Projection Of The Astral Body 1929:

The Projection of the Astral Body Sylvan J. Muldoon, Hereward Carrington, 2013-10 This is a new release of the original 1929 edition **Projection of the Astral Body** Sylvan J. Muldoon, 2013-04-18 This fascinating book contains the

remarkable account of Sylvan Muldoon's out of body experience scientifically edited by one of the world's foremost psychic researchers Dr Carrington Including both the detailed account of Muldoon's experiences and instructions on the technique of projecting the astral body this book is thoroughly recommended for inclusion on the bookshelf of anyone with an interest in the subject **Neuromatic** John Lardas Modern, 2021-09-29 The story Modern tells ranges from eighteenth century brain

anatomies to the MRI from the spread of phrenological cabinets and mental pieties in the nineteenth century to the discovery of the motor cortex and the emergence of the brain wave as a measurable manifestation of cognition from cybernetic research into neural networks and artificial intelligence to the founding of brain centric religious organizations such as Scientology from the deployments of cognitive paradigms in electric shock treatment to the work of Barbara Brown a neurofeedback pioneer who promoted the practice of controlling one's own brainwaves in the 1970s What Modern reveals via this grand tour is that our ostensibly secular turn to the brain is bound up at every turn with the religion it discounts ignores or actively dismisses Nowhere are science and religion closer than when they try to exclude each other at their own peril

The Problem of Disenchantment Egil Asprem, 2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people's everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprem casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge The Problem of Disenchantment is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio *The Interpretation of Cosmic and Mystical Experiences* Robert Crookall, 1969 Albert Schweitzer said All the problems of religion ultimately go back to the one the experience I have of God within myself differs from knowledge concerning Him which I derive from the world In the world He is impersonal

force within me He reveals Himself as Personality In his earlier books Dr Crookall dealt with the most important of psychical experiences namely out of the body experiences popularly called astral projections These are he says natural and normal to mankind This work is concerned with cosmic and mystical experiences the highest and most significant of which we are capable These are also natural and normal to mankind In the First Part a large number of experiences of at one ment are assembled and classified preparatory to a consideration of their incidence and nature Some people have at one with inanimate objects others with animate objects nature still others with people and many with God These various groups are shown to overlap there is says Crookall a complete and unbroken spectrum beginning with minerals and ending with God It is clear that at one ment with God is not as some writers have supposed essentially distinct from at one ment with nature On the basis of this the author agrees with Dr Raynor Johnson and the Revd Sidney Spencer the latter concluded Cosmic consciousness is the natural complement of the experience of union with God The Second Part of the book deals with descriptions of at one ment that have hitherto been entirely neglected by writers on this important subject namely those of communicators the supposed dead Some supposed dead communicators are shown to describe at one ment with inanimate objects others with nature with people and still others with God Again these groups overlap to form an unbroken spectrum of experience as in the experiences of the living a strong suggestion of surviving souls In point of fact Crookall notes that mystical experiences seem to be more frequent among the dead than the living This of course might have been expected Human mystical experiences are here considered for the first time in relation to the correlation suggested in the author s first book

Aleister Crowley and Western Esotericism Henrik Bogdan, Martin P. Starr, 2012-09-20 Henrik Bogdan and Martin P Starr offer the first comprehensive examination of one of the twentieth century s most distinctive occult iconoclasts Aleister Crowley 1875 1947 one of the most influential thinkers in contemporary western esotericism

Ecologies of Participation Zayin Cabot, 2018-04-30 In this daring debut Zayin Cabot challenges the wise homebodies of academia A profoundly interdisciplinary approach to comparative scholarship *Ecologies of Participation* offers a methodology whereby we can face our shared planetary predicament It is grounded in process philosophy and asserts the importance of a new ontology of agency It traces the importance of L vy Bruhl and L vi Strauss s early work while offering new insight into the ontological turn in anthropology This book sets out to destabilize modern reductionist trends toward scientific materialism without falling into postmodern cultural constructivism It does not assume the givenness of nature or culture By advancing a multi ontology approach this work offers robust interventions into decolonial and critical studies Cabot takes contemporary scholarship in new and exciting directions offering an unstable ground from which to examine our shared worlds both human and other Throughout the last chapters of the book these threads are illuminated through a detailed ethics of comparison and participation

Intimations of Immortality Robert Crookall, 1987-11 A carefully researched study of near death and out of the body experiences and the evidence they provide for survival after physical death

Mysticism Jess Byron Hollenback, 1996 This sweeping study of mysticism by Jess Hollenback considers the writings and experiences of a broad range of traditional religious mystics including Teresa of Avila Black Elk and Gopi Krishna It also makes use of a new category of sources that more traditional scholars have almost entirely ignored namely the autobiographies and writings of contemporary clairvoyants mediums and out of body travelers This study contributes to the current debate about the contextuality of mysticism by presenting evidence that not only are the mystic s interpretations of and responses to experiences culturally and historically conditioned but historical context and cultural environment decisively shape both the perceptual and affective content of the mystic s experience as well Hollenback also explores the linkage between the mystic s practice of recollection and the onset of other unusual or supernormal manifestations such as photisms the ability to see auras telepathic sensitivity clairvoyance and out of body experiences He demonstrates that these

extraordinary phenomena can actually deepen our understanding of mysticism in unexpected ways A unique feature of this book is its in depth analysis of empowerment an important phenomenon ignored by most scholars of mysticism

Empowerment is a peculiar enhancement of the imagination thoughts and desires that frequently accompanies mystical states of consciousness Hollenback shows its cross cultural persistence its role in constructing the perceptual and existential environments within which the mystic dwells and its linkage to the fundamental contextuality of mystical experience THE
