

River

We drift side by side
Like a river stream, separated
By a rock, flowing into
An ocean of emptiness

Not touching
Not speaking

Longing for other part
of your body and soul,
to merge
And become one

Not seeing
Not merging

Is this what death
Feels like? Cleaved in
Half and waiting to fall
out of the consciousness?

Not together
Not living

Griffin,2009 This text engages with current conversations in the popular field of creative nonfiction which ranges across memoir and biography the essay and literary journalism Designed to meet the growing need resulting from a burgeoning interest in narrative nonfiction *To Tell the Truth* emphasizes key elements common to all three major branches of the genre It assists creative nonfiction writers in developing a writing practice modeled to their unique needs it addresses the practical tasks of applying elements of craft in the actual process of generating shaping developing and revising material and it includes contemporary models that represent the rich range and diversity of the genre A key feature of the text one seldom found in books on the subject is the inclusion of a writers on writing section in each chapter providing personal essays that reveal writers internal processes that quirky quality we call creativity bringing in writers revelations about uniquely individual approaches to foiling the inner critic and breaking through writer s block *MultiCultural Review* ,2007 *American Book Publishing Record* ,2003

Multicultural Education ,2004 *Forthcoming Books* Rose Arny,2003-04 **Polish Flows** Bernadeta Niesporek-Szamburska,Małgorzata Wójcik-Dudek,Magdalena Ochwat,2025-11-10 The contributors attempt to describe Polish rivers and lakes as a nexus of narratives about nature culture pointing out those elements of the story around which scientific political media social and ecological narratives are created All of them influence the shape of reflection on the water ecosystem and its function in Polish education The authors recreate old and contemporary Polish mythmaking narratives about Polish rivers and lakes and by proposing a critical reading of them try to develop new educational practices that would take into account the 21st century conditions related to the climate catastrophe The context related to the crisis also opens up thinking about rivers to other categories cooperation solidarity activism than those that have been applicable in Polish education so far national symbolism utility **Space in America** Klaus Benesch,Kerstin Schmidt,2005 America s sense of space has always been tied to what Hayden White called the narrativization of real events If the awe inspiring manifestations of nature in America Niagara Falls Virginia s Natural Bridge the Grand Canyon etc were often used as a foil for projecting utopian visions and idealizations of the nation s exceptional place among the nations of the world the rapid technological progress and its concomitant appropriation of natural spaces served equally well as David Nye argues to promote the dominant cultural idiom of exploration and conquest From the beginning American attitudes towards space were thus utterly contradictory if not paradoxical a paradox that scholars tried to capture in such hybrid concepts as the middle landscape Leo Marx an engineered New Earth Cecelia Tichi or the technological sublime David Nye Not only was America s concept of space paradoxical it has always also been a contested terrain a site of continuous social and cultural conflict Many

foundational issues in American history the dislocation of Native and African Americans the geo political implications of nation building immigration and transmigration the increasing division and clustering of contemporary American society etc involve differing ideals and notions of space Quite literally space and its various ideological appropriations formed the arena where America's search for identity national political cultural has been staged If American democracy as Frederick Jackson Turner claimed is born of free land then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical social and political spaces of America and its concomitant narratives The number and range of topics interests and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled contentious relations of space in America Topics include Theories of Space Landscape Nature Technoscape Architecture Urban Utopia Literature Performance Film Visual Arts
