**On Beyond Uranium** Sigurd Hofmann, 2018-10-08 In the early nineteenth century chemists knew of the existence of ninety two chemical elements from Hydrogen to Uranium For nearly forty years scientists thought they knew the content of our planet and all of its contents In the late 1930s the world of chemical science began to discover elements beyond Uranium the transuranics These new super heavy elements are probably not found in nature at all but can be detected if only for a few fractions of a second in precisely designed experiments using powerful nuclear tools On Beyond Uranium Journey to the End of the Periodic Table is full of exciting new concepts and tells the story of the author s quest to discover elements never before known to man
