*Project Identification* Harley D. Rutledge, 1981      The Ultimate Collection on UFOs compiled from Wikipedia entries and published by Dr Googelberg, 2012-06-11 Lots of information on sightings and everything from a scientific angle about them Compiled from Wikipediapages and published by DrGoogelberg      A Paranormal History Guide TJ Morris, 2012-09-13 paranormal spirituality and the history of our Alien ET UFO Community of those who became UFOlogists This is some of the history that TJ Morris uses on the nightly blogtalkradio com TJMorrisETradio Good reading about the past and the future while learning about the global brain ways we share in our social networking similar interest groups TJ has the Alien Contact Investigations Researchers Group and the website called AlienETUFO org      Extraterrestrial Intelligence Jensine Andresen, Octavio A. Chon Torres, 2022-03-09 What are the implications for human society and for our institutions of higher learning of the discovery of a sophisticated extraterrestrial intelligence ETI operating on and around Earth This book explores this timely question from a multidisciplinary perspective It considers scientific philosophical theological and interdisciplinary ways of thinking about the question and it represents all viewpoints on how likely it is that an ETI is already operating here on Earth The book s contributors represent a wide range of academic disciplines in their formal training and later vocations and upon reflection on the book s topic they articulate a diverse range of insights into how ETI will impact humankind It is safe to say that any contact or communication with ETI will not be merely a game changer for human society but it also will be a paradigm changer It makes sense for human beings to prepare themselves now for this important transition      *Origins of the Gods* Andrew Collins, Gregory L. Little, 2022-04-19 Explores how our ancestors used shamanic rituals at sacred sites to create portals for communication with nonhuman intelligences Shares supporting evidence from the spiritual and shamanic beliefs of more than 100 Native American tribes Shows how the earliest forms of shamanism began at sites like Qesem Cave in Israel more than 400 000 years ago From G bekli Tepe in Turkey to the Egyptian pyramids from the stone circles of Europe to the mound complexes of the Americas Andrew Collins and Gregory L Little show how again and again our ancestors built permanent sites of ceremonial activity where geomagnetic and gravitational anomalies have been recorded They investigate how the earliest forms of animism and shamanism began at sites like the Denisova Cave in the Altai Mountains of Siberia and Qesem Cave in Israel more than 400 000 years ago They explain how shamanic rituals and altered states of consciousness combine with the natural forces of the earth to create portals for contact with otherworldly realms in other words the gods of our ancestors were the result of an interaction between human consciousness and transdimensional intelligence The authors show how the spiritual and shamanic beliefs of more than 100 Native American tribes align with their theory and they reveal how some of these shamanic transdimensional portals are still active sharing vivid examples from Skinwalker Ranch in Utah and Bempton in northern England Ultimately Collins and Little show how our modern disconnection from nature and lack of a fully visible night sky makes the manifestations from these ultraterrestrial

intelligences seem random If we can restore our spiritual connections perhaps we can once again communicate with the higher dimensional beings who triggered the advancements of our earliest ancestors **UFOs** Robert Powell,2024-04-02 Robert Powell a founding Board member of the Scientific Coalition for UAP Studies has studied the UFO subject for 17 years His work is encapsulated in *UFOs A Scientist Explains What We Know And Don't Know* which provides a scientific rationale for the reality of non terrestrial craft that are intelligently controlled Powell begins his book by familiarizing the reader with the history of UFOs and he identifies the more enigmatic and interesting UFO sightings He examines the characteristics of these sightings that argue against a prosaic explanation extreme acceleration electromagnetic interference bending light no obvious propulsion mechanisms and a lack of interaction with the atmosphere Powell discusses the recent events that have caused our government to change the term from UFO to UAP Included is information never before released indicating the government possesses not just two videos but five videos from 2015 of UFOs operating in the vicinity of the USS Roosevelt nuclear aircraft carrier Powell's later chapters in the book discuss the extraterrestrial hypothesis considering the thousands of exoplanets that have been discovered in the last twenty years Powell challenges the reader to consider all the implications that must be considered if intelligent life discovers us first He looks at how we as individuals and as a society react to UFOs He documents actions taken by our military that include instances when we have fired on UFOs Powell argues that it is time for a change in the study of UFOs The phenomenon has been with us for 75 years and we have learned very little as the decades have passed The author makes the case for what needs to be done going forward The solution he proposes will require a paradigm shift in our thinking and his book provides the information needed to understand that paradigm shift

**In Search of Real Ufos** Milton Hourcade,2011-08-31 The book presents a serious approach to the UFO phenomenon from a scientific standpoint looking for a new way to solve the mystery The book begins by presenting the main characteristics of UFO phenomena It then discusses Orbs and Rods provides scientific explanations to widely reported UFO cases a deep analysis of abductions and an extensive consideration to the Extra Terrestrial Hypothesis It includes a review of the famous Socorro NM incident followed by an interview with Dr Jill Tarter SETI Dr Massimo Teodorani an Italian astrophysicist contributes a report about the Hessdalen Lights as well as his fully loaded scientific paper on Physics from the UFO Data The book concludes with a retrospective and prospectivelook at Ufology and a proposal for a new approach to the study of UFOs A must read for anyone seriously interested in UFOs **Project Identification** Harley D.
