**Progress in Communication Sciences, Volume 6** Brenda Dervin, 1985      **Theory, Method, and Practice in Computer Content Analysis** Mark D. West, 2001-04-30 In recent years computer content analysis has undergone something of a renaissance Inexpensive and powerful desktop computers mean that computer analysis of texts is available to most researchers The availability of software to do analyses however is not always linked to clear theoretical and methodological understandings This volume seeks to deal with this concern by providing from scholars in a variety of disciplines perspectives upon the theoretical and methodological issues which arise when conducting content analysis via computer Although it is not always obvious computer content analysis is a method which inevitably calls for theoretical assumptions Those theoretical assumptions in turn drive methodological considerations and method in turn determines the form of the practice of computer content analysis This volume includes ten articles by well known scholars utilizing computer content analysis A variety of methodological theoretical and practical issues are here addressed presenting unique methods and perspectives for the consideration of computer content analysis Intended for an audience of graduate students scholars and in field practitioners Theory Method and Practice of Computer Content Analysis will serve as an invaluable resource of ideas and practices for those interested in using computers to analyze textual material      Progress in Communication Sciences , 1993

**Communication Yearbook 16** Stanley Deetz, 2012-05-23 The Communication Yearbook 16 focuses on the study of communication within corporate organizations Part II explores the role of communication studies in such timely issues as communication technology globalization and multiculturalism The final section focuses on three theoretical debates in which contributors discuss communication during initial interaction the motivation to communicate and communication in decision making and problem solving groups Commentaries on each chapter provide alternative perspectives extend issues of significance and help engage the reader in the contemporary debates in each area      **Communication Yearbook 12** James A. Anderson, 2012-03-22 First published in 2012 Routledge is an imprint of Taylor Francis an informa company      Theories of Communication Networks Peter R. Monge, Noshir Contractor, 2003-03-27 To date most network research contains one or more of five major problems First it tends to be atheoretical ignoring the various social theories that contain network implications Second it explores single levels of analysis rather than the multiple levels out of which most networks are comprised Third network analysis has employed very little the insights from contemporary complex systems analysis and computer simulations Forth it typically uses descriptive rather than inferential statistics thus robbing it of the ability to make claims about the larger universe of networks Finally almost all the research is static and cross sectional rather than dynamic Theories of Communication Networks presents solutions to all five problems The authors develop a multitheoretical model that relates different social science theories with different network properties This model is multilevel providing a network decomposition that applies the various social theories to all network levels individuals dyads triples groups and the

entire network The book then establishes a model from the perspective of complex adaptive systems and demonstrates how to use Blanche an agent based network computer simulation environment to generate and test network theories and hypotheses It presents recent developments in network statistical analysis the p family which provides a basis for valid multilevel statistical inferences regarding networks Finally it shows how to relate communication networks to other networks thus providing the basis in conjunction with computer simulations to study the emergence of dynamic organizational networks
