A Grammar of Rapa Nui Paulus Kieviet, This book is a comprehensive description of the grammar of Rapa Nui the Polynesian language spoken on Easter Island After an introductory chapter the grammar deals with phonology word classes the noun phrase possession the verb phrase verbal and nonverbal clauses mood and negation and clause combinations The phonology of Rapa Nui reveals certain issues of typological interest such as the existence of strict conditions on the phonological shape of words word final devoicing and reduplication patterns motivated by metrical constraints For Polynesian languages the distinction between nouns and verbs in the lexicon has often been denied in this grammar it is argued that this distinction is needed for Rapa Nui Rapa Nui has sometimes been characterised as an ergative language this grammar shows that it is unambiguously accusative Subject and object marking depend on an interplay of syntactic semantic and pragmatic factors Other distinctive features of the language include the existence of a neutral aspect marker a serial verb construction the emergence of copula verbs a possessive relative construction and a tendency to maximise the use of the nominal domain Rapa Nui s relationship to the other Polynesian languages is a recurring theme in this grammar the relationship to Tahitian which has profoundly influenced Rapa Nui especially deserves attention The grammar is supplemented with a number of interlinear texts two maps and a subject index *Elementary English, Spoken*

Great Grammar Lessons that Work Lee Karnowski, 2000 A hands-on discovery mode of teaching English grammar using a variety of techniques.

Nouns and the Morphosyntax / Semantics Interface Laure Gardelle, Elise Mignot, Julie Neveux, 2024-03-21 This edited book seeks to bridge a gap in the existing literature on nouns by exploring the exact relationship between their formal and semantic characteristics. The introductory chapter offers a thorough state of the art on the morphosyntactic and semantic angles in definitions of nouns, provides evidence of misalignments between morphosyntactic and semantic features, and argues that a multi-criterial angle is in fact inherent in the definition of the class of nouns. The following chapters bring together a representative cross-section of international level research on the morphosyntax semantics interface for nouns, covering a wide variety of languages from French-based creoles, German, and Japanese to English, French, Italian, Russian, and Uzbek. The focus of the volume is to take a special focus on the currently underestimated dynamic interplay between morphosyntax and semantics at both language and discourse levels. It will be of interest primarily to academics, specialists of nouns, as well as anyone interested in the interplay between morphology, syntax, and semantics, and graduate students in areas such as syntax, semantics, morphology, theoretical linguistics, and discourse analysis.
