How Nature Works Sarah Besky, Alex Blanchette, 2019-10-15. We now live on a planet that is troubled, even overworked, in ways that compel us to reckon with inherited common sense about the relationship between human labor and nonhuman nature. In Paraguay, fast-growing soy plants are displacing both prior crops and people. In Malaysia, dispossessed farmers are training captive orangutans to earn their own meals. In India, a prized dairy cow suddenly refuses to give more milk. Built from these sorts of scenes and sites where the ultimate subjects and agents of work are ambiguous, *How Nature Works* develops an anthropology of labor that is sharply attuned to the irreversible effects of climate change, extinction, and deforestation. The authors of this volume push ethnographic inquiry beyond the anthropocentric documentation of human work on nature in order to develop a language for thinking about how all labor is a collective ecological act.

Buzz Lisa Jean Moore, Mary Kosut, 2013-09-27. Winner 2014 Distinguished Scholarship Award presented by the Animals we can create buzz: we have worker bees, drones, and Queen bees; we establish collectives and even have communities that share a hive mind. In *Buzz*, authors Lisa Jean Moore and Mary Kosut convincingly argue that the power of bees goes beyond the food cycle: bees are our mascots, our models, and unlike any other insect, are both feared and revered. In this fascinating account, Moore and Kosut travel into the land of urban beekeeping in New York City, where raising bees has become all the rage. We follow them as they climb up on rooftops, attend beekeeping workshops, and honey festivals, and even put on full-body

beekeeping suits and open up the hives In the process we meet a passionate dedicated and eclectic group of urban beekeepers who tend to their brood with an emotional and ecological connection that many find restorative and empowering Kosut and Moore also interview professional beekeepers and many others who tend to their bees for their all important production of a food staple honey The artisanal food shops that are so popular in Brooklyn are a perfect place to sell not just honey but all manner of goods soaps candles beeswax beauty products and even bee pollen Buzz also examines media representations of bees such as children s books films and consumer culture bringing to light the reciprocal way in which the bee and our idea of the bee inform one another Partly an ethnographic investigation and partly a meditation on the very nature of human insect relations Moore and Kosut argue that how we define visualize and interact with bees clearly reflects our changing social and ecological landscape pointing to how we conceive of and create culture and how in essence we create ourselves
