Roads To Commensurability:

Roads to Commensurability D. Pearce, 2012-12-06 How many miles to Babylon Three score and ten Can I get there by candle light Yes and back again If your heels are nimble and light You may get there by candle light Any philosopher who takes more than a fleeting interest in the sciences and their development must at some stage confront the issue of incommensurability in one or other of its many manifestations For the philosopher of science concerned with problems of conceptual change and the growth of knowledge matters of incommensurability are of paramount concern After many years of skating over skimming through and skirting round this issue in my studies of intertheory relations in science I decided to take the plunge and make the problem of incommensurability the central and unifying theme of a book The present volume is the result of that decision My interest in problems of comparability and commensurability in science was awakened in the formative years of my philosophical studies by my teacher Jerzy Giedymin From him I have learnt not only to enjoy philosophical problems but also to beware of simpleminded solutions to them The vibrant seminars of Paul Feyerabend held at Sussex University in 1974 left me in no doubt that incommensurability was and would remain a major topic of debate and dispute in the philosophical study of human knowledge

Incommensurability and Related Matters

Paul Hoyningen-Huene, H. Sankey, 2013-04-17 Incommensurability and Related Matters draws together some of the most distinguished contributors to the critical literature on the problem of the incommensurability of scientific theories It addresses all the various problems raised by the problem of incommensurability such as meaning change reference of theoretical terms scientific realism and anti realism rationality of theory choice cognitive aspects of conceptual change as well as exploring the broader implications of incommensurability for cultural difference While it offers new work and new directions of discussion on the topic of incommensurability the book also recapitulates the history of the discussion of the topic that has taken place within the literature on incommensurability

Incommensurability and Cross-Language Communication

Xinli Wang, 2017-05-15 A dominant epistemological assumption behind Western philosophy is that it is possible to locate some form of commonality between languages traditions or cultures such as a common language or lexicon or a common notion of rationality which makes full linguistic communication between them always attainable Xinli Wang argues that the thesis of incommensurability challenges this assumption by exploring why and how linguistic communication between two conceptually disparate languages traditions or cultures is often problematic and even unattainable According to Wang's presuppositional interpretation of incommensurability the real secret of incommensurability lies in the ontological set ups of two competing presuppositional languages This book provides many original contributions to the discussion of incommensurability and related issues in

philosophy and offers valuable insights to scholars in other fields such as anthropology communication linguistics scientific education and cultural studies *Legal Traditions of the World* H. Patrick Glenn, 2014 *Legal Traditions of the World* places national laws in the broader context of major legal traditions those of chthonic or indigenous law talmudic law civil law Islamic law common law Hindu law and Confucian law Each tradition is examined in terms of its institutions and substantive law its founding concepts and methods its attitude towards the concept of change and its teaching on relations with other traditions and peoples The concept of legal tradition is explained as non conflict in character and compatible with new and inclusive forms of logic **Law and Justice in a Multistate World: Essays in Honor of Arthur T. von Mehren** James

Nafziger, Symeon Symeonides, 2022-06-08 For over half a century Arthur T von Mehren has been a luminary in the fields of comparative law private international law and legal education Here fifty eight of the world's leading scholars and jurists honor his work and outstanding contributions to the advance of knowledge and reform The volume is divided into four illuminating sections Part I Jurisdiction Judgment Part II Choice of Law Part III International Arbitration Part IV Comparative European Law Published under the Transnational Publishers imprint *Imre Lakatos and Theories of Scientific Change* K. Gavroglu, Yorgos Goudaroulis, P. Nicolacopoulos, 2012-12-06 How happy it is to recall Imre Lakatos Now fifteen years after his death his intelligence wit generosity are vivid In the Preface to the book of *Essays in Memory of Imre Lakatos* Boston Studies 39 1976 the editors wrote Lakatos was a man in search of rationality in all of its forms He thought he had found it in the historical development of scientific knowledge yet he also saw rationality endangered everywhere To honor Lakatos is to honor his sharp and aggressive criticism as well as his humane warmth and his quick wit He was a person to love and to struggle with The book before us carries old and new friends of that Lakatosian spirit further into the issues which he wanted to investigate That the new friends include a dozen scientific historical and philosophical scholars from Greece would have pleased Lakatos very much and with an essay from China he would have smiled all the more But the key lies in the quality of these papers and in the imaginative organization of the conference at Thessaloniki in summer 1986 which worked so well

Logic, Methodology and Philosophy of Science VIII J.E. Fenstad, I.T. Frolov, R. Hilpinen, 1989-08-16 *Logic Methodology and Philosophy of Science VIII* presents the results of recent research into the foundations of science The volume contains 37 invited papers presented at the Congress covering the areas of Logic Mathematics Physical Sciences Biological Sciences and the Humanities *Greek Studies in the Philosophy and History of Science* P. Nicolacopoulos, 2012-12-06 Our Greek colleagues in Greece and abroad must know indeed they do know how pleasant it is to recognize the renaissance of the philosophy of science among them with this fine collection Classical and modern technical and humane historical and logical admirably original and respectfully traditional these essays will deserve close study by philosophical readers throughout the world Classical scholars and historians of science likewise will be stimulated and the historians of ancient as well as modern philosophers too Reviewers might note one or more of the contributions as of special interest or as subject to critical

wrestling that ancient tribute we will simply congratulate Pantelis Nicolacopoulos for assembling the essays and presenting the book and we thank the contributors for their works and for their happy agreement to let their writings appear in this book R S C xi INTRODUCTION Neither philosophy nor science is new to Greece but philosophy of science is There are broader socio historical and more specific academic reasons that explain to a satisfactory degree both the under development of philosophy and history of science in Greece until recently and its recent development to international standards It is perhaps not easy to have in mind the fact that the modern Greek State is only 160 years old during quite a period of which it was considerably smaller than it is today its present territory having been settled after World War II
