Seeking a Future for the Past Philipp Demgenski, 2024-02-19 Seeking a Future for the Past: Space, Power, and Heritage in a Chinese City examines the complexities and changing sociopolitical dynamics of urban renewal in contemporary China. Drawing on ten years of ethnographic fieldwork in the northeastern Chinese city of Qingdao, the book tells the story of the slow, fragmented, and contentious transformation of Dabaodao, an area in the city's former colonial center from a place of common homes occupied by the urban poor into a showcase of architectural heritage and site for tourism and consumption. The ethnography provides a nuanced account of the diverse experiences and views of a range of groups involved in shaping and being shaped by the urban renewal process: local residents, migrant workers, preservationists, planners, and government officials, foregrounding the voices and experiences of marginal groups such as migrants in the city. Unpacking structural reasons for urban developmental impasses, it paints a nuanced local picture of urban governance and political practice in contemporary urban China. Seeking a Future for the Past also weighs the positives and negatives of heritage preservation and scrutinizes the meanings and effects of preservation on diverse social actors. By zeroing in on the seemingly contradictory yet coexisting processes of urban stagnation and urban destruction, the book reveals the multifaceted challenges that China faces in reforming its urbanization practices and ultimately in managing its urban future.

The Way to Build a Community with a Shared Future for Mankind International Joint Study Report No.6 Wang Linggui, Zhao Jiangli, 2019-11-01 No. 6 2018

The Future We Need Erica Smiley, Sarita Gupta, 2022-04-15 In *The Future We Need*, Erica Smiley and Sarita Gupta bring a novel perspective to building worker power and what labor organizing could look like in the future, suggesting ways to evolve collective bargaining to match the needs of modern people, not only changing their wages and working conditions but being able to govern over more aspects of their lives. Weaving together stories of real working people, Smiley and Gupta position the struggle to build collective bargaining power as a central element in the effort to build a healthy democracy and explore both existing levers of power and new ones we must build for workers to have the ability to negotiate in today and tomorrow's contexts. *The Future We Need* illustrates the necessity of centralizing the fight against white supremacy and gender

discrimination while offering paths forward to harness the power of collective bargaining in every area for a new era

Baku-Tbilisi-Kars Railroad: Future Opportunities and Prospects Mahir Humbatov, Evaldas Klimas, 2016-11-11 After centuries of neglect the land transport corridors connecting Asia and Europe are on the brink of a rebirth From practically nothing a revived network of these land corridors is likely to lead to a considerable share of the freight revenues being generated by the increased trade between Asia and Europe That is why there is fierce competition among the major players for control in shaping the Asia Europe railway transport corridors However there are also new and exciting possibilities for cooperation among the various players We will extensively examine and evaluate the transport corridors linking Asia and Europe The Baku Tbilisi Kars railway project will be assessed from the perspectives of the three

countries involved Azerbaijan Georgia and Turkey It has been shown that the railroad will economically strengthen the region and better integrate the three host countries into international transport corridors The Baku Tbilisi Kars railroad will certainly play a key role in helping to revive the Silk Road connection thereby creating common interests and facilitating the transformation of the region The BTK transport corridor will not only stimulate the economies of the countries involved but help wean them their off oil dependence and restore their rightful place as major commercial hubs along the once legendary Silk Road The attraction of direct foreign investment and establishment of partnerships between the public and private sectors are key issues that will be explored in depth in this book By 2025 the region is expected to become a prosperous financial sector and transit area a comprehensive strategy to that end which incorporates the principles of sustainable growth is being formulated by the countries involved

Future Design for Creating a World Worth Inheriting

Tatsuyoshi Saijo,2025-04-19 Our world stands at a critical crossroads While world leaders wage wars and pursue aggression humanity faces mounting future failures burdens we re leaving for generations yet unborn Scientists warn that carbon emissions nitrogen cycles and biodiversity loss have already reached dangerous tipping points Yet we possess what we call futurability the capacity to find joy in creating happiness for future generations even at the expense of immediate gains However our current society isn t structured to nurture this vital human trait Drawing inspiration from the Iroquois seventh generation principle we ve developed and tested innovative social mechanisms through rigorous laboratory experiments and real world applications This book Future Design for Creating a World Worth Inheriting presents our vision and practical framework for redesigning society to activate our collective futurability Through years of research and implementation we ve created concrete solutions that can transform how we make decisions about our shared future Join us in this crucial endeavor to create a world our descendants will thank us for a world truly worth inheriting

Chinese Way, The: Overcoming Challenges For A Shared Future Fabio Massimo Parenti,2023-07-07 The book aims to communicate to readers in a clear fluent and well documented fashion the new role that China plays in the geography of world power evaluating its weight influence and impact on future developments China s ambition and its vision of international affairs can be summed up in Beijing s desire to build a community of common destiny for mankind Behind this concept lies the desire to present itself as a peaceful nation interested in a common global development in full compliance with the principles embraced by the United Nations to be achieved through win win relationships capable of bringing mutual benefits to the actors engaged in international cooperation China has experienced extraordinary growth in recent decades and intends to continue carving out the space it deserves in various international fora According to the author this does not necessarily represent a threat as its Western detractors contend given the People s Republic s intention to achieve its goals through mutual respect spatial interconnection and long term productive investments The book has been published in Italy by Meltemi and is in course of publication by the Chinese publisher New Star Press Those who deal with China are well aware that the West s gaze on the

People's Republic has often been dismissive superficial and distorted A sort of festival of stereotyped opinions with value judgments constantly used to highlight the West's alleged superiority vis vis the Chinese model Regardless of whether one likes the Chinese political economic system or not no country can avoid engaging with it Especially if we consider that the exhaustion of the propulsive thrust of Western globalization is increasingly evident and corresponds conversely to the rise of a new constructive globalization with Chinese characteristics Fabio Massimo Parenti Youtube Author's commentary

share option for new supply chains Examples from various industries provide some well proven engineering principles how to adapt those for the future mobility for the benefit of the users The aim of the book is to raise awareness that the safety provided by a product a means of transport or a system up to an entire traffic system depends on the capabilities of the various actors In addition to the driver and passengers there are also other road users maintenance personnel and service providers who must have certain abilities to act safely in traffic These are also the capabilities of the organisation not only the organisation that develops or brings the product to market but also the organisation that is responsible for the operation and the whole lifecycle of the products The book is for people who want to get involved in the mobility of the future People that have ideas to become a player who want to help shape the future mobility of society and who want to bring responsible solutions for users into the market

The On-line Electric Vehicle Nam P. Suh, Dong Ho Cho, 2017-04-04 This book details the design and technology of the on line electric vehicle OLEV system and its enabling wireless power transfer technology the shaped magnetic field in resonance SMFIR The text shows how OLEV systems can achieve their three linked important goals reduction of CO₂ produced by ground transportation improved energy efficiency of ground transportation and contribution to the amelioration or prevention of climate change and global warming SMFIR provides power to the OLEV by wireless transmission from underground cables using an alternating magnetic field and the reader learns how this is done This cable network will in future be part of any local smart grid for energy supply and use thereby exploiting local and renewable energy generation to further its aims In addition to the technical details involved with design and realization of a fleet of vehicles combined with extensive subsurface charging infrastructure practical issues such as those involved with pedestrian safety are considered Furthermore the benefits of reductions in harmful emissions without recourse to large banks of batteries are made apparent Importantly the use of Professor Suh's axiomatic design paradigm enables such a complicated transportation system to be developed at reasonable cost and delivered on time The book covers both the detailed design and the relevant systems engineering knowledge and draws on experience gained in the successful implementation of OLEV systems in four Korean cities The introduction to axiomatic design and the in depth discussion of system and technology development provided by The On line Electric Vehicle is instructive to graduate students in electrical mechanical and transportation engineering and will help engineers and designers to master the efficient timely and to cost implementation of large scale networked systems Managers responsible for the running of large transportation infrastructure projects and concerned with technology management more generally will also find much to interest them in this book

The Future Regulation of Work Nicole Busby, Douglas Brodie, Rebecca Zahn, 2016-04-01 Labour law is in crisis Global economic factors and the changing contours of work and workplace relations have led to a reorientation of the social economic political and cultural environment within which labour law has developed This is not a jurisdictional problem but rather is deeply entrenched in transnational development Solutions must recognise and mobilise the transformational shift that has taken

place over recent decades Law should be viewed as a force for and a facilitator of change capable of expressing and determining social relations The essays in this book explore the challenges posed by labour law s potential reinvention as a discipline fit for accommodating and investigating such change within a range of different but connected jurisdictional and regulatory concepts and paradigms
