Silent Or Salient Gender? Hanne Løland, 2008 Hanne Loland studies gendered god language in the Hebrew Bible She offers a theoretical framework that is helpful for the interpretation of biblical language used in reference to God and for the broader theological and scholarly debate on God and gender One of the main questions Loland discusses is whether and how gender is salient that is of significance when gendered god language occurs in a text This is a new line of questioning in Hebrew Bible research which so far has been mostly concerned with mapping the occurrences of feminine god language The question of gender significance is debated both in theoretical discussions on God gender and language and in three case studies Isa 42 13 14 46 3 4 and 49 14 15 These texts are chosen primarily because of today's research situation where there has been a claim that Isa 40 55 or 40 66 differs from the rest of the Hebrew Bible in its use of feminine god language Loland argues that there is in principle no difference between god language formulated in similes or metaphors Further there is no significant difference between male and female god language in the Hebrew Bible These findings are also relevant for the contemporary debate concerning god language in academia church and synagogue This volume was recognized with the John Templeton Award for Theological Promise in 2008

Queer Excursions Lal Zimman, Jenny Lynn Davis, Joshua Raclaw, 2014 Across scholarship on gender and sexuality binaries like female versus male and gay versus straight have been problematized as a symbol of the stigmatization and erasure of non normative subjects and practices The chapters in *Queer Excursions* offer a series of distinct perspectives on these binaries as well as on a number of other less immediately apparent dichotomies that nevertheless permeate the gendered and sexual lives of speakers Several chapters focus on the limiting or misleading qualities of binaristic analyses while others suggest that binaries are a crucial component of social meaning within particular communities of study Rather than simply accepting binary structures as inevitable or discarding them from our analyses entirely based on their oppressive or reductionary qualities this volume advocates for a re theorization of the binary that affords more complex and contextually grounded engagement with speakers own orientations to dichotomous systems It is from this perspective that contributors identify a number of diverging conceptualizations of binaries including those that are

non mutually exclusive those that liberate in the same moment that they constrain those that are imposed implicitly by researchers and those that re contextualize familiar divisions with innovative meanings Each chapter offers a unique perspective on locally salient linguistic practices that help constitute gender and sexuality in marginalized communities As a collection Queer Excursions argues that researchers must be careful to avoid the assumption that our own preconceptions about binary social structures will be shared by the communities we study Telling Moments Lynda Hall,2003-11-15
