenoceptors with Chinese traditional medicine with drug targets in the molecular pathogenesis of asthma with cytokines and their therapeutic application in immunosuppression and immunostimulation with alter native medicine and with the potential use of calcium blockers in psychiatry These reviews and the quotations of original articles provide the reader with valuable information on several new developments in the world wide search for new and better medicines In 1959 when the Editor started this series of monographs it was his intention to help disseminate information on the vast and fast growing domain of drug research Already at that time it was not possible to follow the major individual publications in this field and the reader was thereby provided with a tool to keep abreast of the latest developments and trends This goal remained unchanged over the last 37 years and I believe that the reviews in PDR are useful to the non specialist who can obtain an overview of a particular field of drug research in a relatively short time
