Promethean Fire:

The Right Promethean Fire Ihab Hassan, 1980 **The Right Promethean Fire** Ihab Hassan, 1980 **Black Prometheus** Jared Hickman, 2017 An innovative transnational literary study Black Prometheus tracks the mythical figure's surprising resonance in Anglo American antislavery discourse from 1800 until the end of the U S Civil War **Shakespeare's Classical Mythology: A Dictionary** Janice Valls-Russell, Katherine Heavey, 2024-10-17 Why does Bassanio compare himself to Jason What is Hecuba to Hamlet Is the mechanicals staging of the Pyramus and Thisbe story funny or sad This dictionary elucidates Shakespeare's use of mythological references in an early modern context while bringing them to life for today's audiences and readers at a time of renewed critical interest in the reception of the classics and fascination with classical mythology in popular culture It is also a precious tool for practitioners who may not always know quite what to make of mythological references Mythological figures creatures places and stories crowd Shakespeare's plays and poems featuring as allusions poetic analogies inset shows scene settings and characters or plots in their own right Most of these references were familiar to Shakespeare's spectators and readers who knew them from the writings of Ovid Virgil and other classical authors or indirectly through translations commentaries ballads and iconography This dictionary illustrates how far from being isolated a mythological reference may resonate with the poetics of the text and its structure cast light on characters and contexts and may therefore be worth exploring onstage in a variety of ways The 200 headings correspond to words and names actually used by Shakespeare individual figures Dido Venus Hercules categories Amazons Centaurs nymphs satyrs places Colchos Troy Medium and longer entries also cover early modern usage and critical analysis in a cross disciplinary approach that includes reception textual performance gender and political studies **Prometheus** Carol Dougherty, 2006-01-30 With no recent publications discussing Prometheus at length this book provides a much needed introduction to the Promethean myth of this rebellious god who defied Zeus to steal fire for mankind Seeking to locate the nature of this compelling tale's continuing relevance throughout history Carol Dougherty traces a history of the myth of Prometheus from its origins in ancient Greece to its resurgence in the works of the Romantic era and beyond Offering a comparative approach that includes visual material and film the book reveals a Prometheus who was a rebel against Zeus tyranny to Aeschylus a defender of political and artistic integrity to Percy Bysshe Shelley and a symbol of technological innovation during the industrial revolution his resilience and adaptability illuminating his power and importance in Western culture Prometheus is an essential introduction to the Promethean myth for all readers of classics the arts and literature alike

Architecture and Fire Stamatis Zografos, 2019-06-12 Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the

archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London's Grenfell Tower in 2017 Zografos concludes with thoughts on Freud's drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda

Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines

Prometheus in the Nineteenth Century Caroline Corbeau-Parsons, 2017-12-02 On Zeus order Prometheus was chained to Mount Caucasus where every day he was to endure his liver being devoured by a bird of prey his punishment for bringing fire to mankind Through the impulse of Goethe his fortune went through radical changes the Titan originally perceived as a trickster was established both as a creator and a rebel freed from guilt and he became a mask for the Romantic artist This cross disciplinary study encompassing literature the history of art and music examines the constitution of the Prometheus myth and the revolution it underwent in 19th century Europe It leads to the Symbolist period which witnessed the coronation of the Titan as a prism for the total work of art and aims to re-establish the importance of Prometheus amongst other major Symbolist figures such as Orpheus

Children of Prometheus: Romanticism and Its Legacy Gregory Maertz, 2021-09-21 Gregory Maertz has written extensively on Romantic and Modern literature art and ideas In these nine related essays he investigates the expression of Romanticism in literature philosophy and cultural politics from the Renaissance to Modernism The comparative essays in Part One examine the affinity between the religious logic of Sir Thomas Browne and Søren Kierkegaard Tolstoy's enduring attraction to Schopenhauer's thought Rilke's debts to the sculptor Rodin the identification of an early novel by William Godwin as the chief precursor text to Mary Shelley's *Frankenstein* and the corresponding literary projects of Osip Mandelstam Rilke and David Jones In Part Two the essays are clustered around the literary activity of writers and philosophers associated with radicalism in Britain and transcendentalism in America a reconsideration of the life of William Godwin the central role played by English radicals in the transmission of German literature Godwin's innovations in travel fiction and the crystallization of authorial identity around the influence of Goethe in the work of women writers such as Mary Wollstonecraft Margaret Fuller and George Eliot

Meat Planet Benjamin Aldes Wurgaft, 2020-10-13 In 2013 a Dutch scientist unveiled the world's first laboratory created hamburger Since then the idea of producing meat not from live animals but from carefully cultured tissues

has spread like wildfire through the media Meanwhile cultured meat researchers race against population growth and climate change in an effort to make sustainable protein Meat Planet explores the quest to generate meat in the lab a substance sometimes called cultured meat and asks what it means to imagine that this is the future of food Neither an advocate nor a critic of cultured meat Benjamin Aldes Wurgaft spent five years researching the phenomenon In Meat Planet he reveals how debates about lab grown meat reach beyond debates about food examining the links between appetite growth and capitalism Could satiating the growing appetite for meat actually lead to our undoing Are we simply using one technology to undo the damage caused by another Like all problems in our food system the meat problem is not merely a problem of production It is intrinsically social and political and it demands that we examine questions of justice and desirable modes of living in a shared and finite world Benjamin Wurgaft tells a story that could utterly transform the way we think of animals the way we relate to farmland the way we use water and the way we think about population and our fragile ecosystem s capacity to sustain life He argues that even if cultured meat does not succeed it functions much like science fiction as a crucial mirror that we can hold up to our contemporary fleshy dysfunctions Beethoven: The Relentless Revolutionary John Clubbe,2019-07-09 A

fascinating and in depth exploration of how the Enlightenment the French Revolution and Napoleon shaped Beethoven s political ideals and inspired his groundbreaking compositions Beethoven imbibed Enlightenment and revolutionary ideas in his hometown of Bonn where they were fervently discussed in caf s and at the university Moving to Vienna at the age of twenty one to study with Haydn he gained renown as a brilliant pianist and innovative composer In that conservative city capital of the Hapsburg empire authorities were ever watchful to curtail and punish overt displays of radical political views Nevertheless Beethoven avidly followed the meteoric rise of Napoleon As Napoleon had made strides to liberate Europe from aristocratic oppression so Beethoven desired to liberate humankind through music He went beyond the musical forms of Haydn and Mozart notably in the Eroica Symphony and his opera Fidelio both inspired by the French Revolution and Napoleon John Clubbe illuminates Beethoven as a lifelong revolutionary through his compositions portraits and writings and by setting him alongside major cultural figures of the time among them Schiller Goethe Byron Chateaubriand and Goya

Augmented Reality Andrew Yeh Ching Nee,2011-12-09 Augmented Reality AR is a natural development from virtual reality VR which was developed several decades earlier AR complements VR in many ways Due to the advantages of the user being able to see both the real and virtual objects simultaneously AR is far more intuitive but it s not completely detached from human factors and other restrictions AR doesn t consume as much time and effort in the applications because it s not required to construct the entire virtual scene and the environment In this book several new and emerging application areas of AR are presented and divided into three sections The first section contains applications in outdoor and mobile AR such as construction restoration security and surveillance The second section deals with AR in medical biological and human bodies The third and final section contains a number of new and useful applications in daily living and learning *The Silent*

Rhetoric of the Body Matthew Craske, 2007 Matthew Craske looks closely at tomb sculptures in their social context. He discusses a large number of monuments by many different sculptors, all with a knowledge of the person commemorated and the circumstances behind the commission.

Monstrous Bodies/political Monstrosities in Early Modern Europe Laura Lunger Knoppers, Joan B. Landes, 2004 Multi-disciplinary in approach, cross-European in scope, this volume explores links between the political and the monstrous in Europe from the Renaissance to the 19th century. These essays stress the continual reinvention and polemical applications of the monstrous.

Enlightenment in an Age of Destruction Christopher Britt, Paul Fenn, Eduardo Subirats, 2018-01-30 This book is about the ways in which modern enlightenment, rather than liberating humanity from tyranny, has subjected us to new servitude imposed by systems of mass manipulation, electronic vigilance, compulsive consumerism, and the horrors of a seemingly unending global war on terror. The main intellectual aims of this title are the following: the analysis of spectacle, the criticism of providential enlightenment, and the examination of positive dialectics. The spectacle in this case is the apotheosis of the culture industries, a total inversion of reality and of our existences. Providential enlightenment is not only a critique of the failure of enlightenment but of the mutilation of historical enlightenments. Positive dialectics signal a new era of intellectual engagement in the construction of our historical future. During a time in which national democracies seem an imperial farce, it is not enough for intellectuals faced with all this destruction to blithely recommend resistance. The book thus ties American, British, French, and German theoretical traditions into a reflexive challenge to the notion of intellectual as critic and argues instead for a trespassive tradition of cultural leadership.

Advancing Information Systems Theories, Volume II Leslie P. Willcocks, Nik R. Hassan, Suzanne Rivard, 2023-10-14 Information systems research (IS) is an exciting multidisciplinary area that links the rapidly changing technology of information or communications and information technology (ICT) to the business and social environment. Lately, the discourse surrounding information and systems has leaped into the consciousness of the public in unprecedented ways through the rise of social media, the Internet of Things (IoT), fake news, and the weaponization of information, to name a few. Unfortunately, it has been felt that these developments are overtaking the ability of the IS field to address them in part because the field itself lacks its own native theories. It is well known that the IS field undertakes its research using theories from its reference disciplines such as management, social psychology, economics, communication, and computer science, but what this book offers is a clarification and implementation of the discipline's own foundational theory. This book is the companion volume to *Advancing Information Systems Theories Volume I* and part of a three-part series that aims to advance IS research. This volume addresses the products of information systems theories, examining design principles, information practice principles for robotics, and other concepts integral to developing theory. The book will be of interest to academics studying information systems, Big Data, digital business, information technology, innovation, management, and digital management.

Foodwise Wendy E. Cook, 2012-12-17 Wendy Cook's fascination with nutrition began during her war time

childhood In the midst of deprivation and food rationing the rich abundance of her mother s organic garden made a profound impression In her twenties married to Peter Cook she discovered the artistic and magical effects that food could have in creating a convivial atmosphere During this period she cooked for many well known names including John Lennon Paul McCartney Dudley Moore Peter Ustinov and Alan Bennett But it was only later through her daughter falling ill that she came to study and understand deeper aspects of nutrition and in particular the effects of different foods on human health and consciousness In Foodwise Wendy Cook presents a remarkable cornucopia of challenging ideas advice and commentary informed by the seminal work of the scientist Rudolf Steiner She begins the volume with biographical glimpses relating to her experience of food and how it has influenced her life She then presents an extraordinary perspective on the journey of human evolution relating it to changes in consciousness and the consumption of different foods In the following section she considers the importance of agricultural methods the nature of the human being the significance of grasses and grains the mystery of human digestion and the question of vegetarianism In the next section she analyses the building blocks of nutrition looking in some detail at the nutritional or otherwise qualities of many foodstuffs including carbohydrates minerals fats and oils milk and dairy products herbs and spices salt and sweeteners stimulants legumes the nightshade family bread water and dietary supplements She ends with practical tips on cooking planning menus children s food sharing meals and some mouth watering recipes Foodwise presents a treasure of wisdom and experience for anybody with a concern for the content of the food they eat or a desire to discover more about the physical soul and spiritual aspects of nutrition

The Sacred Revival Kingsley L. Dennis,2017-10-24 The Sacred Revival is a thought provoking examination of the social cultural and personal development that is part of a new and unfolding era in our history Its central thesis is that a new form of energy has entered our post industrial post mechanical epoch and that this energy will be more conducive to a respect for feminine attributes and organization and our inward interior search and gaze The author predicts there will be a healing of life on the planet from an emerging new planetary ecosystem that will be physical digital biological and a greater drive toward a coherent cosmic consciousness He explains that one of our greatest needs is for a connection with the transcendent The
