E-guidebook on Sustainable Coffee Consumption
Universiteit Maastricht, 2024-02-05
Coffee consumption is experiencing a rapid increase worldwide
Unfortunately this increase is in parallel with the increase in the waste of Spent Coffee Grounds SCG
Each day countless coffee shops and households discard substantial quantities of coffee grounds contributing to landfill waste and environmental degradation
These discarded grounds are rich in organic matter and nutrients making them a valuable resource that could be repurposed rather than wasted
By diverting spent coffee grounds from landfills we can reduce greenhouse gas emissions and promote sustainability
Innovative solutions such as using coffee grounds for composting biofuel production or even as an ingredient in various products are emerging to address this issue
Tackling the problem of spent coffee grounds waste is not only an environmental imperative but also an opportunity to harness the latent potential of this byproduct to benefit our planet and society
The ECOffee project has been developed in order to provide significant environmental and social benefits by promoting sustainable coffee practices and habits to coffee consumers and coffee owners
To achieve this and in order to develop this e guidebook partners from six European countries Hungary Cyprus Portugal the Netherlands Greece and Slovenia joined forces in the development of this e guidebook along with video tutorials and a consumer smartphone application
The objective of our ECOffee consortium is to
1 train coffee consumers towards sustainable habits and provide incentives to follow such profile
2 enhance cafeteria owners and adult educators portfolio with a unique guide on how to train coffee consumers to obtain a sustainable consumption profile
3 offer an easy and accessible educational material and methods in the form of open educational resources and ready to use material for cafeteria owners coffee shop employees and adult trainers
