Low-Volume Road Engineering Robert A. Douglas,2018-10-09 Everything that sustains us grown mined or drilled begins its journey to us on a low volume road Long Defined as roads with traffic volumes of no more than 400 vehicles per day they have enormous impacts on economies communication and social interaction Low volume roads comprise at one end of the spectrum farm to market roads roads in developing countries northern roads roads on aboriginal lands and parklands and at the other end of the spectrum heavy haul roads for mining oil and gas oil sands extraction and forestry Low Volume Road Engineering Design Construction and Maintenance gives an international perspective to the engineering design of low volume roads and their construction and maintenance It is a single reference drawing from the dispersed literature It lays

out the basic principles of each topic from road location and geometric design pavement design slope stability and erosion control through construction to maintenance then refers the reader to more comprehensive treatment elsewhere Wherever possible comparisons are made between the standard specifications and practices existing in the US Canada the UK South Africa Australia and New Zealand Topics covered include the following Road classification location and geometric design Pavement concepts materials and thickness design Drainage erosion and sediment control and watercrossings Slope stability Geosynthetics Road construction maintenance and maintenance management Low Volume Road Engineering Design Construction and Maintenance i s a valuable reference for engineers planners designers and project managers in consulting firms contracting firms and NGOs It also is an essential reference in support of university courses on transportation engineering and planning and on mining oil and gas and forestry infrastructure **Municipal Engineering** ,1910

Slope Engineering for Mountain Roads Gareth J. Hearn,2011 Provides a complete guide to the study design construction and management of landslide and slope engineering measures for mountain roads with emphasis on low cost The geographical focus is on the tropics and sub tropics but is also highly relevant to other regions where heavy rain steep slopes and weak soils and rocks combine to create slope instability The causes and mechanisms of landslides are described and the hazards they pose to mountain roads are illustrated Methods of desk study field mapping and ground investigation are reviewed and illustrated with emphasis on geomorphological and engineering geological techniques The design and construction of alignments earthworks drainage retaining structures the stabilization of soil slopes and rock slopes and the control of erosion on slopes and in streams covered Slope management as part of road maintenance and operation is reviewed and procedures for risk assessment and works prioritization are described **Paving and Municipal**
