Proportion Philosophy Science And Architecture:

Proportion Richard Padovan,1999 This handbook provides readers with a well illustrated and readable comparative guide to proportion systems in architecture setting out the mathematical principles that underlie the main systems and illustrating these with examples of their use in historical and modern buildings The main body of the text traces the interplay of abstraction and empathy through the history of science philosophy and architecture from the early Greeks through to the two early twentieth century architects who made proportion the focus of their work Le Corbusier and Van der Laan The book ends with a reflection on the present and future role of proportion in architecture *Proportion* Richard Padovan,1999

Architecture as Communication Ross A. Eaman,2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate **Modernity, Frontiers and Revolutions** Maria do Rosário Monteiro,Mário S. Ming Kong,Maria João Pereira Neto,2018-09-25 The texts presented in Proportion Harmonies and Identities PHI MODERNITY FRONTIERS AND REVOLUTIONS were compiled with the intent to establish a multidisciplinary platform for the presentation interaction and dissemination of research It also aims to foster awareness of and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture Arts and Humanities Design Engineering Social and Natural Sciences and their importance and benefits for the sense of both individual and community identity The idea of modernity has been a significant driver of development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts *With(Out) Trace: Interdisciplinary Investigations into Time, Space and the Body* Simon Dwyer,Rachel Franks,Reina Green,2019-07-22 This volume was first published by Inter Disciplinary Press in 2015 This book With out Trace Inter Disciplinary Investigations into

Time Space and the Body unpacks many of the issues that surround the idea of trace what we intentionally an unintentionally leave behind as well as how trace can help us to move forward In particular this volume looks at how an inter disciplinary approach can suggest new ways of seeing and subsequently exploring interconnections between time space and the body The papers within this work accomplish more than tracing a theme a theory or discipline within the study of time space and the body Moreover the collection does not simply trace past debates about the relationship between the three Indeed the interdisciplinarity of this collection will it is hoped suggest other ways of seeing the field and of tracing new paths through it Exploring those new perspectives and new paths will undoubtedly enrich future thinking about the interconnections between time space and the body

Interpretation in Architecture Adrian Snodgrass,Richard Coyne,2013-05-13 Drawing on cultural theory phenomenology and concepts from Asian art and philosophy this book reflects on the role of interpretation in the act of architectural creation bringing an intellectual and scholarly dimension to real world architectural design practice For practising architects as well as academic researchers these essays consider interpretation from three theoretical standpoints or themes play edification and otherness Focusing on these the book draws together strands of thought informed by the diverse reflections of hermeneutical scholarship the uses of digital media and studio teaching and practice

Architectural Humanities in Progress Bagoes Wiryomartono,2022-02-02 This monograph brings three branches of philosophy together epistemology ethics and aesthetics It assesses the built environment as a case study from a phenomenological perspective Under the notion of phenomenology this study understands the built environment as the hermeneutical phenomenon of being in the life world that is experienced by people within the socio cultural and historical context of habitation Hermeneutically the built environment as a phenomenon is contextually interwoven with other phenomena within the socio cultural historical and environmental network

Phenomenologically speaking the task of the study is to excavate listen to unfold divulge and reconstruct the socio culturally environmentally and historically constructed relationship between people and their built environment that build develop and elaborate the system of knowledge ethics and aesthetics By and large its nature and findings are theoretical and interdisciplinary so it will be of interest not only for philosophers but also to scholars studying urban development and anthropology Nexus Network Journal 8,1 ,2006-07-14 From ancient to modern architects have looked for fundamental underlying principles of geometry and proportion on which to found their designs Such principles not only provide an order for the formal elements they ground the architecture in timeless values and provide an order for the formal elements they ground the architecture in timeless values and provide a source of cultural meaning This book illustrates the use of fundamental principles of geometry and proportion in two ancient cultures the Bronze Age and the Roman Age as well as in twentieth century North America **Well Worth a Shindy** Sarah Brandes Madry,2004-03 Well Worth a Shindy tells the story of the Old Well beloved symbol of the University of North Carolina at Chapel Hill the United States first public university The Old Well is a Greco Roman garden temple built in 1897 over an old water well on the campus The facts concerning the Old Well s beginnings serve to introduce an historical study of the round temple from Mycenaean tholos tombs and treasuries to eighteenth century English garden follies The reasons that the Old Well was built according to its commissioner Edwin Alderman the sixth president of the University of North Carolina are repetitious of those that directed such as Alexander the Great Augustus Caesar and Ferdinand and Isabella of Spain to build round temples to be symbols of their territorial and dynastic desires The mythological philosophical and artistic conventions that Alderman and the designer of the Old Well Eugene Lewis Harris used to construct the temple were not new but were ancient guides filtered through Medieval and Renaissance prisms A catalog of over 100 round structures in 14 countries is provided **The Architect, the Cook and Good Taste** Petra Hagen Hodgson,Rolf Toyka,2007-03-29 Since time immemorial cooking and building have been among humanity s most basic occupations Both of them are rooted in necessity but both of them also possess a cultural as well as a sensory aesthetic dimension And while it is true that cooking is a transitory art form it gives expression to the periods of human cultural history just as architecture does Moreover both arts accord a central role to the materials employed Both involve measuring and proportioning shaping and designing assembling and composing This book pursues the astonishing parallels and deeply rooted connections between the art of building and that of cooking A variety of essays takes up questions of materiality and proportioning Attention will also be given to food cultivation and architecture to the places where meals are prepared as well as a range of different culinary spaces With articles by Annette Gigon Stanislaus von Moos Claudio Silvestrin Ian Ritchie and others *The Golden Ratio* Gary B. Meisner,2018-10-23 This enlightening and gorgeously illustrated book explores the beauty and mystery of the divine proportion in art architecture nature and beyond From the pyramids of Giza to quasicrystals to the proportions of the human face the golden ratio has an infinite capacity to generate

shapes with exquisite properties Author Gary Meisner has spent decades researching the subject investigating and collaborating with people across the globe in dozens of professions and walks of life In The Golden Ratio he shares his enlightening journey Exploring the long history of this fascinating number as well as new insights into its power and potential applications The Golden Ratio invites you to take a new look at this timeless topic *Roadmap to the Virginia Sol: Eoc World History* Laura York, Princeton Review, 2005

Turning Images in Philosophy, Science, and Religion Charles Taliaferro, Jil Evans, 2011-11-17 This engaging collection of essays locates the debate between theism and naturalism in the broader context of reflection on imagination and aesthetics The eleven original essays will be of interest to anyone who is fascinated by the power of imagination and the role of aesthetics in deciding between worldviews or philosophies of nature
