Project Two Thousand Reflection And Celebration:

The Body Nicholas J. Fox, 2012-03-05 This is the first volume in Polity's new Key Themes in Health and Social Care series providing applied introductions to core issues and topics for allied health care professionals

Interpreting Professional Self-Regulation Abigail Beach, Celia Davies, 2013-02-01 Interpreting Professional Self Regulation analyses the contribution made by the UKCC to the development of the nursing profession in this country over the last 30 years. It details the key issues the council grappled with during this time and provides in-depth analyses of the complexity of these issues. There is a general consensus that the current view of nursing's regulatory body will culminate in a major shake up of the way the nursing profession is governed and in which the UKCC will be radically transformed. This publication of the history of the UKCC will mark the close of a very significant period in nursing's history and the opening of wider debates about ensuring the safety of the public through regulation of health professionals. This is an important text for all those who teach on professional and policy issues in nursing, giving them a factual background that has never been brought together before, enabling them to bring discussion of post-registration education, discipline and other professional matters more firmly into the curriculum.

The Changing Shape of Nursing Practice Davina Allen, 2002-01-04 Bringing together sociological theories and nursing practice, this text develops a dynamic conceptualisation of the nursing role which is rooted in the work setting. It looks at the factors which have shaped nursing work in the past and those which are likely to shape it in the future. Nurses' work is changing in two respects: the place nursing occupies in the health care division of labour and the routine shifting of work boundaries that nurses experience in their daily work. Drawing on her detailed observations of the reality of nursing work in a district general hospital, Davina Allen explores these linked themes, focussing on five key work boundaries: nurse-doctor, nurse-manager, nurse-support worker, nurse-patient, nurse-nurse. The text provides new insight into many of the tensions and dilemmas nurses routinely face and the processes and constraints through which their work is fashioned. It offers a new way of thinking about the nursing role which is particularly relevant at a time when the scope of nursing practice is expanding and when the integrated approach to health and social care is seen as the key to provision and improved services.

Gender And The Professional Predicament In Nursing Davies, Celia, 1995-02-01 Gender and the Professional Predicament in Nursing examines the ways in which our understanding of nursing is gendered and how our notion of nursing is connected to our idea of what it is to be a woman. It explores the implications this connection has for the status of nursing as a profession and re-examines some of the fundamental questions that the nursing profession has tried to address, such as: what is nursing care? who should do it? why is it so difficult to manage the provision of nursing care? Gender and the Professional Predicament in Nursing demonstrates that once nurses try to define and shape the nature of their work, they are marginalized or silenced. Frequent descriptions of them as sentimental, divided or incompetent highlight the need to understand nurses' exclusion from policy debates and why their voices are so seldom heard. Celia Davies contends that in a

society divided by gender defining nursing as women's work is deeply contradictory We value nurses but devalue nursing She suggests that alongside the debates about managerial efficiency in the NHS we need another kind of debate about how we organize health and social care about what we mean by professionalism and about the worth of caring work This book is important reading for students of women's studies nursing allied professions in health and medicine policy makers and human resource managers **Health, Medicine and Society** Michael Calnan, Jonathan Gabe, Simon J. Crump, 2016-03-30 Among the world's myriad cultures and their associated calendars the idea of a New Year is relative and hardly specifies a universal celebration or even a universal point in time Ways of celebrating the New Year range from the observances of religious rituals and superstitions to social gatherings featuring particular foods music dancing noisemaking fireworks and drinking This first encyclopedia devoted exclusively to the New Year includes 320 entries that give a global perspective on the New Year beyond its traditional Western associations with Christmas National or regional entries detail the principal traditions and customs of 130 countries while 27 entries discuss major calendar systems in current use or of significant historical interest The remaining entries cover a wide variety of subjects including literary works movies and television specials the customs of specific ethnic groups universal customs such as toasting and drinking football bowl games and parades and the New Year celebrations at the White House and the Vatican **Journal of the Royal Naval Medical Service**, 1993 *Beyond Health* Nicholas J. Fox, 1999 Beyond Health applies post structuralist and postmodern ideas to issues of health and health care to provide a radical re think of how health is to be understood It offers a perspective in which health is seen as an affirmation of potential rather than as a narrow biopsychosocial construct The author develops his notion of arche health and in so doing provides a lucid account of a wide range of post structuralist and postmodern theoretical perspectives and their relevance to the field of health This text explains complex ideas so even a reader with no previous background in the topic can grasp it In each chapter the author explains and applies a selection of theoretical perspectives Teenagers and Community Service Maureen Kenny, Laura A.
