Gordon, Wenn,

Andrew,2002-07-01 Information resource management is too often seen as a domain dominated by technology or at best one in which human considerations are secondary to and dependent on technological systems This title brings together chapters from Europe Australasia Canada and the Americas all drawn together by the common theme of the book It will present information management not as technology influenced by people but as fundamentally a people centred domain

International Cultural Policies and Power J. Singh,2010-01-20 Political scientists by and large ignore cultural industries and technologies whereas they are prominent in other disciplines This book provides insights from local societal national and international levels in understanding cultural industries technologies and policies and integrates these perspectives into the study of political science European Solidarities Lars Magnusson,2007 This volume discusses tensions between a market Europe and a social Europe between politics of serial dumping and politics of social protectionism and between Europe as a possibility and as a threat Democracies and Republics Between Past and Future Carlo Pelloso,2021-03-29 Democracies and Republics Between Past and Future focuses on the concepts of direct rule by the people in early and classical Athens and the tribunician negative power in early republican Rome and through this lens explores current political issues in our society This volume guides readers through the current constitutional systems in the Western world in an attempt to decipher the reasons and extent of the decline of the nexus between elections and democracy it then turns its gaze to the past in search of some answers for the future examining early and classical Athens and finally early republican Rome In discussing Athens it explores how an authentic power of the people is more than voting and something rather different from representation while the examples of Rome demonstrate thanks to the paradigm of the so called tribunician power the importance of institutionalised mechanisms of dialogic conflict between competing powers This book will be of primary interest to scholars of legal history both recent and ancient and to classicists but also to the more general reader with an interest in politics and history **Surveillance as Social Sorting** David Lyon,2005-08-19 The book moves the debate beyond alarmist Big Brother treatments or complacent assumptions that once fair information principles are in place all is well to a constructive and thought provoking level Communication Theory David Holmes,2005-04-23 This book offers an introduction to communication theory that is appropriate to our post broadcast interactive media environment The author contrasts the first media age of broadcast with the second media age of interactivity Communication Theory argues that the different kinds of communication dynamics found in cyberspace demand a reassessment of the methodologies used to explore media as well as new understandings of the concepts of interaction and community virtual communities and broadcast communities Indian Industrial Development and Globalisation S. K. Goyal,2009 Surinder Kumar Goyal b 1933 Indian industrial economist papers presented at the National Conference on Industrial Development and Economic Policy Issues held at New Delhi during 27 28 June 2008 **Public Art in Canada** Annie Gérin,James S. McLean,2011-03-18 Arguably public art is experienced daily by more people than most offerings in galleries yet our notion of what constitutes public art is surprisingly limited Public Art in

Canada broadens the critical discussion by exploring public art's varied means of engaging with public space and the public sphere. Annie G. Rin and James S. McLean have assembled contributions from new and established Canadian scholars, curators, and artists. Each contributor enlivens our understanding of public art as a practice and its place in the social and aesthetic formation of which it is a part. As a result, the book provides an overview of the current debates in the field of public art that are informed by the theories and critical literature of art history, communication studies, cultural studies, sociology, and urban studies. The rigorous essays and original works of art collected in this volume present a compelling demonstration of the strategies, aesthetic, and otherwise used by artists to elicit intellectual, sensual, or emotional responses that can only be obtained through artistic practices in public places. *Public Art in Canada* is a major contribution to the study of Canadian art and culture.

The Power of Networks Mikkel Flyverbom, 2011. Mikkel Flyverbom's *The Power of Networks* is a timely and important contribution to the emerging interdisciplinary study of cyberspace politics. In an exceptionally well-written and researched book, Flyverbom employs a form of ethnographic method to uncover the grounded practices that inform the many hybrid forums and entangled authorities of Internet governance. The book will be of interest to those who want a deeper understanding of the complexity and nuance of the many social forces shaping global cyberspace today. Ronald J. Deibert, University of Toronto, Canada. Flyverbom presents an original ethnography of the political ordering processes of the digital revolution. He lays bare the relational practices within hybrid global forums in which multiple actors are mobilized to participate, contest, and dialogue. The book makes an important contribution to emergent global politics governing technologies, networks, meanings, and people within the United Nations system. J. P. Singh, Georgetown University, US. With an ever-growing number of users, the Internet is central to the processes of globalization, cultural formations, social encounters, and economic development. These aside, it is also fast becoming an important political domain. Struggles over disclosure, access, and regulation are only the most visible signs that the Internet is quickly becoming a site of fierce political conflict involving states, technical groups, business, and civil society. As the debate over the global politics of the Internet intensifies, this book will be a valuable guide for anyone seeking to understand the emergence, organization, and shape of this new issue. In this vivid study, Mikkel Flyverbom captures how questions about the digital divide and the information revolution, dialogues with stakeholders, and networked forms of organization have become key features of the global politics of the Internet. Tracing the making and stabilization of this transnational issue in and around the United Nations over almost a decade, this book demonstrates how multi-stakeholder networks make new political domains accessible and unsettle established ways of organizing transnational governance. *The Power of Networks* offers a rich account of the practices and effects of organizing global politics and governance through dialogues and collaborations between governments, business, and societies the world over. Offering a novel analytical vocabulary for the study of ordering governance and organization, this innovative ethnographic study of hybrid organizations and entangled forms of power in global politics shows how insights from actor

network theory and the Foucauldian governmentality literature can reinvigorate studies of transnational governance and organizational processes

Global Technography Grant Kien, 2009 This series publishes critical scholarship that seeks to engage and transcend the disciplinary isolationism and genre confinement that now characterize so much of contemporary research in communication studies and related fields It focuses on studies that address the broad intersections and hybrid trajectories that define the encounters between human groups in modern institutions and societies and the way these intersections are represented in contemporary popular cultural forms of knowledge

Media Independence James Bennett, Niki Strange, 2014-11-20 Media independence is central to the organization make up working practices and output of media systems across the globe Often stemming from western notions of individual and political freedoms independence has informed the development of media across a range of platforms from the freedom of the press as the fourth estate and the rise of Hollywood's Independent studios and Independent television in Britain through to the importance of Indy labels in music and gaming and the increasing importance of independence of voice in citizen journalism Media independence for many therefore has come to mean working with freedom from state control or interference from monopoly from market forces as well as freedom to report comment create and document without fear of persecution However far from a stable concept that informs all media systems the notion of media independence has long been contested forming a crucial tension point in the regulation shape size and role of the media around the globe Contributors including David Hesmondhalgh Gholam Khiabany Jos van Dijck Hector Postigo Anthony Fung Stuart Allan and Geoff King demonstrate how the notion of independence has remained paramount but contested in ideals of what the media is for how it should be regulated what it should produce and what working within it should be like They address questions of economics labor relations production cultures ideologies and social functions

Surveillance and Democracy Kevin D. Haggerty, Minas Samatas, 2010-07-12 This collection represents the first sustained attempt to grapple with the complex and often paradoxical relationships between surveillance and democracy Is surveillance a barrier to democratic processes or might it be a necessary component of democracy How has the legacy of post 9 11 surveillance developments shaped democratic processes As surveillance measures are increasingly justified in terms of national security is there the prospect that a shadow security state will emerge How might new surveillance measures alter the conceptions of citizens and citizenship which are at the heart of democracy How might new communication and surveillance systems extend or limit the prospects for meaningful public activism Surveillance has become central to human organizational and epistemological endeavours and is a cornerstone of governmental practices in assorted institutional realms This social transformation towards expanded intensified and integrated surveillance has produced many consequences It has also given rise to an increased anxiety about the implications of surveillance for democratic processes thus raising a series of questions about what surveillance means and might mean for civil liberties political processes public discourse state coercion and public consent that the leading surveillance scholars gathered here address
