 Aaron Burr, 1838 Robert Southey, 1960 **Spatial Imaginings in the Age of Colonial Cartographic Reason**
 Nilanjana Mukherjee, 2020-05-18 This volume explores how India as a geographical space was constructed by the British colonial regime in visual and material terms. It demonstrates the instrumentalisation of cultural artefacts such as landscape paintings, travel literature and cartography as spatial practices overtly carrying scientific truth claims to materially produce artificial spaces that reinforced power relations. It sheds light on the primary dominance of cartographic reason in the age of European Enlightenment which framed aesthetic and scientific modes of representation and imagination. The author cross-examines this imperial gaze as a visual perspective which bore the material inscriptions of a will to assert, possess and control. The distinguishing theme in this study is the production of India as a new geography sourced from Britain's own interaction with its rural outskirts and domination in its fringes. This book addresses the concept of production of space to study the formulation of a colonial geography which resulted in the birth of a new place, later a nation. Investigates a generative period in the formation of British India c. 1750-1850 as a colonial territory vis-à-vis its representation and reiteration in British maps, landscape paintings and travel writings. Brings Great Britain and British India together on one plane, not only in terms of the physical geo-spaces but also in the excavation of critical domains by alluding to critics from both spaces. Seeks to understand the pictorial grammar that legitimised the expansive British imperial cartographic gaze as the dominant narrative which marginalised all other existing local ideas of space and inhabitation. Rethinking colonial constructions of modern India, this volume will be of immense interest to scholars and researchers of modern history, cultural geography, colonial studies, English literature, cultural studies, art, visual studies and area studies.

Withers,Bill Bell,2015-05-11 In eighteenth and nineteenth century Britain books of travel and exploration were much more than simply the printed experiences of intrepid authors They were works of both artistry and industry products of the complex and often contested relationships between authors and editors publishers and printers These books captivated the reading public and played a vital role in creating new geographical truths In an age of global wonder and of expanding empires there was no publisher more renowned for its travel books than the House of John Murray Drawing on detailed examination of the John Murray Archive of manuscripts images and the firm s correspondence with its many authors a list that included such illustrious explorers and scientists as Charles Darwin and Charles Lyell and literary giants like Jane Austen Lord Byron and Sir Walter Scott *Travels into Print* considers how journeys of exploration became published accounts and how travelers sought to demonstrate the faithfulness of their written testimony and to secure their personal credibility This fascinating study in historical geography and book history takes modern readers on a journey into the nature of exploration the production of authority in published travel narratives and the creation of geographical authorship a journey bound together by the unifying force of a world leading publisher

The Lake Poets in Prose Stuart Andrews,2021-04-06 Focused on the Lake Poets prose writing including their journalism and correspondence this collection of essays challenges some widely held assumptions Much of the narrative is Bristol based as the city s reference library holds not only much of Southey s personal library but the borrowing registers of the old subscription library which still record the titles that Coleridge and Southey borrowed in the 1790s It places the poets American Susquehanna project customarily dismissed as the idealistic dreams of Oxbridge students in the context of European emigration schemes prompted by the American Revolution Similarly the label Jacobin suggesting French revolutionary brutality is shown here to

be no more apt a description than Communist was in 1950s America. However the book does show that the poets did challenge the government's social and political assumptions of the day often from a religious standpoint. The claim that the three poets abandoned democratic impulses when Napoleon invaded Switzerland is also here rebutted by their involvement a decade later in defending the independence of Spain and Portugal not only against Bonaparte but against their ancient regime monarchies. When in 1815 those monarchs were restored Southey pinned his democratic hopes on the Portuguese colony of Brazil. At home amid distress caused by wholesale demobilization and shrinkage of economically viable agricultural land the poets understandably condemned the rabble rousers and correctly predicted an assassination attempt. Coleridge and Southey both youthful Unitarians and like Wordsworth devotees of the religion of nature are argued here to have defended the Established Church against Catholic Emancipation while the two brothers-in-law's interest in Islam is shown to be more than mere obsessive Orientalism.
