Project Cyclops Thomas Hoover, 2010 The Aegean ex agent Michael Vance pilots the Odyssey II a handmade replica A Russian gunship with Arab terrorists takes a tiny island where a U S corporation has a laser space facility The renegades convert the launch vehicle into a ballistic missile that can deliver their stolen nuclear warhead Searching for Extraterrestrial Intelligence H. Paul Shuch, 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led and continue to lead the scientific quest known as SETI the search for extraterrestrial intelligence Divided into three parts the first section The Spirit of SETI Past written by the surviving pioneers of this then emerging discipline reviews the major projects undertaken during the first 50 years of SETI science and the results of that research In the second section The Spirit of SETI Present the present day science and technology is discussed in detail providing the technical background to contemporary SETI instruments experiments and analytical techniques including the processing of the received signals to extract potential alien communications In the third and final section The Spirit of SETI Future the book looks ahead to the possible directions that SETI will take in the next 50 years addressing such important topics as interstellar message construction the risks and assumptions of interstellar communications when we might make contact what aliens might look like and what is likely to happen in the aftermath of such a contact Project Cyclops Bernard M. Whitehouse takes us on a journey through the evolving cosmos as he considers humankind's place in the universe and how our survival depends on otherworldly perspectives. From the Earth to the depths of outer space, this inspiring book shows how human evolution has been intertwined with the workings of the cosmos from the very beginning and what the far distant future may hold both for the universe and for ourselves. Given enough time, Whitehouse contends, we must communicate with intelligent aliens whose divergent perspective will transform our understanding of the universe. First contact may even come sooner than we think. We have already transmitted signals towards promising exoplanets. If, say, Gliese 581d harbours life, the return signal could reach us in 2051. Drawing the thread of human consciousness from the cave to the cosmos, the acclaimed author of *Apollo 11: The Inside Story* charts our future journey to the end of space and time and considers whether something of humanity could remain at the end of it all.

Waiting for Contact Lawrence Squeri, 2016-08-31

A cogent, engaging history of humanity's most ambitious quest seeking outward for other minds. David Brin, author of *Existence*: A fascinating perspective on humankind's obsession for knowing if there is anyone else out there. Gerrit L. Verschuur, author of *The Invisible Universe: The Story of Radio Astronomy*. Squeri has written what will likely be the definitive history of the early days of SETI that includes profiles of some of its leading characters. Ben Zuckerman, coeditor of *Extraterrestrials: Where Are They?* An insightful history that explores the scientific foundations of the modern-day search for our place in the cosmos. *Waiting for Contact* delivers unparalleled access to the inner history of SETI and invites us to ride along on the journey to answer one of science's ultimate questions: Are we alone? Douglas Vakoch, president METI International. *Waiting for Contact* is a balanced account telling the tale of the search for extraterrestrial intelligence without the overpromise usually trumpeted by enthusiastic proponents and the hyperventilation so commonly added by UFO enthusiasts. If you are simply interested in the history unvarnished by an agenda, you'll enjoy this book. Don Lincoln, author of *Alien Universe: Extraterrestrial Life in Our Minds and in the Cosmos*. Imagine a network of extraterrestrials in radio contact with each other across the universe, superior beings who hail from advanced civilizations, quadrillions of miles away, just waiting for Earth to tune in. Some people believe it's only a matter of time before we discover the right station. *Waiting for Contact* tells the story of the Search for Extraterrestrial Intelligence (SETI) movement which emerged in 1959 as astronomers began using radio telescopes to listen for messages from space. New technological developments turned what once was speculation into science. Boosted by support from Frank Drake, Philip Morrison, Carl Sagan, and the genre of science fiction, the SETI movement gained followers and continues to capture imaginations today. In this one-of-a-kind history, Lawrence Squeri looks at the people, reasons, goals, and mindsets behind SETI. He shows how it started as an expression of the times, a way out of Cold War angst with hope for a better world. SETI's early advocates thought that with guidance from technically and ethically advanced outsiders, humanity might learn how to avoid horrors like nuclear annihilation and societal collapse from overpopulation. Some hoped that good news from outer space might reveal a cure for cancer or even the secret of immortality. Squeri also describes the challenges

SETI has faced over the years the struggle to be taken seriously by the scientific community and by NASA competition for access to radio telescopes perpetual lack of funding and opposition from influential politicians He covers the rise and fall of Soviet SETI and the few rare meetings between Soviet and American astronomers Despite many setbacks the movement pressed forward with the aid of private donations and developed outreach programs Volunteers can now help search for new civilizations on their personal computers by joining the SETI Home project Today SETI researchers continue to see themselves as explorers They often identify with Columbus and just as Columbus never realized the full implications of his discovery we cannot predict what will happen if contact is made This book points out that if against all expectations the embattled SETI movement finally succeeds the long awaited first signal picked up by its radio antennas will usher the greatest shift in human history A new adventure will begin

Lawrence Squeri is professor emeritus of history at East Stroudsburg University

The Search for Extra Terrestrial Intelligence David Lamb,2005-07-26 Is the Search for Extra Terrestrial Intelligence a genuine scientific research programme David Lamb evaluates claims and counter claims and examines recent attempts to establish contact with other intelligent life forms He considers the benefits and drawbacks of this communication how we should communicate and whether we actually can He also assesses competing theories on the origin of life on Earth discoveries of former solar planets proposals for space colonies and the consequent technical and ethical issues

Making Contact Sarah Scoles,2017-07-04 For anyone who has ever looked up at the night sky and wondered Are we alone A brilliant examination of the science behind the search for extraterrestrial intelligence and its pioneer Jill Tarter the inspiration for the main character in Carl Sagan s Contact Jill Tarter is a pioneer an innovator an adventurer and a controversial force At a time when women weren t encouraged to do much outside the home Tarter ventured as far out as she could into the three Kelvin cold of deep space And she hasn t stopped investigating a subject that takes and takes without giving much back Today her computer s screensaver is just the text SO ARE WE ALONE This question keeps her up at night In some ways this is the question that keep us all up at night We have all spent dark hours wondering about our place in it all pondering our aloneness both terrestrial and cosmic Tarter s life and her work are not just a quest to understand life in the universe they are a quest to understand our lives within the universe No one has told that story her story until now It all began with gazing into the night sky All those stars were just distant suns were any of them someone else s sun Diving into the science philosophy and politics of SETI searching for extraterrestrial intelligence Sarah Scoles reveals the fascinating figure at the center of the final frontier of scientific investigation This is the perfect book for anyone who has ever looked up at the night sky and wondered if we are alone in the universe

UFO Garrett M. Graff, 2024-11-12 One of the rare books on the topic that manages to be both entertaining and factually grounded The Wall Street Journal From the bestselling author of Raven Rock The Only Plane in the Sky and Watergate finalist for the Pulitzer Prize in history comes the first comprehensive and eye opening exploration of our government s decades long quest to solve one of humanity s greatest mysteries Are we alone in the universe For as long as we have looked to the skies the question of whether life on earth is the only life to exist has been at the core of the human experience driving scientific debate and discovery shaping spiritual belief and prompting existential thought across borders and generations It s one of our culture s favorite conversations and yet the idea of extraterrestrial intelligence has been largely banished to the realm of fantasy and conspiracy Now for the first time the full story of our national obsession with UFOs and the covert search by scientists the United States military and the CIA for proof of alien life is told by bestselling author and Pulitzer Prize finalist Garrett M Graff in a deeply reported and researched history It begins in 1947 when two headline making sightings of strange flying objects prompt the US Air Force s newly formed Department of Defense to create a series of secret programs to determine how unidentified phenomena may pose a threat to national security Over the next half century as the atomic age gives way to the space race and the Cold War the mission continues bringing together an unexpected group of astronomers military officials civilian contactees and true believers who bring us closer then further then closer again to answering one of our most enduring questions What exactly is

out there Drawing from original archival research declassified documents and interviews with senior intelligence and military officials Graff brings readers a story that s Loads of fun a fascinating deep dive down the rabbit hole Publishers Weekly

Make It Rain Kristine C. Harper,2017-03-21 Weather control Juxtaposing those two words is enough to raise eyebrows in a world where even the best weather models still fail to nail every forecast and when the effects of climate change on sea level height seasonal averages of weather phenomena and biological behavior are being watched with interest by all regardless of political or scientific persuasion But between the late nineteenth century when the United States first funded an attempt to shock rain out of clouds and the late 1940s rainmaking as it had been known became weather control And then things got out of control In Make It Rain Kristine C Harper tells the long and somewhat ludicrous history of state funded attempts to manage manipulate and deploy the weather in America Harper shows that governments from the federal to the local became helplessly captivated by the idea that weather control could promote agriculture health industrial output and economic growth at home or even be used as a military weapon and diplomatic tool abroad Clear fog for landing aircraft There s a project for that Gentle rain for strawberries Let s do it Enhanced snowpacks for hydroelectric utilities Check The heyday of these weather control programs came during the Cold War as the atmosphere came to be seen as something to be defended weaponized and manipulated Yet Harper demonstrates that today there are clear implications for our attempts to solve the problems of climate change
