international security      Nuclear Weapons and Contemporary International Law Edward McWhinney, Nagendra Singh, 2024-09-02      **The Authority of International Law** Başak Cali, 2015 The question of the authority of international law over domestic authorities and the duties of state officials to international law are fundamental concerns in international legal theory and practice The Authority of International Law Obedience Respect and Rebuttal addresses these concerns by reframing the present accounts of authority in international law construing its authority as imposing three different layers of duties on domestic officials the duty to obey the duty to respect and the duty to rebut The book provides an original interpretation of this authority one that is not tied to prior state consent or domestic constitutional frameworks It offers a nuanced account arguing that whether or not international law is obeyed within any given situation depends on the type of duty it imposes on the state and that duty's normative force There is no strict framework in which international law always trumps domestic law or vice versa Instead Cali presents a realistic account of when international law has absolute authority and when it can afford a margin of appreciation to states The Authority of International Law contributes to existing debates by considering the gap between consent based jurisprudential theories of authority and self interest and identity based theories of compliance and by considering monism dualism and normative pluralism as theories for addressing authority competition between domestic legal orders and international law      **Nuclear Weapons under International Law** Gro Nystuen, Stuart Casey-Maslen, Annie Golden Bersagel, 2014-08-28 Nuclear Weapons under International Law is a comprehensive treatment of nuclear weapons under key international law regimes It critically reviews international law governing nuclear weapons with regard to the inter state use of force international humanitarian law human rights law disarmament law and environmental law and discusses where relevant the International Court of Justice's 1996 Advisory Opinion Unique in its approach it draws upon contributions from expert legal scholars and international law practitioners who have worked with conventional and non conventional arms control and disarmament issues As a result this book embraces academic consideration of legal questions within the context of broader political debates about the status of nuclear weapons under international law      *The Law of Armed Conflict and the Use of Force* Frauke Lachenmann, Rüdiger Wolfrum, 2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law      **International Law for Humankind** Antônio Augusto Cançado Trindade, 2013-06-17 This volume is an updated and revised version of the General Course on Public International Law delivered by the Author at The Hague Academy of International Law in 2005 Professor Cançado Trindade Doctor honoris causa of seven Latin American Universities in distinct countries was for many years Judge of the Inter American Court of Human Rights and President of that Court for half a decade 1999 2004 He is currently Judge of the International Court of Justice he is also Member of the Curatorium of The Hague Academy of International Law as well as of the Institut de Droit International and of the Brazilian Academy of Juridical

Letters      *Pakistan and International Law* Ahmad Ghouri, 2025-10-23 *Pakistan and International Law* Dynamics of Identity and State Practice offers a pioneering exploration of Pakistan's evolving relationship with international law. Framed through the lens of state identity, this volume critically examines how Pakistan, as a post-colonial and Muslim majority state, has engaged with, adapted to, and influenced international legal norms across diverse domains from the United Nations system to individual rights and environmental protection, interstate arbitration, right to development, security, water, taxation, and more. The book features contributions from leading scholars and practitioners combining doctrinal analysis with critical perspectives rooted in Third World Approaches to International Law. It provides in-depth commentary on Pakistan's legislative, judicial, and diplomatic practices, offering a rare state-specific study that fills a significant gap in international legal scholarship. Readers will gain a nuanced understanding of Pakistan's legal landscape and its broader implications for global justice, legal pluralism, transnational legal discourses in international law, and the future of international law. It offers valuable insights into how international law operates in diverse cultural and political contexts and how state identity shapes and is shaped by global legal norms. The work will be of interest to academics, legal practitioners, policymakers, and students of international law, post-colonial legal studies, Islamic state practices, and South Asian geopolitics.

*The Treaty on the Prohibition of Nuclear Weapons* Jonathan L. Black-Branch, 2021-05-20 *The Treaty on the Prohibition of Nuclear Weapons* 2017 sets out to challenge deterrence policies and military defence doctrines, taking a humanitarian approach intended to disrupt the nuclear status quo. States with nuclear weapons oppose its very existence, neither participating in its development nor adopting its final text. Civil society groups seem determined, however, to stigmatize and delegitimize nuclear weapons towards their abolition. This book analyzes how the Treaty influences the international security architecture, examining legal, institutional, and diplomatic implications of the Treaty and exploring its real and potential impact for both states acceding to the Treaty and those opposing it. It concludes with practical recommendations for international lawyers and policymakers regarding non-proliferation and disarmament matters, ultimately noting that nuclear weapons threaten peace and everyone should have the right to nuclear peace and freedom from nuclear fear.

International Law Carlos Iván Fuentes, 2016-09-02 This book provides a theoretical framework for explaining the choices made by international decision makers in terms of what constitutes law It comprehensively analyzes the practice of human rights courts in applying legal instruments outside their competence and proposes that this practice recognizes that different normative instruments coexist in an un ordered space and that meaning can be produced by the free interaction of those instruments around a problem Based on this the book advances its normative plurality hypothesis which states that decision makers must survey the acquis of international law in order to identify all the instruments containing relevant normative information for a particular situation The set of rules of law applicable to the situation must then be complemented with other instruments containing specific normative information relevant to the situation resulting in a complete system of norms advancing a common purpose
