Promising Practices in Indigenous Teacher Education Paul Whitinui, Carmen Rodriguez de France, Onowa McIvor, 2017-10-28 This book provides a comprehensive overview of navigating the on going systemic challenges hardships and problems facing many indigenous teacher education programs today helping to foster a commitment to developing quality indigenous teacher education programs that are sustainable distinctive and excellent However despite a growing cadre of indigenous peoples working in teacher education there is still a noticeable gap between the uptake of what is being taught in conventional teacher education programs and how this translates to what we see student teachers doing in the classroom The often tricky and complex nature of indigenous teacher education programming also means that there are multiple realities approaches and pathways that require greater communication collaboration and cooperation The very nature of this complexity the book suggests requires a strength based and future focused approach built on trust integrity courage and respect for indigeneity as well as an understanding of what it means to be indigenous The examples and experiences presented identify a number of promising practices that work well in current indigenous teacher education programs and beyond By promoting a greater appreciation for the inclusion of culturally relevant practices in teacher education the book aims to breathe new life into the hopes dreams and aspirations of indigenous teacher education programs moving forward

Promising Practices for Strengthening the Regional STEM Workforce Development Ecosystem National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Improving Higher Education's Responsiveness to STEM Workforce Needs: Identifying Analytical Tools and Regional Best Practices, 2016-03-12 U S strength in science technology engineering and mathematics STEM disciplines has formed the basis of innovations

technologies and industries that have spurred the nation's economic growth throughout the last 150 years. Universities are essential to the creation and transfer of new knowledge that drives innovation. This knowledge moves out of the university and into broader society in several ways through highly skilled graduates, i.e., human capital, academic publications, and the creation of new products, industries, and companies via the commercialization of scientific breakthroughs. Despite this, our understanding of how universities receive, interpret, and respond to industry signaling demands for STEM-trained workers is far from complete. Promising Practices for Strengthening the Regional STEM Workforce Development Ecosystem reviews the extent to which universities and employers in five metropolitan communities—Phoenix, Arizona; Cleveland, Ohio; Montgomery, Alabama; Los Angeles, California; and Fargo, North Dakota—collaborate successfully to align curricula, labs, and other undergraduate educational experiences with current and prospective regional STEM workforce needs. This report focuses on how to create the kind of university-industry collaboration that promotes higher quality college and university course offerings, lab activities, applied learning experiences, work-based learning programs, and other activities that enable students to acquire knowledge, skills, and attributes they need to be successful in the STEM workforce. The recommendations and findings presented will be most relevant to educators, policy makers, and industry leaders.

Best Practices in Sustainable Development Goals Sujit Kumar Paul, K. Gireesan, 2025-06-17. Best Practices in Sustainable Development Goals is a book that showcases the models, approaches, and experiences from different parts of the world. This edited book captures some of the best practices in SDGs from the global, the regional, the national, and the local, with inputs from a number of institutions, organizations, and individuals who are working with and working for sustainable development. It reiterates that the journey towards achieving the SDGs is a collective endeavour that requires adaptability, unwavering commitment, and resilience from all the stakeholders. As we engage with the SDGs in our own communities and spheres of influence, we shall remain steadfast in our belief and conviction that together we can create a sustainable, equitable, and prosperous future for all that includes the flora and fauna as well. It is a wakeup call for each one of us to adopt, follow, and sustain the ecosystem-based approach in our life as a cardinal principle. The time for action is now, and the possibilities are limitless.
