Projections And Interface Conditions Essays On Modularity:

Projections and Interface Conditions Anne-Marie Di Sciullo, 1997 This collection of previously unpublished papers explores the implications of Chomsky's Minimalist framework for the modularity of grammar which simplifies the modular approach he took in his Government and Binding theory of grammar According to this theory autonomous grammatical components phonological syntactic morphological and semantic coexist and interact like building blocks using a given set of principles at given levels of representation Chomsky's assertions have sparked a great deal of theoretical debate especially with regard to the nature and interaction of each of the building blocks The contributors to this volume join the debate in a series of case studies that compare modularity in English French and Italian among other languages In the process they address such issues as the autonomy and applications of modules and their distribution in theory as well as the role of functional projects in their derivations *Projections and Interface Conditions* will interest researchers in any of the above mentioned languages as well as the large number of linguists working in the Chomskyan tradition

Substance-based Grammar - The (Ongoing) Work of John Anderson Roger Böhm, Harry van der Hulst, 2018-12-12 The contributions of this volume centre around the ongoing work of John Anderson Professor Emeritus at the University of Edinburgh and Fellow of the British Academy who with detailed studies in phonology morphology semantics and syntax as well as careful discussions of historical and methodological issues in linguistics at large has been and still is the central figure in the development of a theory of language structure driven by the assumption of structural analogy between syntax and phonology and firmly grounded in the long standing tradition of substantively based grammar behind it The first contribution is a lengthy interview based on a series of written interchanges by J zsef Andor with John Anderson which focuses on the development of Anderson's work and its relation to contemporaneous developments in linguistics The following eight contributions centring on general issues concerning the historiography of localism the lexicon meaning and syntax and finally phonology deal with applications extensions answers to criticism and philosophical context of Anderson's work

The Grammar of Repetition Jason Kandybowicz, 2008 Displacement is a fundamental property of grammar Typically when an occurrence moves it is pronounced in only one environment This was previously viewed as a primitive irreducible property of grammar Recent work however suggests that it follows from principled interactions between the syntactic and phonological components of grammar As such the phonetic character of movement chains can be seen as both a reflection of and probe into the syntax phonology interface This volume deals with repetition an atypical outcome of movement operations in which displaced elements are pronounced multiple times Although cross linguistically rare the phenomenon obtains robustly in Nupe a Benue Congo language of Nigeria Repetition raises a tension of the descriptive explanatory variety In order to achieve both measures of adequacy movement theory must be supplemented with an account of the conditions that drive and constrain multiple pronunciation This book catalogs these conditions bringing to light a number of undocumented aspects of Nupe

grammar **Pragmatics and Autolexical Grammar** Etsuyo Yuasa, Tista Bagchi, Katharine P. Beals, 2011 This book presents papers in honor of Jerry Sadock's rich legacy in pragmatics and Autolexical Grammar. Highlights of the pragmatics section include Larry Horn on almost-barely and assertoric inertia, William Lycan on Sadock's resolution of the Performadox with truth₁ and truth₂, and Jay Atlas on Moore's Paradox and the truth value of propositions of belief. Highlights of the Autolexical Grammar section include Fritz Newmeyer's comparison of the minimalist autolexical and transformational treatments of English nominals, Barbara Abbott's extension of Sadock's PRO-less syntax to a PRO-less semantics of the infinitival complements of know-how, and Haj Ross's syntactic connections between semantically related English pseudoclefts. Encompassing a range of languages (Aleut, Bangla, Greenlandic, Japanese, and a home-based sign language) and extending into psycholinguistics, language acquisition, sentence processing, and autism, this volume will interest a range of readers from theoretical linguists and philosophers of language to applied linguists and exotic language specialists.

Asymmetry in Morphology Anna Maria Di Sciullo, 2005-11-04 In this groundbreaking monograph, Anna Maria Di Sciullo proposes that asymmetry—the irreversibility of a pair of elements in an ordered set—is a hard-wired property of morphological relations. Her argument that asymmetry is central in derivational morphology would, if true, make morphological objects regular objects of grammar just as syntactic and phonological objects are. This contrasts with the traditional assumption that morphology is irregular and thus not subject to the basic hard-wired regularities of form and interpretation. Di Sciullo argues that the asymmetric property of morphological relations is part of the language faculty. She proposes a theory of grammar Asymmetry Theory according to which generic operations have specific instantiations in parallel derivations of the computational space. She posits that morphological and syntactic relations share a property, asymmetry, but diverge with respect to other properties of their primitive operations and interface representations. Di Sciullo offers empirical support for her theory with examples from a variety of languages, including English, Modern Greek, African Romance, Turkish, and Slavic.

The Biolinguistic Enterprise Anna Maria Di Sciullo, Cedric Boeckx, 2011-03-17 This book by leading scholars represents some of the main work in progress in biolinguistics. It offers fresh perspectives on language evolution and variation, new developments in theoretical linguistics, and insights on the relations between variation in language and variation in biology. The authors address the Darwinian questions on the origin and evolution of language from a minimalist perspective and provide elegant solutions to the evolutionary gap between human language and communication in all other organisms. They consider language variation in the context of current biological approaches to species diversity, the evo-devo revolution, which brings to light deep homologies between organisms. In dispensing with the classical notion of syntactic parameters, the authors argue that language variation like biodiversity is the result of experience and thus not a part of the language faculty in the narrow sense. They also examine the nature of this core language faculty, the primary categories with which it is concerned, the operations it performs, the syntactic constraints it poses on semantic interpretation, and the role of phases in bridging the gap.

Linguistic Bibliography for the Year 2000 / Bibliographie Linguistique de l'Année 2000 Sijmen Tol, Hella Olbertz, Mark Janse, 2004-12-10

Bibliographie Linguistique Linguistic Bibliography is the annual bibliography of linguistics published by the Permanent International Committee of Linguists under the auspices of the International Council of Philosophy and Humanistic Studies of UNESCO With a tradition of more than fifty years the first two volumes covering the years 1939 1947 were published in 1949 1950 Bibliographie Linguistique is by far the most comprehensive bibliography in the field It covers all branches of linguistics both theoretical and descriptive from all geographical areas including less known and extinct languages with particular attention to the many endangered languages of the world Up to date information is guaranteed by the collaboration of some forty contributing specialists from all over the world With over 20 000 titles arranged according to a detailed state of the art classification Bibliographie Linguistique remains the standard reference book for every scholar of language and linguistics

Generative Investigations Piotr Bański, Beata Łukaszewicz, Monika Opalińska, 2020-05-15 This volume is a collection of studies in generative morpho syntax and phonology which grew out of the 6th Generative Phonology in Poland GLiP meeting that took place at the University of Warsaw in the spring of 2008 The sixteen papers written by the leading scholars in linguistics as well as young researchers give a representative flavour of investigations across morpho syntax and phonology from the current generative perspective Drawing on recent advances in formal linguistics the majority of studies in this volume test the applicability of available theoretical frameworks to selected bodies of data Some papers discuss the adequacy of competing theoretical solutions in the light of new experimental results The empirical data is drawn from a variety of languages including standard and dialectal Polish Russian Croatian Czech English Frisian and Swahili The purpose is not only to illustrate long standing problems but also to highlight less known facts The collection will thus be relevant to those concerned with theoretical accounts experimental findings Slavic and general linguistics

Romance Linguistics 2007 Pascual José Masullo, Erin O'Rourke, Chia-Hui Huang, 2009 The present volume includes a selection of twenty one peer reviewed and revised papers from the 37th annual Linguistic Symposium on Romance Languages LSRL held at the University of Pittsburgh in 2007 The papers cover a range of topics in morphology syntax phonology and language acquisition A number of languages and varieties are also analyzed including Italian Spanish Judeo Spanish Old Spanish French Old French and Romanian Contributions include papers from three of the invited speakers Heles Contreras Javier Gutierrez Rexach and Julia

Herschensohn This volume highlights theoretical issues under current debate in Romance linguistics The Serial Verb Construction Parameter Osamuyimen Thompson Stewart, 2013-10-31 An investigation of the serial verb construction this work engages central issues in syntactic theory complex predicates clausal architecture and syntactic variation *The Morphosyntax of Transitions* Víctor Acedo-Matellán, 2016-02-18 This book examines the cross linguistic expression of changes of location or state taking as a starting point Talmy's typological generalization that classifies languages as either satellite framed or verb framed In verb framed languages such as those of the Romance family the result state or location is encoded in the verb In satellite framed languages such as English or Latin the result state or location is encoded in a non verbal element These languages can be further subdivided into weak satellite framed languages in which the element expressing result must form a word with the verb and strong satellite framed languages in which it is expressed by an independent element an adjective a prepositional phrase or a particle In this volume Víctor Acedo Matellán explores the similarities between Latin and Slavic in their expression of events of transition neither allows the expression of complex adjectival resultative constructions and both express the result state or location of a complex transition through prefixes They are therefore analysed as weak satellite framed languages along with Ancient Greek and some varieties of Mandarin Chinese and stand in contrast to strong satellite framed languages such as English the Germanic languages in general and Finno-Ugric This variation is expressed in terms of the morphological properties of the head that expresses transition which is argued to be affixal in weak but not in strong satellite framed languages The author takes a neo constructionist approach to argument structure which accounts for the verbal elasticity shown by Latin and a Distributed Morphology approach to the syntax morphology interface

Semantics in Language Acquisition Kristen Syrett, Sudha Arunachalam, 2018-08-02 This volume presents the state of the art of recent research on the acquisition of semantics Covering topics ranging from infants initial acquisition of word meaning to the more sophisticated mapping between structure and meaning in the syntax semantics interface and the relation between logical content and inferences on language meaning semantics and pragmatics the papers in this volume introduce the reader to the variety of ways in which children come to realize that semantic content is encoded in word meaning for example in the event semantics of the verbal domain or the scope of logical operators and at the level of the sentence which requires the composition of semantic meaning The authors represent some of the most established and promising researchers in this domain demonstrating collective expertise in a range of methodologies and topics relevant to the acquisition of semantics This volume will serve as a valuable resource for students and faculty and junior and seasoned researchers alike

Structuring the Argument Asaf Bachrach, Isabelle Roy, Linnaea Stockall, 2014-07-24 While the argument structure of verbs has long been a central issue in linguistic research of all varieties and continues to be a vexed area of research across a wide range of theoretical and empirical approaches the interdisciplinary perspective and dialogue remain largely under explored This collection stems from an interest to find and explore practical tangible points of intersection

between theoretical linguists psycholinguists and neurolinguists working on problems related to the representation and processing of verbs and their associated thematic structure The book is organized around three core themes i the basic building blocks of verbal representations and modes of construction of the verb argument complex ii non canonical argument structure realization with a particular focus on object experiencer psych verbs and iii the promises and challenges of neurolinguistic and psycholinguistic investigation into argument structure and the prospects for the future of interdisciplinary research on verb argument structure

Compounding in Modern Greek Angela Ralli, 2012-10-29 One of the core challenges in linguistics is elucidating compounds their formation as well as the reasons their structure varies between languages This book on Modern Greek rises to the challenge with a meticulous treatment of its diverse intricate compounds a study as grounded in theory as it is rich in data Enhancing our knowledge of compounding and word formation in general its exceptional scope is a worthy model for linguists particularly morphologists and offers insights for students of syntax phonology dialectology and typology among others The author examines first tier themes such as the order and relations of constituents headedness exocentricity and theta role saturation She shows how Modern Greek compounding relates to derivation and inflection and charts the boundaries between compounds and phrases Exploring dialectically variant compounds and identifying historical changes the analysis extends to similarly formed compounds in wholly unrelated languages

Current Issues in Morphological Theory Ferenc Kiefer, Mária Ladányi, Péter Siptár, 2012-05-30 The present volume contains selected papers from the 14th International Morphology Meeting held in Budapest 13-16 May 2010 organized under the auspices of the Research Institute for Linguistics of the Hungarian Academy of Sciences The selection of papers presented here addresses problems of language use in one or another sense covering issues of regularity irregularity and analogy as well as the role of frequency in morphological complexity morphological change and language acquisition The languages discussed include Dutch German Greek Hungarian Lovari Romani and Russian The contributors are Anna Anastassiadis Symeonidis Mario Andreou M rton Andr s Bal Dunstan Brown Gabriela Caballero Anna Maria Di Sciullo Wolfgang U Dressler Roger Evans Alice C Harris L szl K lm n Katharina Korecky Kr ll Sabine Laaha Laura E Lettner Maria Mitsiaki P ter R cz Angela Ralli P ter Rebrus Alan K Scott and Mikl s T rkenczy

Non-Projecting Words I. Toivonen, 2012-12-06 Focusing primarily on Swedish a Germanic language whose particles have not previously been studied extensively this study develops a theory of non projecting words in which particles are morphologically independent words that do not project phrases It identifies the violations of the basic tenets of X bar theory and develops a formally explicit revision of X bar theory that can accommodate the requisite weak projections

Yearbook of Morphology 1998 G.E. Booij, Jaap van Marle, 2013-04-18 A revival of interest in morphology has occurred during recent years The Yearbook of Morphology series published since 1988 has proven to be an eminent support for this upswing of morphological research since it contains articles on topics which are central in the current theoretical debates which are frequently referred to The

Yearbook of Morphology 1998 focuses on two issues the position of inflection in the grammar and the interaction of morphology with phonology in particular the problem of allomorphy In addition this volume presents a study of the relation between transposition and argument structure a declarative model of word formation applied to conversion in German an analysis of Dutch verbal compounds and a study of the semantic aspects of nominalization The relevant evidence comes from a wide variety of languages Theoretical descriptive and historical linguists morphologists phonologists and psycholinguists will find this book of interest

Verbal Projections Hero Janßen, 2011-04-20 This collection of articles examines lexical and grammatical aspects of verbal elements and phrases in the context of recent generative research General questions concern definitions of grammatical categories classifications of auxiliaries and particles as functional categories and problems of economy Lexical matters range from affixation and category change participles gerunds to semantic representations of specific verb classes possessive phrasal and intransitive verbs The syntactic analyses focus on positional arrangements of aspectual and verbal units V2 Verb Raising The data are mainly drawn from English perspectives on other Germanic languages are included

Spatial Cognition Seán Ó Nualláin, 2000-01-01 Spatial Cognition brings together psychology computer science linguistics and geography discussing how people think about space our internal cognitive maps and spatial perception and how we communicate about space for instance giving route directions or using spatial metaphors The technological applications adding dynamism to the area include computer interfaces educational software multimedia and in car navigation systems On the experimental level themes as varied as gender differences in orientation and of course wholly unrelated the role of the hippocampus in rodent navigation are described Much detailed analysis and computational modeling of the structure of short term memory STM is discussed The papers were presented at the 1998 annual meeting of the Cognitive Science Society of Ireland Mind III Series B
