

12 Project Management Principles

Success Principle

You have to be willing and able to commit fully to the success of your project, or there's no point in even trying.

Project Manager Principle

You need to have a leader for the project to plan, execute and report to the sponsors and team.

Commitment Principle

Everyone, from the top executive down to the junior team member, must be on board with giving it their all.

Structure Principle

The structure of a project comes from balancing its goals, schedule and resources.

Definition Principle

In order for a project to operate, its phases need to be clearly defined from the sponsor on down.

Transparency Principle

A project's success is based on how well you can communicate the right information to the right person.

Communication Principle

Being transparent isn't enough. You need a single line of communication to avoid confusion.

Progress Principle

Progress rests on procedure, so you have to have well-defined roles and project policies in place.

Life-Cycle Principle

All projects are broken up into smaller phases, from initiation to close, and they are marked by milestones.

Culture Principle

It's important that the culture of your team matches with your project to ensure the greatest productivity.

Risk Principle

All projects are risky, and not all risks can be planned for, so plan, but always be aware and prepared to act.

Accountability Principle

Have metrics in place to chart your project's progress and reward those who help you achieve this goal.
