Prometheus Unbound Short Stories Paperback:

The Ghost of One's Self Paul Meehan, 2017-09-19 For millennia people have held folk beliefs about the existence of the doppelganger double walker in German a look alike second self that is often the antithesis of one's identity and is usually considered an omen of misfortune or death The theme of the double has inspired works by E T A Hoffmann Poe de Maupassant Dostoevsky and others and has been the basis for many classic mystery horror and science fiction movies This critical survey examines the double in more than 100 films by such acclaimed directors as Alfred Hitchcock Mario Bava Roger Corman David Cronenberg George Romero Fritz Lang James Cameron Robert Siodmak Don Siegel John Frankenheimer Terry Gilliam Brian De Palma and Roman Polanski

Catalogue of the Books in the Circulating Library ... Toronto Public Libraries,1904 The Oxford History of the Irish Book, Volume V Clare Hutton,Patrick Walsh,2011-06-23 Part of a series providing an authoritative history of the book in Ireland this volume comprehensively outlines the history of 20th century Irish book culture This book embraces all the written and printed traditions and heritages of Ireland and places them in the global context of a worldwide interest in book histories

Biological Diversity Paul E. Hatcher,Nick Battey,2011-03-23 Biological Diversity takes a fresh innovative approach to the teaching of biodiversity Rather than detailing and cataloguing the major taxa and their evolutionary relationships the authors have selected 18 groups of organisms and used these as a framework in which to discuss the species and their interactions with man and each other There is a strong narrative theme throughout the exploited and the exploiters and in many cases there is emphasis on the historical context A wide range of organisms are covered from the unicellular to birds and mammals and with an equal consideration of plants and animals Species have been chosen for their ability to best illustrate particular biological principles and for their strong interaction with other species After an introduction the book is divided into two parts Exploited and Exploiters Each of the chapters although linked to each other forms a stand alone essay They are scientifically rigorous up to date and do not shy away from addressing some controversial issues Chapters have text boxes highlighting important issues and concepts lists of further reading and references In addition to tables and figures the book has a selection of original illustrations drawn by leading artist Steven Appleby This fresh approach will appeal to all those interested in the biological sciences and aims to be accessible to people with a diversity of backgrounds It will prove particularly useful to biology students enabling them to get to grips with important biological principles and concepts that underpin the diversity of life and the interrelationship of humans with other groups of organisms
