

The background image shows a piece of industrial testing equipment, likely a blowind machine. It consists of two large, dark, arched frames. Inside each frame, there are several horizontal, cylindrical components that appear to be part of a rotating assembly, possibly for testing the aerodynamic properties of a structure. The entire setup is mounted on a base. The word "blowind" is superimposed in the center of the image.

Experimental Investigation of Turbulent Boundary Layer with Uniform Blowing at Moderate and High Reynolds Numbers
Gazi Hasanuzzaman, 2022-01-18 Experimental investigation in turbulent boundary layer flows represents one of the canonical geometries of wall bounded shear flows Utmost relevance of such experiments however is applied in the engineering applications in aerospace and marine industries In particular continuous effort is being imparted to explore the underlying physics of the flow in order to develop models for numerical tools and to achieve flow control Flow control experiments have been widely investigated since 1930 s Several flow control technique has been explored and have shown potential benefit But the choice of control technique depends largely on the boundary condition and the type of application Hence friction drag of subsonic transport aircraft is intended to be reduced within the scope of this Ph D topic Therefore application of active control method such as microblowing effect in the incompressible zero pressure gradient turbulent boundary layer was investigated A series of experiments have been performed in two different wind tunnel facilities Wind tunnel from Department of Aerodynamics and Fluid Mechanics LAS was used for the measurements for moderate Reynolds number range in co operation with the wind tunnel from Laboratoire de M ecanique de Feiret Lille for large Reynolds number range

Measurements are conducted with the help of state of the art techniques such as Laser Doppler Anemometry Particle Image Velocimetry and electronic pressure sensors

Blowing Smoke Michael J. Reznicek, 2012-02-16 Alcohol opiates cocaine and marijuana among other drugs have been used and abused for millennia Prior to the disease model approach to drug addiction which posits that addiction is a psychological and biological problem and that sufferers are victims societies had a workable solution let people consume what they want and let informal cultural controls reinforce responsible behavior Legal sanctions were reserved for any use that affected the safety of others *Blowing Smoke* proposes an approach to the war on drugs that returns us to the pre disease model era Dr Reznicek asserts that addiction is not a medical problem to be treated in rehab or by prohibiting substance use Rather he debunks the disease model arguing that it has exacerbated the problem by telling drug abusers that they are not responsible for their behavior that they are sick that they are not to blame He skillfully argues for a new approach to drug use and abuse that requires a shift in the way we fight the war on drugs Dr Reznicek provides a new framework for understanding drug abuse the habit model Habits are practiced as long as they provide comfort and are abandoned when they cause pain The habit model is more consistent with current neuroscientific knowledge and it accounts for the widely observed phenomenon that most substance abusers don't change until they hit bottom the point where the consequences of drug use finally outweigh its benefits Using the habit model Dr Reznicek suggests the solution to the drug problem is to turn back the clock and to take lessons from societies that use social controls and consequences to deal with addiction and drug abuse He recommends the legalization of drugs for adults the implementation of social practices to dissuade abusers and the end to the use of rehab as a way of handling addiction *Blowing Smoke* shows how such an iconoclastic approach can work for us today

Blowing Smoke Rud Istvan, 2014-10-14 From the Foreword by Prof Judith Curry of Georgia Tech Istvan's insightful and incisive writing in *Blowing Smoke* tackles a diverse array of topics related to climate and energy that are highly relevant to the current public debate His writing is accessible to the public who may not have the inclination the time or the ability to dig deep into the literature and emerge with a simple factual big picture *Blowing Smoke* is an important contribution to the public understanding of the debate on climate change and energy

Blowing Clover, Falling Rain W. Travis Helms, 2020-11-06 The field of theopoetics explores the ways in which we make God present particularly through language This book explores questions of theopoetics as they relate to the central poetry of the American Sublime It offers a fresh theological engagement with what literary critic Harold Bloom terms the American religion transcendentalism Emerson s homespun mysticism Specifically it seeks to rehabilitate Emerson s concept of self reliance from the charge of gross egoism by situating it in the context of normative mysticisms Eastern and Western It undertakes a more poetic approach to reading theologically inflected poetry by exegeting four poets collectively constituting Bloom s American religious canon Ralph Waldo Emerson Walt Whitman Wallace Stevens and Hart Crane It utilizes a modified version of the ancient fourfold allegorical mode of reading Scripture to draw out theological dimensions of four quintessential texts Nature Song of Myself Sunday Morning Lachrymae Christi in order to offer a more imaginative way of reading imaginative writing Building on Emerson s contention just as there is creative writing there is creative reading and Bloom s claim a theory of poetry must be poetry before it can be of any use in interpreting poems it demonstrates the unique viable ways in which poems are able to do theology and perform or embody theopoetic truths
