Botharel, 2013-03-09 This and its companion Volumes 4 and 6 document the proceedings of the 5th International Symposium on Surfactants in Solution held in Bordeaux France July 9 13 1984 This symposium was the continuation of the series of symposia initiated in 1976 in Albany New York under the title Micellization Solubilization and Microemulsions The next two symposia were

labelled Solution Chemistry of Surfactants and Solution Behavior of Surfactants Theoretical and Applied Aspects held in Knoxville TN in 1978 and Potsdam N Y in 1980 respectively In 1982 at the time of the 4th Symposium in this series it became amply evident that there was a definite need to have more a generic title to describe these biennial events and after much deliberation it was decided that an appropriate title would be Surfactants in Solution as both the aggregation and adsorption aspects of surfactants were addressed So the 4th Symposium was held in 1982 in Lund Sweden under this new rubric and it was decided to continue these symposia in the future under this appellation Naturally the Bordeaux Symposium was dubbed as the 5th International Symposium on Surfactants in Solution and our logo became SIS which is very apropos and appealing It was in Bordeaux that the decision was made to hold the 6th SIS Symposium in New Delhi and it is scheduled for August 18 22 1986 in the capital of India

Interfacial Transport Processes and Rheology Howard Brenner, 2013-10-22 This textbook is designed to provide the theory methods of measurement and principal applications of the expanding field of interfacial hydrodynamics It is intended to serve the research needs of both academic and industrial scientists including chemical or mechanical engineers material and surface scientists physical chemists chemical and biophysicists rheologists physiochemical hydrodynamicists and applied mathematicians especially those with interests in viscous fluid mechanics and continuum mechanics As a textbook it provides materials for a one or two semester graduate level course in interfacial transport processes It may also be noted that while separate practical and theoretical subdivisions of material have been introduced a kind of cross emphasis is often stressed i to the academic scientist or the importance of understanding major applications of interfacial transport and ii to the industrial scientist of the importance of understanding the underlying theory
