The Context of REDD+ in Papua New Guinea: Drivers, agents, and institutions Andrea Babon, Gae Yansom Gowae, 2013-07-06 This report provides an overview of the context for REDD in Papua New Guinea It describes the main drivers of deforestation and degradation the institutional and political economic context within which REDD is being developed and maps the evolution of a national REDD strategy and associated policy and legislation during 2008-2012 It highlights the opportunities and challenges of developing policies that can provide climate effective cost efficient and equitable REDD outcomes for Papua New Guinea Papua New Guinea's system of customary land tenure provides both enormous opportunities and challenges for REDD Gaining the free prior and informed consent of customary landowners who own the forests that REDD initiatives are designed to protect and developing equitable benefit sharing mechanisms will be a key challenge Corruption and a lack of transparency and accountability within the government are significant problems for the country to overcome Political instability and capacity constraints within the public service also pose challenges to the smooth and steady development and implementation of REDD policies While there appears to be a growing national discourse around good governance and anti corruption a complex political economy has thwarted many previous attempts at forest policy reform in the country and REDD is likely to face significant opposition from those who currently benefit from the unsustainable exploitation of the country's forests But the outlook for REDD in Papua New Guinea need not be pessimistic Many different stakeholder groups including government agencies civil society organisations donors private sector actors and research institutes support the concept of REDD in Papua New Guinea Despite some early missteps in terms of broad stakeholder engagement and national ownership over the policy process the government has shown genuine progress in developing a transparent and accountable governance structure that can and is incorporating the perspectives of multiple stakeholders Occasional Papers contain research results that are significant to tropical forest issues This content has been

Wrathall,2010-11-01 This book includes ten essays that trace the notion of unconcealment as it develops from Heidegger s early writings to his later work shaping his philosophy of truth language and history Unconcealment is the idea that what entities are depends on the conditions that allow them to manifest themselves This concept central to Heidegger s work also applies to worlds in a dual sense first a condition of entities manifesting themselves is the existence of a world and second worlds themselves are disclosed The unconcealment or disclosure of a world is the most important historical event and Heidegger believes there have been a number of quite distinct worlds that have emerged and disappeared in history Heidegger s thought as a whole can profitably be seen as working out the implications of the original understanding of unconcealment **IGARSS 2000** Tammy I.
